1976 TECHNICAL EDITORS

AIAA JOURNAL

EDITOR-IN-CHIEF
George W. Sutton

ASSOCIATE EDITORS
Charles D. Babcock Jr.
Lloyd Back
Richard H. Battin
John V. Breakwell
Nelson H. Kemp
Louis A. Povinelli
Paul E. Rubbert
Joseph A. Schetz
Lucien Schmit
Allie M. Smith
Ronald O. Stearman
Kenell J. Touryan

JOURNAL OF SPACECRAFT AND ROCKETS

EDITOR-IN-CHIEF
Donald C. Fraser

ASSOCIATE EDITORS
Kenn E. Clark
Paul F. Holloway
Leonard Meirovitch
Joseph V. Mullin
William F. Powers
R.H. Woodward Waesche

JOURNAL OF AIRCRAFT

EDITOR-IN-CHIEF
Allen E. Fuhs

ASSOCIATE EDITORS
David R. Clark
James E. Dougherty Jr.
Toshi Kubota
Allen I. Ormsbee
Roy E. Reichenbach
Edwin B. Stear
Joseph P. Tymczyszyn
E. Carson Yates

JOURNAL OF HYDRONAUTICS

EDITOR-IN-CHIEF
John P. Breslin

PROGRESS IN ASTRONAUTICS AND AERONAUTICS

EDITOR-IN-CHIEF
Martin Summerfield

1976 OFFICERS

President
EDGAR M. CORTRIGHT

Treasurer
JAMES P. MITCHELL

Vice Presidents
Education: HERBERT FOX
Member Services: CHARLES W. DUFFY JR.
Publications: RALPH R. RAGAN
Public Policy: RICHARD D. DeLAUER
Technical Activities: JOHN W. LUCAS

President-Elect: RENÉ H. MILLER

1976 STAFF OFFICERS

Executive Secretary
JAMES J. HARFORD

Secretary and Controller
EDWARD H. SEYMOUR

1976 BOARD OF DIRECTORS

Directors—Technical
FRANK A. CLEVELAND
BURTON I. EDELSON
THOMAS J. KELLY
ARTUR MAGER
WILLIAM M. MAGRUDER
RICHARD R. TUMLINSON

Directors-at-Large
GLYNN S. LUNNEY
DALE D. MYERS
W.L. PRITCHARD
LEONARD M. ROSE
JAMES T. STEWART
SHEILA E. WIDNALL

Directors—Regional
FREDERICK S. BILLIG
WILLIAM B. BRIGGS
ALAN POPE
LEWIS E. RITTENHOUSE
PAUL N. ROSSOW
SELDEN B. SPANGLER

Director-Past President: GRANT L. HANSEN

MEMBERS OF THE 1976 PUBLICATIONS COMMITTEE

Vice President-Publications and Chairman: Ralph R. Ragan

H. NORMAN ABRAMSON
PIER L. BARGELLINI
FREDERICK S. BILLIG
RAYMOND S. BISPLINGHOFF
GREGORY H. CANAVAN
HARVEY R. CHAPLIN JR.
EARL H. DOWELL
GORDON L. DUGGER
THOMAS J. GREGORY
HENRY J. KELLEY
STEPHEN H. MASLEN
RUDOLPH X. MEYER
J. LEITH POTTER
EDWARD W. PRICE
HERBERT E. RAUCH
MARTIN SUMMERFIELD
ALEXANDER J. TACHMINDJI

1976 JOURNAL AND PROGRESS SERIES STAFF

DIRECTOR, SCIENTIFIC PUBLICATIONS
RUTH F. BRYANS

ASSISTANT DIRECTOR, SCIENTIFIC PUBLICATIONS
ANNE HUTH

ADMINISTRATIVE ASSISTANT
JEANNE GODETTE

MANAGING EDITOR, AIAA JOURNAL AND JOURNAL OF HYDRONAUTICS
CATHERINE GANNON

MANAGING EDITOR, JOURNAL OF SPACECRAFT AND ROCKETS AND JOURNAL OF AIRCRAFT
MARK MANDELBAUM

MANAGING EDITOR, PROGRESS IN ASTRONAUTICS AND AERONAUTICS
JOSEPH GANNON

Published by the American Institute of Aeronautics and Astronautics Inc. at 1290 Avenue of the Americas, New York, N.Y. 10019. Cable address: INSAERAST NEW YORK. West Coast Office: 9841 Airport Blvd., Los Angeles, Calif. 90045. Washington Office: 1625 Eye Street N.W., Suite 606, Washington, D.C. 20006. Librarians will receive one copy of the index for each subscription which they have. Any AIAA member who subscribes to one or more Journals will receive one index. Additional copies available from AIAA, 1290 Avenue of the Americas, New York, N.Y. 10019, $10.00 per copy **(remittance must accompany order.)**

Subject and Author Indexes of Technical Papers Published in the AIAA Journals and in Progress in Astronautics and Aeronautics Books in 1976

AIAA Journal (Vol. 14, 1976)

Issue	Pages	Issue	Pages
January	1-128	July	833- 992
February	129-288	August	993-1152
March	289-416	September	1153-1344
April	417-544	October	1345-1504
May	545-704	November	1505-1664
June	705-832	December	1665-1792

Journal of Spacecraft and Rockets (Vol. 13, 1976)

Progress in Astronautics and Aeronautics (Vols. 40-49, 1976)

SYN, SA, TN, EN, TC, and ERR indicate Synoptic, Survey Article, Technical Note, Engineering Note, Technical Comment, and Errata, respectively. All other items are regular full-length articles. The initials of the publication in which the paper was published are in parentheses at the end of each entry. In the Subject Index, papers are listed alphabetically by title, regardless of publication or category.

Subject Index 4

Author Index 31

LIST OF SUBJECT INDEX TOPIC TITLES

AIRCRAFT TECHNOLOGY, CONVENTIONAL

Aircraft Aerodynamics (including Component Aerodynamics) 4
Aircraft Cabin Environment and Life Support Systems 4
Aircraft Configuration Design 4
Aircraft Crew Training 5
Aircraft Deceleration Systems 5
Aircraft Economics (including System Economics) 5
Aircraft Fabrication 5
Aircraft Flight Operations 5
Aircraft Gust Loading and Wind Shear 5
Aircraft Handling, Stability, and Control 5
Aircraft Landing Dynamics 5
Aircraft Navigation, Communication, and Traffic Control 5
Aircraft Noise, Aerodynamics (including Sonic Boom 5
Aircraft Noise, Powerplant 6
Aircraft Performance 6
Aircraft Powerplant Design and Installation 7
Aircraft Structural Design (including Loads) 7
Aircraft Structural Materials 8
Aircraft Subsystem Design 8
Aircraft Testing (including Component Wind Tunnel Testing) 8
Aircraft Vibration 8
Air Transportation Systems 8
General Aviation Systems 8
Ground Support Systems 8

AIRCRAFT TECHNOLOGY, VTOL

Ground (or Water-Surface) Effect Machines 8
Rotary Wing Aerodynamics 8
VTOL Aircraft Design 9
VTOL Flight Operation 9
VTOL Handling, Stability, and Control 9
VTOL Landing Dynamics 9
VTOL Powerplant Design and Installation 9
VTOL Testing 9

FLUID DYNAMICS

Aeroacoustics 9
Boundary Layers and Convective Heat Transfer—Laminar 9
Boundary Layers and Convective Heat Transfer—Turbulent 9
Boundary-Layer Stability and Transition 10
Hydrodynamics 10
Jets, Wakes, and Viscid-Inviscid Flow Interactions 11
Multiphase Flows 12
Nonsteady Aerodynamics 12
Nozzle and Channel Flow 13
Plasma Dynamics and MHD 13
Radiatively Coupled Flows and Heat Transfer 14
Rarefied Flows 14
Reactive Flows 14
Shock Waves and Detonations 14
Subsonic and Transonic Flow 14
Supersonic and Hypersonic Flow 15
Viscous Nonboundary-Layer Flows 16
Wave Motion and Sloshing 16

INTERDISCIPLINARY TOPICS

Aerospace Management 16
Aerospace Technology Utilization 16
Atmospheric, Space, and Oceanographic Sciences 16
Computer Technology and Computer Simulation Techniques 17
Electric Power Generation Research 17
Lasers 18
Law, History, Policy, and Sociology 18
Navigation, Control, and Guidance Theory 18
Reliability, Quality Control, and Maintainability 18
Research Facilities and Instrumentation 18
Safety 19
Space Processing 19

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

LV/M Aerodynamic Heating 19
LV/M Aerodynamics 19
LV/M Configurational Design 19
LV/M Dynamics and Control 19
LV/M Dynamics, Uncontrolled 19
LV/M Flight Testing 19
LV/M Fuel and Propellant Systems (including Storage and Transfer) 19
LV/M Fuel and Propellant Systems (including Storage and Transfer) 19
LV/M Guidance Systems (including Command and Information Systems) 19
LV/M Gust Loading and Wind Shear 19
LV/M Mission Studies and Economics 19
LV/M Propulsion System Integration 19
LV/M Simulation 19
LV/M Structural Design (including Loads) 20
LV/M Subsystem Design 20
LV/M System and Component Ground Testing 20
LV/M Trajectories 20
Launch Vehicle Systems (including Ground Support) 20
Missile Systems 20
Tracking Systems 20

MARINE TECHNOLOGY

Marine Electric Power Systems 20
Marine Hydrodynamics, Vessel and Control Surface 20
Marine Mooring Systems and Cable Mechanics 20
Marine Propulsion System Integration 20
Marine Vessel Design (including Loads) 20
Marine Vessel Systems, Submerged 20
Marine Vessel Trajectories, Stability, and Control 20
Oceanography, Physical and Biological 20
Propulsion System Hydrodynamics 20
Sea Pollution Containment and Control 20
Undersea Acoustics 20

PROPULSION

Airbreathing Engine Testing 20
Airbreathing Propulsion, Hypersonic 20
Airbreathing Propulsion, Subsonic and Supersonic 20

Combustion in Gases 20
Combustion in Heterogeneous Media 20
Combustin Stability, Ignition, and Detonation 22
Electric and Advanced Space Propulsion 22
Fuels and Propellants, Properties of 22
Liquid Rocket Engines 22
Marine Propulsion 22
Nuclear Propulsion 22
Rocket Engine Testing 22
Solid and Hybrid Rocket Engines 23

SPACECRAFT TECHNOLOGY

Data Sensing and Presentation or Transmission Systems 23
Earth-Orbital Trajectories 23
Earth Satellite Systems, Unmanned 23
Entry Deceleration Systems and Flight Mechanics (e.g. Parachutes) 23
Entry Vehicle Dynamics and Control 23
Entry Vehicles and Landers 23
Entry Vehicle Mission Studies and Flight Mechanics 24
Entry Vehicle Testing 24
Extra-Vehicular Activity 24
Lunar and Interplanetary Spacecraft Systems, Unmanned 24
Lunar and Interplanetary Trajectories 24
Meteoroid Protection Systems 24
Radiation Protection Systems 24
Satellite Communication Systems (including Ground Stations) 24
Spacecraft Attitude Dynamics and Control 24
Spacecraft Communication Systems 24
Spacecraft Configurational and Structural Design (including Loads) 25
Spacecraft Electric Power Systems 25
Spacecraft Flight Testing 25
Spacecraft Ground Testing and Simulation (including Components) 25
Spacecraft Habitability, Crew Training, and Life Support Systems 25
Spacecraft Missions and Economics 25
Spacecraft Navigation, Guidance, and Flight-Path Control Systems 25
Spacecraft Propulsion Systems Integration 26
Spacecraft Sterilization 26
Spacecraft Temperature Control Systems 26
Spacecraft Tracking 26
Space Medicine (including Weightlessness, Radiation Effects, Psychology, Etc) 26
Space Station Systems, Manned 26

STRUCTURAL MECHANICS AND MATERIALS

Aeroelasticity and Hydroelasticity 26
Hypervelocity Impact 26
Materials, Properties of 26
Structural Composite Materials (including Coatings) 27
Structural Design, Optimal 27
Structural Dynamic Analysis 27
Structural Stability Analysis 28
Structural Static Analysis 28
Thermal Stresses 29

THERMOPHYSICS AND THERMOCHEMISTRY

Atomic, Molecular, and Plasma Properties 29
Heat Conduction 29
Heat Pipes 29
Liquid and Solid Thermophysical Properties 29
Material Ablation 29
Radiation and Radiative Heat Transfer 30
Thermal Modeling and Experimental Thermal Simulation 30
Thermal Surface Properties 30
Thermochemistry and Chemical Kinetics 30

SUBJECT INDEX

AIRCRAFT TECHNOLOGY, CONVENTIONAL

Aircraft Aerodynamics (including Component Aerodynamics)

Aerodynamic characteristics of slender wings with sharp leading edges—A review. A.G. Parker (JA) 161
Aerodynamic measurements for an oscillating two-dimensional jet-flap airfoil. J.M. Simmons (AIAA J) 741
Aerodynamic symmetry of aircraft and guided missiles. Peter H. Zipfel (JA) 470
Aerodynamics of sideslipping delta wings at incidence with leading-edge separation. M.J. Cohen (JA, EN) 1020
Aerodynamics of slender rolling wings at incidence in separated flow. M.J. Cohen and D. Nimri (AIAA J) 886
Aerodynamic symmetry of aircraft and guided missiles. Peter H. Zipfel (JA) 470
Analysis of circulation controlled airfoils. Edward H. Gibbs and Nathan Ness (JA, EN) 158
Analysis of leading-edge separation bubbles on airfoils. Peter Crimi and Barry L. Reeves (AIAA J) 1548
Analytical model of axisymmetric afterbody flow separation. Walter M. Presz Jr. and Edward T. Pitkin (JA) 500
Augmentation of vortex lift by spanwise blowing. James F. Campbell (JA) 727
Calculation of initial vortex roll-up in aircraft wakes. Rajendra K. Bera (JA, EN) 58
Captive testing for conducting aircraft motion analysis studies. R.W. Butler (JA, EN) 315
Computation of separated transonic turbulent flows. George S. Deiwert (AIAA J) 735
Correlation of turbulent trailing vortex decay data. James D. Iversen (JA) 338
Design concepts for future cargo aircraft. R.H. Lange (JA) 385
Development of theoretical models for jet-induced effects on V/STOL aircraft. M.J. Siclari, D. Migdal, T.W. Luzzi Jr., J. Barche, and J.L. Palcza (JA) 938
Diagnostic calculations of airframe-radiated noise. R.E. Hayden, Y. Kadman, D.B. Bliss, and S.A. Africk (PS, V. 45) 179
Dynamic stall analysis in light of recent numerical and experimental results. Lars E. Ericsson and J. Peter Reding (JA) 248
Effect of geometry on open cavity flow-induced pressure oscillations. M.E. Franke and D.L. Carr (PS, V. 45) 297
Effect of Reynolds number on boattail drag. David E. Reubush (JA) 334
Exact operator solutions of general three-dimensional boundary-layer flow equations. Andrzej Wortman and Gim Soo-Hoo (JA) 590
Experimental determination of improved aerodynamic characteristics utilizing biplane wing configurations. E. Carl Olson and B.P. Selberg (JA) 256
Experimental dynamic stability characteristics of a shuttle orbiter at $M_\infty = 8$. Bob L. Uselton, Delma C. Freeman Jr., and Richmond P. Boyden (JSR) 424—(JSR, ERR) 635
Experimental poststall rotary aerodynamic coefficients for airplane-like configurations. M.H. Clarkson, G.N. Malcolm, and G.T. Chapman (JA) 565
Experimental study of the effect of span loading on aircraft wakes. Victor R. Corsiglia, Vernon J. Rossow, and Donald L. Ciffone (JA) 968
F-14A high-angle-of-attack characteristics. William Bihrle, Jr. and Rudolph C. Meyer (JA) 576
Hot-wire and vorticity meter wake vortex surveys. A.D. Zalay (AIAA J, TN) 694
Hybrid upper surface blown flap propulsive-lift concept for the QSRA. John A. Cochrane and Robert J. Carros (JA) 855
Inlets for high angles of attack. Brent A. Miller (JA, EN) 319
Inverse method for the design of multielement high-lift systems. T.D. Beatty and J.C. Narramore (JA) 393
Investigation of two-dimensional wedge exhaust nozzles for advanced aircraft. Donald L. Maiden and John E. Petit (JA) 809
Inviscid analysis of transonic, slatted airfoils. D.A. Caughey (JA) 29
Leading-edge-vortex augmentation in compressible flow. R.G. Bradley, P.D. Whitten, and W.O. Wray (JA) 238
Lifespan of trailing vortices in a turbulent atmosphere. S.C. Crow and E.R. Bate Jr. (JA) 476
LTA aerodynamic data revisited. H.C. Curtis Jr., D.C. Hazen, and W.F. Putman (JA, SA) 835
Measured pressure distributions on an airfoil with oscillating jet flap. J.M. Simmons (AIAA J) 1297
Minimum induced drag of ground effect wings. Shigenori Ando and Haruki Yashiro (JA) 106
Modern look at conformal mapping including multiply connected regions, A. David C. Ives (AIAA J) 1006
New smoke generator for flow visualization in low speed wind tunnels. A.G. Parker and J.C. Brusse (JA, EN) 57
Nonaxisymmetric nozzles installed in advaned fighter aircraft. P.E. Hiley, H.W. Wallace, and D.E. Booz (JA) 1000
Nonlinear prediction of aerodynamic loads on lifting surfaces. O.A. Kandil, D.T. Mook, and A.H. Nayfeh (JA) 22
Nozzle afterbody configuration development for the B-1 strategic bomber. J.C. Sargent and J.L. Gunter (JA) 135
Optical and physical requirements for fluid particles marking trailing vortices from aircraft. Lloyd H. Back (JA) 483
Prediction of vortex flow characteristics of wings at subsonic and supersonic speeds. John E. Lamar (JA) 490
Preliminary wind tunnel test of a finite aspect ratio high performance general aviation wing. Robert K. Rice and Robert B. Oetting. (JA, EN) 223
Pressure distribution prediction for two-dimensional hydrofoils with massive turbulent separation. C.L. S. Farn, F.R. Goldschmied, and D.K. Whirlow (JH) 95
Propulsion characteristics affecting the aerodynamic performance of an externally blown flap transport model. Danny R. Hoad (JA) 625
Recent developments in predicting unsteady airloads caused by control surface motions. W.S. Rowe, J.D. Sebastian, and M.C. Redman (JA) 955
Representation of the drag polar of a fighter aircraft. Kirit S. Yajnik and Malladi V. Subbaiah (JA, EN) 155
Some aspects of fan noise suppression using high Mach number inlets. S.D. Savkar and S.B. Kazin (JA, ERR) 64
"Spilled" leading-edge vortex effects on dynamic stall characteristics. Lars E. Ericsson and J. Peter Reding (JA, EN) 313
Steady incompressible variable-thickness shear layer aerodynamics. M.R. Chi (AIAA J, SYN) 1155
Subsonic loads on wings having sharp leading edges and tips. O.A. Kandil, D.T. Mook, and A.H. Nayfeh (JA, EN) 62
Summary of propulsive-lift research in the Langley 16-ft transonic tunnel. Francis J. Capone (JA) 803
Symmetrical singularity model for lifting potential flow analysis. Brian Maskew and Frank A. Woodward (JA, EN) 733
Theoretical and experimental studies of discrete-tone rotor-stator interaction noise. G.F. Homicz, G.R. Ludwig, and J.A. Lordi (PS, V. 44) 3
Theoretical study of self-balancing missiles. Edward J. Hopkins (JSR) 3
Three-dimensional solution of flows over wings with leading-edge vortex separation. James A. Weber, Guenter W. Brune, Forrester T. Johnson, Paul Lu, and Paul E. Rubbert (AIAA J) 519
Wake blockage corrections and ground effect testing in closed wind tunnels. J.E. Hackett and R.A. Boles (JA) 597
Wing-jet interaction theory for USB configurations, A. C. Edward Lan and James F. Campbell (JA) 718

Aircraft Cabin Environment and Life Support Systems

Dynamics of a crash victim—A finite segment model. Ronald L. Huston, Richard E. Hessel, and James M. Winget (AIAA J) 173
Filter requirements for aircraft penetrating radioactive dust clouds. Rayford P. Patrick and George D. Arnett (JA, SYN) 65

Aircraft Configuration Design

Aerodynamic heat transfer to a hypersonic research aircraft model (X-24C) at Mach 6. Pierce L. Lawing and James L. Hunt (JA, EN) 1018
Aeroelastic stability and control of an oblique wing: Wind tunnel experiments. R.T. Jones (JA, EN) 832
Conceptual design of reduced energy transports. M.D. Ardema, M. Harper, C.L. Smith, M.H. Waters, and L.J. Williams (JA) 545
Configuration management during transition for a powered-lift STOL aircraft. Walter A. Johnson and Samuel J. Craig (JA) 119
Design concepts for future cargo aircraft. R.H. Lange (JA) 385
Design for minimum fuselage drag. Jan Roskam and Greg Fillman (JA, EN) 639
F-14A high-angle-of-attack characteristics. William Bihrle, Jr. and Rudloph C. Meyer (JA) 576
F-15 nozzle/afterbody integration. Richard E. Martens (JA) 327
Flight performance of a circulation controlled STOL aircraft. J.L. Loth, J.B. Fanucci, and S. C. Roberts (JA) 169
Investigation of two-dimensional wedge exhaust nozzles for advanced aircraft. Donald L. Maiden and John E. Petit (JA) 809
Shape of the future long-haul airplane. C.W. Clay and A. Sigalla (JA) 551
Summary of propulsive-lift research in the Langley 16-ft transonic tunnel. Francis J. Capone (JA) 803
Theoretical study of self-balancing missiles. Edward J. Hopkins (JSR) 3
Wing-tunnel tests and computer simulations of buoyant wing-tip vortices. R.C. Costen, R.E. Davidson, and G.T. Rogers (JA) 495
YF-16 inlet design and performance. J.E. Hawkins (JA) 436

Aircraft Crew Training

Major changes in American Airlines flight crew training. T.M. Melden and R.C. Houston (JA) 901
Touchdown performance with a computer graphics night visual attachment. E.A. Palmer and F.W. Cronn (JA) 89

Aircraft Deceleration Systems

Parametric study of parachute pressure distribution by wind tunnel testing. W.B. Pepper and J.F. Reed (JA) 895
Performance of a cascade thrust reverser for short-haul applications. Donald A. Dietrich and Orlando A. Gutierrez (JA) 185
Reply by authors to P.R. Payne. K.R. Reddy and B.W. Roberts (JA, ERR) 64
Suction braking. T. Desmond Earl (JA) 658

Aircraft Economics (including System Economics)

Advanced subsonic transports—A challenge for the 1990's. Richard E. Black and John A. Stern (JA) 321
Challenge to advanced technology transport aircraft systems. F.A. Cleveland (JA) 737
Costs and benefits of composite material applications to a civil STOL aircraft. T.R. Logan (JA) 369
Engine life cycle cost: A laboratory view. Robert F. Panella (JA, EN) 156
Network study of subsidized air service. W.M. Swan (JA) 227

Aircraft Fabrication

Material thickness control through manufacturing process refinement. G.E. Knowles Jr. (JA) 467
Simplified sculptured-surface technique applied to wind-tunnel models. Martin Roche (JA, EN) 735

Aircraft Flight Operations

Dynamic behavior of an aircraft encountering aircraft wake turbulence. R.C. Nelson (JA) 704
Filter requirements for aircraft penetrating radioactive dust clouds. Rayford P. Patrick and George D. Arnett (JA, SYN) 65
Major changes in American Airlines flight crew training. T.M. Melden and R.C. Houston (JA) 901
Nonstationary random pulses representation of ground roughness for taxiing aircraft. Robert P. Chen and Michael C. Bernard (JA) 911

Aircraft Gust Loading and Wind Shear

Airfoil response to an incompressible skewed gust of small spanwise wave-number. R.K. Amiet (AIAA J, TN) 541
High frequency thin-airfoil theory for subsonic flow. Roy K. Amiet (AIAA J) 1076
Scanning laser Doppler velocimeter system simulation for sensing aircraft wake vortices. J.A.L. Thomson and J.C.S. Meng (JA) 605

Aircraft Handling, Stability, and Control

Aeroelastic stability and control of an oblique wing: Wind tunnel experiments. R.T. Jones (JA, EN) 832
Analysis of visual threshold effect on manual aircraft control. G.R. Sarma and Y.N. Bapat (JA, SYN) 225
Anticipated spin susceptibility characteristics of the A-10 aircraft. K.L. Johnson and T.B. Willen (JA) 406
Captive testing for conducting aircraft motion analysis studies. R.W. Butler (JA, EN) 315
Closed-loop analysis of manual flare and landing. Robert K. Heffley (JA) 83
Configuration management during transition for a powered-lift STOL aircraft. Walter A. Johnson and Samuel J. Craig (JA) 119
Design for minimum fuselage drag. Jan Roskam and Greg Fillman (AJ, EN) 639
Dynamic behavior of an aircraft encountering aircraft wake turbulence. R.C. Nelson (JA) 704
Experimental poststall rotary aerodynamic coefficients for airplane-like configurations. M.H. Clarkson, G.N. Malcolm, and G.T. Chapman (JA) 565
F-14A high-angle-of-attack characteristics. William Bihrle, Jr. and Rudolph C. Meyer (JA) 576
Failure accommodation in digital flight control systems accounting for nonlinear aircraft dynamics. Raymond C. Montgomery and Douglas B. Price (JA) 76
Flight test of a digital guidance and control system in a DC-10 aircraft. S.S. Osder, D.C. Mossman, and B.T. Devlin (JA) 676
Flutter of asymmetrically swept wings. Terrence A. Weisshaar and J.B. Crittenden (AIAAJ, SYN) 993
Generalized inverse of a matrix: The minimization approach. Eliezer Y. Shapiro and Hans E. Decarli (AIAA J, TN) 1483
Improved automatic carrier landing using deck motion prediction. Ronald A. Hess and Thomas M. Judd (JA, EN) 153
Mini-RPV lateral autopilot design. Itzhack Y. Bar-Itzhack and Eryk Ferdman (AIAA J) 1189
Nonsymmetric flight influence on high-angle-of-attack handling and departure. Donald E. Johnston and Jeffrey R. Hogge (JA) 112
Periodic control and the optimality of aircraft cruise. Elmer G. Gilbert and Michael G. Parsons (JA, EN) 828
Practical aspect of Bass' algorithm for stabilizing linear-time-invariant systems, A. Eliezer Y. Shapiro and Hans E. Decarli (AIAA J, TN) 1630
Prediction of vortex flow characteristics of wings at subsonic and supersonic speeds. John E. Lamar (JA) 490
Theoretical study of self-balancing missiles. Edward J. Hopkins (JSR) 3
Unsteady hypersonic flow over delta wings with detached shock waves. W.H. Hui and H.T. Hemdan (AIAA J) 505; (ERR) 1663
Variable-metric algorithm employing linear and quadratic penalties. Henry J. Kelley, Leon Lefton, and Ivan L. Johnson, Jr. (AIAA J) 427
YF-17 ground testing and simulation. J.T. Gallagher and R. Merriman (JA) 906

Aircraft Landing Dynamics

Closed-loop analysis of manual flare and landing. Robert K. Heffley (JA) 83
Improved automatic carrier landing using deck motion prediction. Ronald A. Hess and Thomas M. Judd (JA, EN) 153
Measurement of wake vortex strength by means of acoustic back scattering. David C. Burnham, Thomas E. Sullivan, and Leonard S. Wilk (JA) 889
Microwave landing system requirements for STOL operations. Stuart C. Brown, Clifford N. Burrous, Tsuyoshi Goka, and Kun E. Park (JA) 140
Nonstationary random pulses representation of ground roughness for taxiing aircraft. Robert P. Chen and Michael C. Bernard (JA) 911
Oil compressibility and polytropic air compression analysis for oleo-pneumatic shock struts. Mahinder K. Wahi (JA) 527
Oleopneumatic shock strut dynamic analysis and its real-time simulation. Mahinder K. Wahi (JA) 303

Aircraft Navigation, Communication, and Traffic Control

Comparison of two basic Doppler compensation methods. P.A. Kullstam (PS, V. 42) 263
CONUS aeronautical radionavigation by satellite. Irvin G. Stiglitz (PS, V. 41) 81
Error analysis of two new gradiometer-aided inertial navigation systems. Warren G. Heller and Stanley K. Jordan (JSR) 340
Flight test of a digital guidance and control system in a DC-10 aircraft. S.S. Osder, D.C. Mossman, and B.T. Devlin (JA) 676
Four-dimensional guidance problem with control delays. Natarajan Nagarajan (JA) 559
Ground simulation of a satellite navigation system, A. John J. Courtney, Jr. and Ivan Kadar (PS, V. 41) 199
Integrated inertial reference—inertial navigation system. Bernard Lee (JA) 449
Microwave landing system requirements for STOL operations. Stuart C. Brown, Clifford N. Burrous, Tsuyoshi Goka, and Kun E. Park (JA) 140
On modeling ATC work load and sector capacity. David K. Schmidt (JA) 531

Aircraft Noise, Aerodynamics (including Sonic Boom)

Acoustic characteristics of a large upper-surface-blown configuration with turbofan engines. John S. Preisser and David J. Fratello (PS, V. 45) 83
Acoustic far field of a point source in parallel flowing fluid layers. H.Y. Lu (PS, V. 43) 307
Acoustic wave propagation in a lined duct with nonuniform admittance. J.C. Yu, C.D. Smith, and P. Mungur (PS, V. 44) 397
Acoustically transparent walls for wind-tunnel applications. A.B. Bauer (JA, EN) 637
Aerodynamic sound generation due to the interaction of an unsteady wake with a rigid surface. C.A. Smith and K. Karamcheti (PS, V. 44) 233
Aircraft far-field aerodynamic noise: Its measurement and prediction. Gerald J. Healy (PS, V. 45) 203
Ambient and induced pressure fluctuations in supersonic jet flows. V. Barra, S. Slutsky, and S. Panunzio (PS, V. 43) 257
Approximate prediction of airframe noise. Martin R. Fink (JA, SYN) 833
Bernoulli enthalphy: A fundamental concept in the theory of sound. John E. Yates and Guido Sandri (PS, V. 43) 65
Computer model of the lightning–thunder process, with audible demonstration. H.S. Ribner, F. Lam, K.A. Leung, D. Kurtz, and N.D. Ellis (PS, V. 46) 77
Correction of open-jet wind-tunnel measurements for shear layer refraction. Roy K. Amiet (PS, V. 46) 259
Cross-correlation of noise produced inside a hot turbojet exhaust with and without suppression. W.C. Meecham and D.R. Regan (PS, V. 43) 423

Density fluctuations and radiated noise for a high-temperature supersonic jet. S.P. Parthasarathy, P.F. Massier, R.F. Cuffel, and J.R. Radbill (PS, V. 43) 283
Development of a new computer system for aircraft noise prediction. John P. Raney (PS, V. 46) 93
Development of experimental techniques for the study of helicopter rotor noise. Wesley L. Harris and Albert Lee (PS, V. 44) 615
Diagnostic calculations of airframe-radiated noise. R.E. Hayden, Y. Kadman, D.B. Bliss, and S.A. Africk (PS, V. 45) 179
Duct acoustic and acoustic finite element method. A. Kapur and P. Mungur (PS, V. 44) 363
Effect of forward speed on jet wing/flap interaction noise. Waman V. Bhat and Davide Gallo-Rosso (PS, V. 45) 127
Effect of geometry on open cavity flow-induced pressure oscillations. M.E. Franke and D.L. Carr (PS, V. 45) 297
Effect of grazing flow on the steady-state resistance of square-edged orifices. T. Rogers and A.S. Hersh (PS, V. 44) 259
Effects of noise reduction on characteristics of a tilt-rotor aircraft. J. Gibs, W.Z. Stepniewski, and R. Spencer (JA) 919
Experimental investigation of the aeroacoustic characteristics of model slot nozzles with straight flaps. Grant T. Patterson, M.C. Joshi, and James R. Maus (PS, V. 45) 41
Experimental studies of noise-shielding effects for a delta-winged aircraft. R.W. Jeffery and T.A. Holbeche (PS, V. 45) 419
Experimental study of airframe self-noise, An. P. Fethney (PS, V. 45) 379
Experimental study of shock-free sulersonic jet noise, An H.K. Tanna and P.D. Dean (PS, V. 43) 203
Experimental study of the structure and acoustic field of a jet in a cross stream, An. Ivan Camelier and K. Karamcheti (PS, V. 43) 121
Experiments on supersonic jet noise. J. Laufer, R. Schlinker, and R.E. Kaplan (AIAA J) 489
Factors in the design and performance of free-jet acoustic wind tunnels. Y. Kadman and R.E. Hayden (PS, V. 46) 247
Flow-induced pressure fluctuations in cavities and concepts for their suppression. Hanno H. Heller and Donald B. Bliss (PS, V. 45) 281
Flowfield in the plane of symmetry below a delta wing. M.S. Cramer, A.R. George, and A.R. Seebass (AIAA J) 212
Fluctuating pressures on aircraft wing and flap surfaces associated with powered-lift systems. John S. Mixson, James A. Schoenster, and Conrad M. Willis (PS, V. 45) 59
Fluid-mechanical model of the acoustic impedance of small orifices. A.S. Hersh and T. Rogers (PS, V. 44) 307
Forward velocity effects on under-the-wing externally blown flap noise. J. Goodykoontz, U. Von Glahn, and R. Dorsch (PS, V. 45) 147
High frequency thin-airfoil theory for subsonic flow. Roy K. Amiet (AIAA J) 1076
Induced drag effect on airframe noise. James D. Revell (PS, V. 45) 221
Influence of grazing flow on duct wall normal impedances. P. Mungur and J.L. Whitesides (PS, V. 44) 289
Jet noise modeling: Theoretical predictions and comparisons with measured data. B.J. Tester and C.L. Morfey (PS, V. 43) 159
Jet noise source location by cross-correlation of far field microphone signals. S.P. Parthasarathy (PS, V. 43) 107
Measured effects of turbulence on the rise time of a weak shock. P.E. Tubb (PS, V. 46) 17
Measurement and prediction of jet noise in flight. K.W. Bushell (PS, V. 43) 137
Measurements and analysis of aircraft airframe noise. Terrill W. Putnam, Paul L. Lasagna, and Kenneth C. White (PS, V. 45) 363
Measurements of discrete vortex noise in a closed-throat wind tunnel. Sanford S. Davis (PS, V. 45) 237
Methods for the prediction of airframe aerodynamic noise. James D. Revell, Gerald J. Healy, and John S. Gibson (PS, V. 46) 139
Minimization of jet and core noise of a turbojet engine by swirling the exhaust flow. Ira R. Schwartz (PS, V. 43) 379
Near-field studies of a choked jet seeded with upstream sound. B.H.K. Lee (AIAA J, TN) 270
New evidence of subsonic jet noise mechanisms. S. Paul Pao and Lucio Maestrello (PS, V. 43) 27
Noise radiation from turbulent flows over compliant surfaces. Y.S. Pan (PS, V. 45) 315
Periodic "Mach wave" radiations from a small supersonic helium jet. R. Westley and J.H. Woolley (PS, V. 43) 237
Potential flow model for calculation of jet noise, A. P.O.A.L. Davies, J.C. Hardin, A.V.J. Edwards, and J.P. Mason (PS, V. 43) 91
Preliminary airframe noise measurements on a transport model in a quiet flow facility. J.G. Shearin and P.J. Block (PS, V. 45) 351
Preliminary investigation of remotely piloted vehicles for airframe noise research, A. David J. Fratello and John G. Shearin (PS, V. 45) 405
Propagation of aircraft noise over long distances through the lower atmosphere. A.L. Abrahamson (PS, V. 46) 3
Propulsive-lift noise of an upper-surface-blown flap configuration. N.N. Reddy (PS, V. 45) 27
Recent advances in the technology of aircraft noise control. Robert E. Pendley (JA) 513
Saturation effects associated with sound propagation in a turbulent medium. Alan R. Wenzel (PS, V. 46) 67
Scattering of coherent sound waves by atmospheric turbulence. P.L. Chow, C.H. Liu, and L. Maestrello (PS, V. 46) 51
Scrubbing noise of externally blown flaps. Martin R. Fink (PS, V. 45) 3
Simulation by vortex rings of the unsteady pressure field near a jet. C.H. Liu, L. Maestrello, and M.D. Gunzburger (PS, V. 43) 47
Some aspects of fan noise suppression using high Mach number inlets. S.D. Savkar and S.B. Kazin (JA, ERR) 64
Some measurements of spatial instability waves in a round jet. B.H.K. Lee (AIAA J) 348
Sound pressures of a choked jet oscillating in the spinning mode. R. Westley and J.H. Woolley (PS, V. 43) 185
Sound propagation in curved ducts. M.K. Myers and P. Mungur (PS, V. 44) 347
Sound scattering from atmospheric turbulence. Ming Nan Huang (PS, V. 46) 35
Sparse matrix techniques applied to modal analysis of multisection duct liners. W.R. Arnold (PS, V. 44) 385
Tests of a theoretical model of subsonic jet noise. N.S.M. Nosseir and H.S. Ribner (PS, V. 43) 3
Thickness noise of helicopter rotors at high tip speeds. F. Farassat, R.J. Pegg, and D.A. Hilton (PS, V. 44) 601
Tone noise of high-speed rotors. D.L. Hawkings and M.V. Lowson (PS, V. 44) 539
Trailing edge noise. Christopher T.W. Tam and J.C. Yu (PS, V. 45) 259
V/STOL rotor and propeller noise: Its prediction and analysis of its aural characteristics. Richard P. White Jr. (PS, V. 44) 583
Wake cutting by a cascade of cambered blades. C.M. Ho and L.S.G. Kovasznay (PS, V. 44) 43

Aircraft Noise, Powerplant

Acoustic characteristics of a large upper-surface-blown configuration with turbofan engines. John S. Preisser and David J. Fratello (PS, V. 45) 83
Acoustic far field of a point source in parallel flowing fluid layers. H.Y. Lu (PS, V. 43) 307
Aerodynamic sound generation due to the interaction of an unsteady wake with a rigid surface. C.A. Smith and K. Karamcheti (PS, V. 44) 233
Aircraft flyover noise measurements. E.L. Zwieback (PS, V. 46) 103
Ambient and induced pressure fluctuations in supersonic jet flows. V. Barra, S. Slutsky, and S. Panunzio (PS, V. 43) 257
Attenuation of the sound associated with a plane wave in a multisectional duct. Dennis W. Quinn (PS, V. 44) 331
Augmentor wing propulsive-lift concept acoustic characteristics. Michael D. Falarski, John F. Wilby, and Thomas N. Aiken (JA) 987
Combustion intensity and distribution relation to noise generation. E.G. Plett, M.D. Leshner, and M. Summerfield (PS, V. 43) 509
Computation methods for acoustic radiation from circular ducts. R.J. Beckemeyer, D.T. Sawdy, and P. Garner (PS, V. 44) 415
Convergence of theory and experiment in direct combustion-generated noise. Warren C. Strahle (PS, V. 43) 467
Core engine noise due to temperature fluctuations convecting through turbine blade rows. G.F. Pickett (PS, V. 43) 589
Cross-correlation of noise produced inside a hot turbojet exhaust with and without suppression. W.C. Meecham and D.R. Regan (PS, V. 43) 423
Density fluctuations and radiated noise for a high-temperature supersonic jet. S.P. Parthasarathy, P.F. Massier, R.F. Cuffel, and J.R. Radbill (PS, V. 43) 283
Development of a new computer system for aircraft noise prediction. John P. Raney (PS, V. 46) 93
Effect of conical flameholders on combustion-generated noise. M. Muthukrishnan, W.C. Strahle, and J.C. Handley (AIAA J, SYN) 995
Effect of forward motion on fan noise. J.E. Merriman and R.C. Good (PS, V. 44) 159
Effect of forward speed on jet wing/flap interaction noise. Waman V. Bhat and Davide Gallo-Rosso (PS, V. 45) 127
Effect of grazing flow on the steady-state resistance of square-edged orifices. T. Rogers and A.S. Hersh (PS, V. 44) 259
Effect of simulated forward flight on subsonic jet exhaust noise. A.B. Packman, K.W. Ng, and R.W. Paterson (JA) 1007
Effects of conical segment on sound radiation from a circular duct. D.T. Sawsy, R.J. Beckemeyer, and P. Garner (PS, V. 44) 433
Effects of forward speed on a number of turbojet exhaust silencers, The. J.R. Brooks and R.J. Woodrow (PS, V. 43) 439
Experimental investigation of the core engine noise of a turbofan engine, An. R.G. Hoch, P. Thomas, and E. Weiss (PS, V. 43) 555
Experimental study of shock-free supersonic jet noise, An H.K. Tanna and P.D. Dean (PS, V. 43) 203

Experimental study of the structure and acoustic field of a jet in a cross stream, An. Ivan Camelier and K. Karamcheti (PS, V. 43) 121
Fan aeroacoustics: The effect of stator blade number and spacing on in-duct noise signatures. G. Krishnappa (PS, V. 44) 23
Fan noise from turbofan engines. Charles E. Feiler and E. William Conrad (JA) 128
Fluid-mechanical model of the acoustic impedance of small orifices. A.S. Hersh and T. Rogers (PS, V. 44) 307
Forward velocity effects on under-the-wing externally blown flap noise. J. Goodykoontz, U. Von Glahn, and R. Dorsch (PS, V. 45) 147
Further experimental results on the structure and acoustics of turbulent jet flames. R.N. Kumar (PS, V. 43) 483
Influence of grazing flow on duct wall normal impedances. P. Mungur and J.L. Whitesides (PS, V. 44) 289
Jet and suppressor correlation measurements R.A. Kantola (PS, V. 43) 399
Jet noise modeling: Theoretical predictions and comparisons with measured data. B.J. Tester and C.L. Morfey (PS, V. 43) 159
Jet noise source location by cross-correlation of far field microphone signals. S.P. Parthasarathy (PS, V. 43) 107
Measurement and prediction of jet noise in flight. K.W. Bushell (PS, V. 43) 137
Minimization of jet and core noise of a turbojet engine by swirling the exhaust flow. Ira R. Schwartz (PS, V. 43) 379
Model and full-scale test results relating to fan noise in-flight effects. J.P. Roundhill and L.A. Schaut (PS, V. 44) 181
Noise generation and transmission in duct combustors. David W. Lindley and H.A. Hassan (PS, V. 43) 579
Noise produced by fluid inhomogeneities. Warren C. Strahle (AIAA J, TN) 985
Noise shielding effects for engine-over-wing installations. V.M. Conticelli, A. DiBlasi, and J.V. O'Keefe (PS, V. 45) 103
Noncompact source effect on the prediction of tone noise from a fan rotor. S. Kaji (PS, V. 44) 55
—Optical evaluation of combustion noise source terms. H.J. Schafer, E.G. Plett, and M. Summerfield (AIAA J, SYN) 1163
Outdoor jet noise facility: A unique approach. R.A. Kantola (PS, V. 46) 223
Performance of a cascade thrust reverser for short-haul applications. Donald A. Dietrich and Orlando A. Gutierrez (JA) 185
Periodic "Mach wave" radiations from a small supersonic helium jet. R. Westley and J.H. Woolley (PS, V. 43) 237
Propagation of aircraft noise over long distances through the lower atmosphere. A.L. Abrahamson (PS, V. 46) 3
Propulsive-lift noise of an upper-surface-blown flap configuration. N.N. Reddy (PS, V. 45) 27
Recent advances in exhaust systems for jet suppression of high-speed aircraft. C.D. Simcox, R.S. Armstrong, and Y. Atvars (JA) 442
Recent advances in the technology of aircraft noise control. Robert E. Pendley (JA) 513
Review of theory and methods for combustion noise prediction. R.E. Motsinger and J.J. Emmerling (PS, V. 46) 177
Review of theory and methods for the prediction of ground effects on aircraft noise propagation. Paul B. Oncley (PS, V. 46) 123
Review of theory and methods for turbine noise prediction. D.C. Mathews, R.T. Nagel, and J.D. Kester (PS, V. 46) 155
Role of rotor blade blockage in the propagation of fan noise interaction tones, The. M.G. Philpot (PS, V. 44) 83
Simulation of flight effects on aero-engine fan noise. B.W. Lowrie (PS, V. 44) 139
Skin friction on a flat perforated acoustic liner. Donald R. Boldman and Paul F. Brinich (AIAA J, TN) 1656
Sound pressures of a choked jet oscillating in the spinning mode. R. Westley and J.H. Woolley (PS, V. 43) 185
Spinning mode sound propagation in ducts with acoustic treatment and sheared flow. Edward J. Rice (PS, V. 44) 475
Study of subsonic fan noise sources, A. Donald B. Hanson (PS, V. 44) 209
Supersonic jet noise suppression with multitube nozzle/ejectors. J. Atvars, C.P. Wright, and C.D. Simcox (PS, V. 43) 329
Suppression of multiple pure tones. Ali Hasan Nayfeh and John E. Kaiser (PS, V. 44) 371
Tests of a theoretical model of subsonic jet noise. N.S.M. Nosseir and H.S. Ribner (PS, V. 43) 3
Theoretical and experimental studies of discrete-tone rotor-stator interaction noise. G.F. Homicz, G.R. Ludwig, and J.A. Lordi (PS, V. 44) 3
Thermocouple time constant measurement by cross power spectra. Warren C. Strahle and M. Muthukrishnan (AIAA J, TN) 1642
Turbine noise generation, reduction, and prediction. S.B. Kazin and R.K. Matta (PS, V. 44) 109
Use of a laser shadowgraph for jet noise diagnosis. Michael J. Rudd (PS, V. 46) 281
Use of Hartmann generators as sources of high-intensity sound in a large absorption flow-duct facility, The. D.L. Martlew (PS, V. 46) 203
Wave envelope analysis of sound propagation in ducts with variable axial impedance. Kenneth J. Baumeister (PS, V. 44) 451

Aircraft Performance

Advanced subsonic transports—A challenge for the 1990's. Richard E. Black and John A. Stern (JA) 321
Analysis of circulation controlled airfoils. Edward H. Gibbs and Nathan Ness (JA, EN) 158
Conceptual design of reduced energy transports. M.D. Ardema, M. Harper, C.L. Smith, M.H. Waters, and L.J. Williams (JA) 545
Design for minimum fuselage drag. Jan Roskam and Greg Fillman (JA, EN) 639
Efficiency of human power production by vertical pumping. William J. Anderson and Earl F. Weener (JA) 413
F-15 nozzle/afterbody integration. Richard E. Martens (JA) 327
Fixed-range optimum trajectories for short-haul aircraft. John F. Barman and Heinz Erzberger (JA) 748
Flight performance of a circulation controlled STOL aircraft. J.L. Loth, J.B. Fanucci, and S.C. Roberts (JA) 169
Minimum induced drag of ground effect wings. Shigenori Ando and Haruki Yashiro (JH) 106
Near-optimal takeoff policy for heavily loaded helicopters exiting from confined areas. Fredric H. Schmitz and C. Rande Vause (JA) 343
Nonaxisymmetric nozzles installed in advanced fighter aircraft. P.E. Hiley, H.W. Wallace, and D.E. Booz (JA) 1000
Nonoptimality of the steady-state cruise for aircraft. Jason L. Speyer (JAIAA J) 1604
Nozzle afterbody configuration development for the B-1 strategic comber. J.C. Sargent and J.L. Gunter (JA) 135
Optimal trajectories of high-thrust aircraft. Gerald M. Anderson and William L. Othling Jr. (JA) 180
Periodic control and the optimality of aircraft cruise. Elmer G. Gilbert and Michael G. Parsons (JA, EN) 828
Propulsion characteristics affecting the aerodynamic performance of an externally blown flap transport model. Danny R. Hoad (JA) 625
Representation of the drag polar of a fighter aircraft. Kirit S. Yajnik and Malladi V. Subbaiah (JA, EN) 155
Solution of the minimum time-to-climb problem by matched asymptotic expansions. Mark D. Ardema (AIAA J) 843
Variable-metric algorithm employing linear and quadratic penalties. Henry J. Kelley, Leon Lefton, and Ivan L. Johnson, Jr. (AIAA J) 427
Variation of turbulence with altitude to 70,000 ft. David E. Waco (JA) 981
Wake blockage corrections and ground effect testing in closed wind tunnels. J.E. Hackett and R.A. Boles (JA) 597
YC-14 system for leading-edge boundary-layer control. Hubert L. Ernst and Alankar Gupta (JA) 149

Aircraft Powerplant Design and Installation

Development program for the F-15 inlet. William F. Imfeld (JA) 286
Effect of Reynolds number on boattail drag. David E. Reubush (JA) 334
Integrated scramjet nozzle/afterbody performance analysis. Jonas A. Sadunas (JA) 867
Investigation of two-dimensional wedge exhaust nozzles for advanced aircraft. Donald L. Maiden and John E. Petit (JA) 809
Summary of propulsive-lift research in the Langley 16-ft transonic tunnel. Francis J. Capone (JA) 803
Turbine noise generation, reduction, and prediction. S.B. Kazin and R.K. Matta (PS, V. 44) 109

Aircraft Structural Design (Including Loads)

Accurate prediction of critical conditions for shear-loaded panels. George J. Simitses and Izhak Sheinman (AIAA J, TN) 683
Aeroelastic stability and control of an oblique wing: Wind tunnel experiments. R.T. Jones (JA, EN) 832
Buckling behavior and structural efficiency of open-section stiffened composite compression panels. Jerry G. Williams and Manuel Stein (AIAA J) 1618
Design study of structural concepts for an arrow-wing supersonic cruise aircraft. I.F. Sakata, G.W. Davis, J.C. Robinson, and E.C. Yates, Jr. (JA) 880
Developing the "backbone" of the F-14. Carlos Paez and Thomas Taglarine (JA) 419
Fluctuating pressures on aircraft wing and flap surfaces associated with powered-lift systems. John S. Mixson, James A. Schoenster, and Conrad M. Willis (PS, V. 45) 59
Flutter of asymmetrically swept wings. Terrence A. Weisshaar and J.B. Crittenden (AIAA J, SYN) 993
Force/stiffness technique for nondestructive buckling testing. Robert E. Jones and Bruce E. Greene (JA) 262
Generalized inverse of a matrix: The minimization approach. Eliezer Y. Shapiro and Hans E. Decarli (AIAA J, TN) 1483
In-plane stresses in edge stiffened swept panels. B. Dattaguru and A.K. Rao (AIAA J) 1038
Inverse design criteria for supersonic internally pressurized polymer domes. Anthony San Miguel (JA) 432

Isogrid structural tests and stability analyses. P. Slysh, J.E. Dyer, J.H. Furman, and J.E. Key (JA) 778
Joint aircraft loading/structure response statistics of time to service crack initiation. J.-N. Yang and W.J. Trapp (JA) 270
Material thickness control through manufacturing process refinement. G.E. Knowles Jr. (JA) 467
New Air Force requirements for structural safety, durability, and life management. M.D. Coffin and C.F. Tiffany (JA) 93
Optimum design of composite structures with stress and displacement constraints. N.S. Khot, V.B. Venkayya, and L. Berke (AIAA J, SYN) 131
Solution of lateral vibration of a cantilever by parameter differentiation. J.P. Chiou and T.Y. Na (AIAA J, ERR) 1344
Spectrum crack growth analysis using the Willenborg model. Robert M. Engle and James L. Rudd (JA) 462
Static deflection of beams subjected to elastic rotational restraints. Esam M. Nassar and Wilfred H. Horton (AIAA J TN) 122
Use of fracture mechanics in estimating structural and inspection intervals. Mitchell P. Kaplan and Joseph A. Reiman (JA) 99

Aircraft Structural Materials

Corrosion fatigue crack growth in 7050 aluminum alloy extrusions. J.M. Van Orden and D.E. Pettit (JA) 873
Design concepts for future cargo aircraft. R.H. Lange (JA) 385
Developing the "backbone" of the F-14. Carlos Paez and Thomas Taglarine (JA) 419
Early detection of fatigue damage in composite materials. M.J. Salkind (JA) 764
Environmental effects on graphite-epoxy fatigue properties. H.T. Sumsion (JSR) 150
Fatigue damage analysis and life prediction of laminated metal plates. R.A. Heller, C.T. Liu, and G.W. Swift (AIAA J) 1031
Fatigue failure of angle ply laminates. Assa Rotem and Zvi Hashin (AIAA J) 868
Spectrum crack growth analysis using the Willenborg model. Robert M. Engle and James L. Rudd (JA) 462

Aircraft Subsystem Design

Dust particle trajectories in aircraft radial turbines. W.B. Clevenger and W. Tabakoff (JA) 786
F-15 computational subsystem. T.V. McTigue (JA) 945
Filter requirements for aircraft penetrating radioactive dust clouds. Rayford P. Patrick and George D. Arnett (JA, SYN) 65
Free-surface rotational flow around a ducted propeller. Roland Maria-Sube (JA) 506
New MIL-F-9490D requirements and implications on future flight control design. James L. Townsend and Paul E. Blatt (JA) 670
Oleopneumatic shock strut dynamic analysis and its real-time simulation. Mahinder K. Wahi (JA) 303
Viscous flow around close-fitting spherical pistons in right circular cylinders. G. David Huffman (AIAA J, TN) 96
YC-14 system for leading-edge boundary-layer control. Hubert L. Ernst and Alankar Gupta (JA) 149

Aircraft Testing (including Component Wind Tunnel Testing)

Aerodynamic heat transfer to a hypersonic research aircraft model (X-24C) at Mach 6. Pierce L. Lawing and James L. Hunt (JA, EN) 1018
Aircraft flyover noise measurements. E.L. Zwieback (PS, V. 46) 103
Augmentation of vortex lift by spanwise blowing. James F. Campbell (JA) 727
Captive testing for conducting aircraft motion analysis studies. R.W. Butler (JA, EN) 315
Correlation of turbulent trailing vortex decay data. James D. Iversen (JA) 338
Development of experimental techniques for the study of helicopter rotor noise. Wesley L. Harris and Albert Lee (PS, V. 44) 615
Development of minimum-correction wind tunnels. Samuel Bernstein and Robert G. Joppa (JA) 243
Digital generation of random forces for large-scale experiments. M. Shinozuka, R. Vaicaitis, and H. Asada (JA) 425
Effect of Reynolds number on boattail drag. David E. Reubush (JA) 334
Effect of simulated forward flight on subsonic jet exhaust noise. A.B. Packman, K.W. Ng, and R.W. Patterson (JA) 1007
Effect of sting oscillations on the measurement of dynamic stability derivatives. Glen E. Burt and James C. Uselton (JA) 210
Evaluation of F-15 inlet dynamic distortion. A. Pike Farr (JA) 36
Experimental poststall rotary aerodynamic coefficients for airplane-like configurations. M.H. Clarkson, G.N. Malcolm, and G.T. Chapman (JA) 565
Experimental study of airframe self-noise, An. P. Fethney (PS, V. 45) 379
F-15 flight test experience with the F100 engine. Donald B. Hamer and Gilbert B. Ballard (JA) 292
F-15 nozzle/afterbody integration. Richard E. Martens (JA) 327
Factors in the design and performance of free-jet acoustic wind tunnels. Y. Kadman and R.E. Hayden (PS, V. 46) 247
Flight performance of a circulation controlled STOL aircraft. J.L. Loth, J.B. Fanucci, and S.C. Roberts (JAz 169
Force/stiffness technique for nondestructive buckling testing. Robert E. Jones and Bruce E. Greene (JA) 262
Hot-wire and vorticity meter wake vortex surveys. A.D. Zalay (AIAA J TN) 694
LTA aerodynamic data revisited. H.C. Curtiss, Jr., D.C. Hazen, and W.F. Putman (JA, SA) 835
Measurements of discrete vortex noise in a closed-throat wind tunnel. Sanford S. Davis (PS, V.45) 237
New Air Force requirements for structural safety, durability, and life management. M.D. Coffin and C.F. Tiffany (JA) 93
New smoke generator for flow visualization in low speed wind tunnels. A.G. Parker and J.C. Brusse (JA, EN) 57
Poststall/spin characteristics of an LK-10A sailplane. Donald T. Ward, A. George Bennett, and John K. Owens (JA) 571
Preliminary wind tunnel test of a finite aspect ratio high performance general aviation wing. Robert K. Rice and Robert B. Oetting. (JA, EN) 223
Review of theory and methods for the prediction of ground effects on aircraft noise propagation. Paul B. Oncley (PS, V. 46) 123
Simplfied sculptured-surface technique applied to wind-tunnel models. Martin Roche (JA, EN) 735
Use of a navigation platform for performance instrumentation on the YF-16. J.N. Olhausen (JA) 231
Wind tunnel measurements of rolling moment in a swept-wing vortex wake. Z. El-Ramly, W.J. Rainbird, and D.G. Earl (JA) 962
YF-16 inlet design and performance. J.E. Hawkins (JA) 436
YF-17 ground testing and simulation. J.T. Gallagher and R. Merriman (JA) 906

Aircraft Vibration

Damping synthesis from substructure tests. T.K. Hasselman (AIAA J) 1409
Digital generation of random forces for large-scale experiments. M. Shinozuka, R. Vaicaitis, and H. Asada (JA) 425
Drag effects on wing flutter. Augustin Petre and Holt Ashley (JA) 755
Dynamic beam model with internal damping rotatory inertia and shear deformation. Clarence Wilfred de Silva (AIAA J) 676
Dynamic response of an acoustically coupled panel, The. D.H.Y. Yen, L. Maestrello, and S.L. Padula (PS, V. 45) 335
Free-interface methods of substructure coupling for dynamic analysis. Roy R. Craig, Jr. and Ching-Jone Chang (AIAA J, TN) 1633
Nonstationary random pulses representation of ground roughness for taxiing aircraft. Robert P. Chen and Michael C. Bernard (JA) 911

Air Transportation Systems

Advanced subsonic transports—A challenge for the 1990's. Richard E. Black and John A. Stern (JA) 321
Challenge to advanced technology transport aircraft systems. F.A. Cleveland (JA) 737
Effects of cruise-altitude pollution. Anthony J. Broderick (JA) 817
Experimental determination of improved aerodynamic characteristics utilizing biplane wing configurations. E. Carl Olson and B.P. Selberg (JA) 256
LTA aerodynamic data revisited. H.C. Curtiss, Jr., D.C. Hazen, and W.F. Putman (JA, SA) 835
Network study of subsidized air service. W.M. Swan (JA) 227
On modeling ATC work load and sector capacity. David K. Schmidt (JA) 531
Stochastic properties of enroute air traffic—an empirical investigation. William J. Dunlay Jr. and Robert Horonjeff (JA) 376

General Aviation Systems

Experimental determination of improved aerodynamic characteristics utilizing biplane wing configurations. E. Carl Olson and B.P. Selberg (JA) 256

Groups Support Systems

Integrating ground support for propulsion systems on the 747. A.H. Sargent and W.P. Newell (JA) 850
Microwave landing system requirements for STOL operations. Stuart C. Brown, Clifford N. Burrous, Tsuyoshi Goka, and Kun E. Park (JA) 140

AIRCRAFT TECHNOLOGY, VTOL

Ground (or Water-Surface) Effect Machines

Configuration effects on the lift of a body in close ground proximity. William H. Ailor and William R. Eberle (JA) 584
Minimum induced drag of ground effect wings. Shigenori Ando and Haruki Yashiro (JH) 106

Rotary Wing Aerodynamics

Aerodynamics of the Darrieus rotor. Robert E. Wilson, Stel N. Walker, and Peter B.S. Lissaman (JA, EN) 1023

Discrete frequency rotor noise. John W. Leverton (PS, V. 44) 559
Force and pressure measurements on an airfoil oscillating through stall. A.G. Parker (JA) 823
Numerical calculation of unsteady transonic potential flow over helicopter rotor blades. Francis X. Caradonna and Morris P. Isom (AIAA J) 482
Potential flow about impulsively started rotors. J. Michael Summa (JA, EN) 327
V/STOL rotor and propeller noise: Its prediction and analysis of its aural characteristics. Richard P. White Jr. (PS, V. 44) 583

VTOL Aircraft Design

Design considerations for a V/STOL technology airplane. Joseph M. Zabinsky and Robert M. Burnham (JA) 745
Effects of noise reduction on characteristics of a tilt-rotor aircraft. J. Gibs, W.Z. Stepniewski, and R. Spencer (JA) 919
Experimental investigation of the aeroacoustic characteristics of model slot nozzles with straight flaps. Grant T. Patterson, M.C. Joshi, and James R. Maus (PS, V. 45) 41
Prediction of ground effects for VTOL aircraft with twin lifting jets. Jan Louisse and Franklin L. Marshall (JA) 123
Review of some tilt-rotor aeroelastic research at NASA-Langley. A. Raymond G. Kvaternik (JA) 357

VTOL Flight Operations

Near-optimal takeoff policy for heavily loaded helicopters exiting from confined areas. Fredric H. Schmitz and C. Rande Vause (JA) 343

VTOL Handling, Stability, and Control

Design considerations for a V/STOL technology airplane. Joseph M. Zabinsky and Robert M. Burnham (JA) 745
Investigation of VTOL landing control laws for low-speed flight. Christopher R. Guy (JA) 399
Near-hover control of a helicopter with a hanging load. Narendra K. Gupta and Arthur E. Bryson Jr. (JA) 217
Near-optimal takeoff policy for heavily loaded helicopters exiting from confined areas. Fredric H. Schmitz and C. Rande Vause (JA) 343
Practical aspect of Bass' algorithm for stabilizing linear-time-invariant systems, A. Eliezer Y. Shapiro and Hans E. Decarli (AIAA J, TN) 1630

VTOL Landing Dynamics

Investigation of VTOL landing control laws for low-speed flight. Christopher R. Guy (JA(399

VTOL Powerplant Design and Installation

Analytic description of hypermixing and test of an improved nozzle. Paul M. Bevilaqua (JA) 43
Design considerations for a V/STOL technology airplane. Joseph M. Zabinsky and Robert M. Burnham (JA) 745
Development of theoretical models for jet-induced effects on V/STOL aircraft. M.J. Siclari, D. Migdal, T.W. Luzzi Jr., J. Barche, and J.L. Palcza (JA) 938
Ejector performance at high temperatures and pressures. Brian Quinn (JA) 948
Prediction of ground effects for VTOL aircraft with twin lifting jets. Jan Louisse and Franklin L. Marshall (JA) 123

VTOL Testing

Optimum data utilization for parameter identification with application to lifting rotors. D. Banerjee and K. Hohenemser (JA, EN) 1014
Wake blockage corrections and ground effect testing in closed wind tunnels. J.E. Hackett and R.A. Boles (JA) 597

FLUID DYNAMICS

Aeroacoustics

Some recent developments in supersonic jet noise reduction. D.S. Dosanjh, K.K. Ahuja, M.R. Bassiouni, and P.K. Bhutiani (PS, V. 43) 353
Tone noise of high-speed rotors. D.L. Hawkings and M.V. Lowson (PS, V. 44) 539

Boundary Layers and Convective Heat Transfer—Laminar

Analysis of a compressible laminar boundary layer on a yawed cone. B. Roux and B. Forestier (AIAA J) 1069
Approximate solution of the Von Mises boundary-layer equation. Adolfo Reggiori (AIAA J, SYN) 1507
Boundary-layer development on moving walls using an integral theory. Kevin S. Fansler and James E. Danberg (AIAA J, TN) 1137
Boundary-layer separation from the electrode wall of an MHD generator. C.C.P. Pian and W.F.H. Merck (AIAA J)1585
Compressible laminar boundary layers with large acceleration and cooling. Lloyd H. Back and Robert F. Cuffel (AIAA J, TN) 968
Concentrated vortex on the nose of an inclined body of revolution. T.Hsieh and K.C. Wang (AIAA J, TN) 698
Determination of stagnation chamber temperature in high-enthalpy nozzle flows. Nimai Kuma Mitra and Martin Fiebig (AIAA J, TN) 406
Discontinuous solutions of three-dimensional compressible stagnation point boundary layers. Margaret Muthanna and G. Nath (AIAA J, TN) 1777
Effect of mass addition on the boundary layer of a hemisphere at Mach 6. A. Demetriades, A.J. Laderman, L. Von Seggern, A.T. Hopkins, and J.C. Donaldson (JSR, EN) 508
Effects of atomic oxygen on graphite ablation. Chul Park (AIAA J, TN) 1640
Effects of surface temperature and Reynolds number on leeward shuttle heating. John J. Bertin and Winston D. Goodrich (JSR) 473
Engineering flowfields and heating rates for highly swept wing leading edges. John J. Bertin, Stewart J. Mosso, Daniel W. Barnette, and Winston D. Goodrich (JSR) 540
Exact operator solutions of general three-dimensional boundary-layer flow equations. Andrzej Wortman and Gim Soo-Hoo (JA) 590
Fast and stable numerical method for boundary-layer flow with massive blowing. Tsong-Mou Liu and H.H. Chiu (AIAA J, TN) 114
Gasdynamics of the cryogenic cooler of the Nimbus F spacecraft. William J. Rae and Michael G. Dunn (JSR) 732
Higher-order numerical solutions using cubic splines. S.G. Rubin and P.K. Khosla (AIAA J) 851
Hypersonic viscous-inviscid interaction with vectored surface mass transfer. G.R. Inger and T.F. Swean (AIAA J) 589
Inverse boundary-layer method for compressible laminar and turbulent boundary layers, An. Tuncer Cebeci (JA) 709
Laminar boundary-layer analyses for parallel streams with interfacial mass transfer. C.K. Law (AIAA J, TN) 1497
Laminar compressible boundary layers with vectored mass transfer. G. Nath and Margaret Muthanna (AIAA J, TN) 1127
Laminar flow at a three-dimensional stagnation point with large rates of injection. Paul A. Libby (AIAA J) 1273
Leeward heat transfer experiments on the Shuttle Orbiter fuselage. J.P. Lamb and G.K. Mruk (JSR,EN) 701
Magnus forces on spinning supersonic cones—Part I: The boundary layer. H.A. Dwyer and B.R. Sanders (AIAA J) 498
Magnus forces on spinning supersonic cones. Part II: Inviscid flow. B.R. Sanders and H.A Dwyer (AIAA J) 576
Moving tuft method for stagnation point location. J.S. Tennant, W.S. Johnson, and A. Krothapalli (JA,EN) 61
Numerical approach to ionized nonequilibrium boundary layers, A. Hiroki Honma and Hiroaki Komuro (AIAA J, TN) 981
Numerical solutions of supersonic and hypersonic laminar compression corner flows. C.M. Hung and R.W. MacCormack (AIAA J) 475
Numerical study of separated laminar boundary layers over multiple sine-wave protuberances. A. Polak, M.J. Werle, V.N. Vatsa, and S.D. Bertke (JSR) 168
Rapid calculation of heat transfer in nonsimilar laminar incompressible boundary layers. Tsai-tse Kao and Harold G. Elrod Jr. (AIAA J) 1746
Similar boundary-layer analysis for lee-surface heating on yawed blunted cone. Shigeaki Nomura (AIAA J, SYN) 1509
Similarity solution of the boundary-layer equations for laser heated flows. Peter K. Wu (AIAA J, TN) 1659
Time development of the flow about an impulsively started cylinder. F.D. Deffenbaugh and F.J. Marshall (AIAA J) 908
Windward plane of symmetry laminar cross-flow effects. Arthur M. Hecht (JSR, EN) 503

Boundary Layers and Convective Heat Transfer—Turbulent

Aerodynamic heat transfer to a hypersonic research aircraft model (X-24C) at Mach 6. Pierce L. Lawing and James L. Hunt (JA,EN) 1018
Artificial thickening of high subsonic Mach number boundary layers. L.J. Otten III and J.E. Van Kuren (AIAA J) 1528
Calculation of compressible turbulent boundary layers on straight-tapered swept wings. P. Bradshaw, G.A. Mizner, and K. Unsworth (AIAA J, TN) 399
Calculation of three-dimensional boundary layers: III. Three-dimensional flows in orthogonal curvilinear coordinates. Tuncer Cebeci, Kalle Kaups, and Alfred Moser (AIAA J) 1090
Comment on "Gardon heat gage temperature response." Alexander H. Flax. (AIAA J, TC) 830
——Reply by authors to A.H. Flax. J.P. Kita and A.L. Laganelli (AIAA J, TC) 832

Comment on "Prediction of turbulent boundary layers at low Reynolds numbers." Roger L. Simpson (AIAA J, TC) 1662
——Reply by author to R.L. Simpson. Richard H. Pletcher (AIAA J, TC) 1663
Comparison of Reynolds stress diagnostics by fixed and rotating probes. F.J. Pierce and C.I. Ezekwe (AIAA J, TN) 412
Compressible turbulent boundary layer on a yawed cone. Patrick Bontoux and Bernard Roux (AIAA J, SYN) 545
Details of a shock-separated turbulent boundary layer at a compression corner. Gary S. Settles, Irwin E. Vas, and Seymour M. Bogdonoff (AIAA J) 1709
Detection of boundary-layer transition with a laser beam. A.J. Laderman and A. Demetriades (AIAA J, TN) 102
Diffusion of polymer additives in a developing turbulent boundary layer. Brian Latto and Ossama K.F. El Riedy (JH) 135
Dynamic stall experiments on oscillating airfoils. W.J. McCroskey, L.W. Carr, and K.W. McAlister (AIAA J) 57
Effect of geometry modifications on effectiveness of slot injection in hypersonic flow. Jerry N. Hefner (AIAA J, TN) 817
Effect of velocity gradients on measurements of turbulent shear stress. V.A. Sandborn (AIAA J, TN) 400
Exact operator solutions of three-dimensional boundary-layer flow equations. Andrzej Wortman and Gim Soo-Hoo (JA) 590
Flare-induced interaction lengths in supersonic, turbulent boundary layers. A. Roshko and G.J. Thomke (AIAA J) 873
Flight-test base pressure measurements in turbulent flow. Bruce M. Bulmer (AIAA J, TN) 1783
Flow and heat transfer measurements in a pseudo-shock region with surface cooling. Robert F. Cuffel and Lloyd H. Back (AIAA J) 1716
Generalized comparison between optimized and conventional diffusers. Shuang Huo (JA, EN) 541
Heated round jet in a coflowing stream, The. R.A. Antonia and R.W. Bilger, (AIAA J) 1541
High Mach number turbulent boundary-layer study, A.E. Backx and B.E. Richards (AIAA J, SYN) 1159
Importance of the near wake in drag prediction of bodies of revolution. V.C. Patel and O. Guven (AIAA J, TN) 1132
Improved algebraic relation for the calculation of Reynolds stresses. Z.U.A. Warsi and B.B. Amlicke (AIAA J, TN) 1779
Incipient separation of a supersonic turbulent boundary layer at high Reynolds numbers. Gary S. Settles, Seymour M. Bogdonoff, and Irwin E. Vas (AIAA J) 50
Integral momentum equation for flows with entropy gradients across inviscid streamlines. Aemer D. Anderson (AIAA J, TN) 983
Interpreting laser and hot-film anemometer signals in a separating boundary layer. Roger L. Simpson (AIAA J, TN) 124
Inverse analysis of turbulent weakly swirling jets. David G. Lilley (AIAA J, SYN) 547
Inverse boundary-layer method for compressible laminar and turbulent boundary layers, An. Tuncer Cebeci (JA) 709
Measurements of Mach 3 turbulence transport properties on a nozzle wall. William J. Yanta and Roland E. Lee. (AIAA J) 725
Modeling of three-dimensional mixing and reacting ducted flows. W.L. Rushmore and S.W. Zelazny (AIAA J, SYN) 1511
New measurements of turbulent shear stresses in hypersonic boundary layers. A.J. Laderman (AIAA J) 1286
Noise radiationn from turbulent flows over compliant surfaces. Y.S. Pan (PS, V. 45) 315
On modeling of atmospheric surface layers by the counter-jet technique. H.M. Nagib, M.V. Morkovin, J.T. Yung, and I. Tanatichat (AIAA J) 185
On the application of tension to compliant membranes. James M. McMichael and Norman E. Mease (AIAA J, TN) 1490
Prediction of turbulent boundary layers at low Reynolds numbers. Richard H. Pletcher (AIAA J, TN) 696
Preston tube calibration accuracy. Arild Bertelrud (AIAA J, TN) 98
Re-examination of compliant wall experiments in air with water substrates. Jerry N. Hefner and Leonard M. Weinstein (JSR, EN) 502
Reynolds shear stress and heat flux balance in a turbulent round jet. R.A. Antonia and A. Prabhu (AIAA J) 221
Rotating cylinder for circulation control on an airfoil. J.S. Tennant, W.S. Johnson, and A. Krothapalli (JH) 102
Shock interference peak heating measurements using phase change coatings. J. Wayne Keyes (JSR, EN) 61
Shock wave/turbulent boundary-layer interactions with and without surface cooling. Lloyd H. Back and Robert F. Cuffel (AIAA J) 526
Simulative study on the erosive burning of solid rocket motors. K. Yamada, M. Goto, and N. Ishikawa (AIAA J) 1170
Skin friction on a flat perforated acoustic liner. Donald R. Boldman and Paul F. Brinich (AIAA J, TN) 1656
Space-time correlation structure of hypersonic boundary layers. Anthony Demetriades and A.J. Laderman (AIAA J, TN) 256
Stagnation region heat transfer in hypersonic particle environments. Duane T. Hove and Edward Taylor (AIAA J, TN) 1486
Structure of turbulent shear flows: A new look. Anatol Roshko (AIAA J, Dryden Lecture) 1349
Supersonic shock wave turbulent boundary-layer interactions. C. Herbert Law (AIAA J) 730
Turbulence measurements in hypersonic shock-wave boundary-layer interaction flows. V. Mikulla and C.C. Horstman (AIAA J) 568
Turbulent boundary layers as affected by weak magneto-hydrodynamic forces. R.E. Sayles and R.C. Lessmann (AIAA J, TN) 1123
Unsteady turbulent boundary layers and separation. D.P. Telionis and D.Th. Tsahalis (AIAA J) 468
Variable density flows computed by a second-order closure description of turbulence. W.S. Lewellen, M.E. Teske, and Coleman duP. Donaldson (AIAA J) 382
Wall-wake velocity profile for compressible nonadiabatic flows. Chen-Chih Sun and Morris E. Childs (AIAA J, TN) 820

Boundary-Layer Stability and Transition

Boundary-layer transition on a film-cooled slender cone. John Starkenberg and Robert J. Cresci (AIAA J) 461
Comment on "Boundary-layer transition on supersonic cones in an aeroballistic range." A.B. Bailey (AIAA J, TC) 543
Detection of boundary-layer transition with a laser beam. A.J. Laderman and A. Demetriades (AIAA J, TN) 102
Effect of mass addition on the boundary layer of a hemisphere at Mach 6. A. Demetriades, A.J. Laderman, L. Von Seggern, A.T. Hopkins, and J.C. Donaldson (JSR, EN) 508
Experimental investigation of the boundary layer on a rotating cylinder. J.B. Morton, Ira D. Jacobson, and Seldon Saunders (AIAA J) 1458
Roughness induced transition criteria for space shuttle-type vehicles. E.Leon Morrisette (JSR, EN) 118
Trailing edge noise. Christopher K.W. Tam and J.C. Yu (PS, V. 45) 259
Water fog generation system for subsonic flow visualization. R.L. Bisplinghoff, J.B. Coffin, and C.W. Haldeman (AIAA J,. TN) 1133

Hydrodynamics

Calculation of the turning angle of two-dimensional incompressible cascade flow. Wolfgang Geller (AIAA J, SYN) 297
Comment on "Turning moment on a rotating disk," Paul S. Granville (JH, TC) 32
——Reply by authors to P.S. Granville. J. Richard Shanebrook and David McMullan (JH, TC) 32
Diffusion of polymer additives in a developing turbulent boundary layer. Brian Latto and Ossama K.F. El Riedy (JH) 135
Discretized simulation of vortex sheet evolution with buoyancy and surface tension effects. Robert G. Zalosh (AIAA J) 1517
Drag reduction and velocity distribution in developing pipe flow. Kikkeri L.V. Ramu and J. Paul Tullis (JH) 55
Elastohydrodynamics of towed slender bodies: The effect of nose and tail shapes on stability. Michael P. Paidoussis and Byung-Kun Yu (JH) 127
Electrohydrodynamically coupled minimum film boiling in dielectric liquids. T.B. Jones and R.C. Schaeffer (AIAA J) 1759
Flow past an anchored slender ship in variable-depth shallow water: An extension. Allen Plotkin (JH, EN) 28
Flows with significant orientational effects. William J. Rae (AIAA J, SA) 11
Higher-order numerical solutions using cubic splines. S.G. Rubin and P.K. Khosla (AIAA J) 851
Hydrodynamic coefficients of an elongated body rapidly approaching a free surface. Shin-Kien Chow, Arthur Y. Hou, and Louis Landweber (JH) 46
Hydroelastic ichthyoid propulsion. Michael P. Paidoussis (JH, EN) 30
Importance of the near wake in drag prediction of bodies of revolution. V.C. Patel and O. Guven (AIAA J, TN) 1132
Incompressible unsteady flow through a tube of variable cross-section. D.P. Flemming (AIAA J, TN) 253
Modern look at conformal mapping including multiply connected regions, A. David C. Ives (AIAA J) 1006
Motion of a floating structure in water of uniform depth. Jin S. Chung (JH) 65
Motions and loads of a catamaran ship of arbitrary shape in a seaway. C.H. Kim (JH) 8
Moving tuft method for stagnation point location. J.S. Tennant, W.S. Johnson, and A. Krothapalli (JA, EN) 61
Numerical solutions of the upper critical depth problem. Robert M. Hall and M. Holt (AIAA J) 191
Pressure distribution prediction for two-dimensional hydrofoils with massive turbulent separation. C.L.S. Farn, F.R. Goldschmied, and D.K. Whirlow (JH) 95
Rotating cylinder for circulation control on an airfoil. J.S. Tennant, W.S. Johnson, and A. Krothapalli (JH) 102
Simplified analysis of a plunger-type wavemaker performance. Jae Min Hyun (JH) 89
Stability of laser heated flows. P.K.S. Wu and A.N. Pirri (AIAA J TN) 390
Theoretical hydrodynamic coefficients of laterally oscillating profiles at high Froude number. G. Charles C. Smith and Richard P. Shaw (JH) 82

Theory for hinged wavemakers of finite draft in water of constant depth. Jae Min Hyun (JH) 2
Vortex frequencies of bluff cylinders at low Reynolds numbers, The. Donald T. Knauss, James E.A. John, and Colin H. Marks (JH) 121
Wind-tunnel tests and computer simulations of buoyant wing-tip vortices. R.C. Costen, R.E. Davidson, and G.T. Rogers (JA) 495

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Aerodynamic characteristics of an axisymmetric body undergoing a uniform pitching motion. L.H. Smith and R.H. Numm (JSR) 8
Aerodynamic measurements for an oscillating two-dimensional jet-flap airfoil. J.M. Simmons (AIAA J) 741
Aft-body drag reduction by combined boat-tailing and base blowing at $M=3$. Robert H. Korkegi and L. Michael Freeman (AIAA J, TN) 1143
Aided supersonic combustion of transversely injected fuels. R.A. Cookson and J.J. Isaac (AIAA J, SYN) 3
Analysis of base burning methods and applications. Homer H. Tang, Denny S. Chaussee, and Glen W. Zumwalt (PS, V.40) 349
Analysis of circulation controlled airfoils. Edward H. Gibbs and Nathan Ness (JA, EN) 158
Analysis of leading-edge separation bubbles on airfoils. Peter Crimi and Barry L. Reeves (AIAA J) 1548
Analytic description of hypermixing and test of an improved nozzle. Paul M. Bevilaqua (JA) 43
Analytical comparison of the performance of different base-burning modes. J.A. Schetz, S. Favin, and F.S. Billig (AIAA J, TN) 1337
Analytical model for a two-phase vacuum plume. Blaine E. Pearce (AIAA J, TN) 261
Analytical model of axisymmetric afterbody flow separation. Walter M. Presz Jr. and Edward T. Pitkin (JA) 500
Analytical procedure for calculation of attached and separated subsonic diffuser flows. William W. Bower (JA) 49
Analytical theory of transonic normal shock-turbulent boundary-layer interaction. G.R. Inger and W.H. Mason (AIAA J) 1266
Apparent subsonic choking in dual-stream nozzles. E. Fage (AIAA J, TN) 681
Approximate analysis of a laminar elliptical jet. Hermann Viets (AIAA J, SYN) 129
Approximate analysis of base burning in supersonic flow. J.A. Schetz and F.S. Billig (PS, V.40) 385
Augmentation of vortex lift by spanwise blowing. James F. Campbell (JA) 727
Base combustion effects on base pressure. S.N.B. Murthy and J.R. Osborn (PS, V.40) 307
Base flow phenomena with and without injection: Experimental results, theories, and bibliography. S.N.B. Murthy and J.R. Osborn (PS, V.40) 7
Base pressure calculations with external burning. William Smithey and Allen E. Fuhs (PS, V.40) 407
Calculation of initial vortex roll-up in aircraft wakes. Rajendra K. Bera (JA, EN) 58
Comparison of cold-gas simulations and rocket-launch data for constrictive launchers. John J. Bertin and James L. Batson (JSR) 684
Component analysis and synthesis for fully separated flows with special consideration of base drag reduction by combustion. H.H. Korst (PS, V. 40) 211
Confined jet mixing with nonparallel multiple-port injection. L. Douglas Smoot and Leslie A. Fort (AIAA J, SYN) 419
Development of fumers for small caliber ammunition. J. Richard Ward and Frank P. Baltakis (PS, V. 40) 449
Diffusion-limited chemical reactions in a turbulent shear layer. Irwin E. Alber and Richard G. Batt (AIAA J) 70
Discussion of transonic base flows in the presence of a propulsive jet, A. T.H. Moulden, J.M. Wu, and D.J. Spring (PS, V.40) 425
Drag reducing fumers. Austin W. Barrows (PS, V.40) 1
Drag-reducing fumer as a tool in ammunition design. Richard Kwatnoski (PS, V.40) 487
Effect of forward speed on jet wing/flap interaction noise. Waman V. Bhat and Davide Gallo-Rosso (PS, V.45) 127
Effect of geometry modifications on effectiveness of slot injection in hypersonic flow. Jerry N. Hefner (AIAA J, TN) 817
Effect of grazing flow on the steady-state resistance of square-edged orifices. T. Rogers and A.S. Hersh (PS, V.44) 259
Effects of surface temperature and Reynolds number on leeward shuttle heating. John J. Bertin and Winston D. Goodrich (JSR) 473
Effects of the initial boundary-layer state on turbulent jet mixing. William G. Hill, Jr. Richard C. Jenkins, and Barry L. Gilbert (AIAA J, SYN) 1513
Efficient computation of "stiff" chemically reacting flow in turbulent free jets. P.D. Thomas and K.H. Wilson (AIAA J) 629
Engineering flowfields and heating rates for highly swept wing leading edges. John J. Bertin, Steward J. Mosso, Daniel W. Barnette, and Winston D. Goodrich (JSR) 540
Experimental and theoretical investigation of flow generated by an array of porous tubes. J.M. Avidor, N.H. Kemp, and C.J. Knight (AIAA J) 1534
Experimental investigation of an axisymmetric jet in a coflowing airstream. G.D. Catalano, J.B. Morton, and R.R. Humphris (AIAA J, SYN) 1157
Experimental investigation of the aeroacoustic characteristics of model slot nozzles with straight flaps. Grant T. Patterson, M.C. Joshi, and James R. Maus (PS, V.45) 41
Experimental investigation of underexpanded exhaust plumes. Jean Claude Lengrand, Jean Allégre, and Michel Raffin (AIAA J, TN) 692; (ERR) 1792
Experimental study of shock-free supersonic jet noise, An. H.K. Tanna and P.D. Dean (PS, V. 43) 203
Experimental study of the effect of span loading on aircraft wakes. Victor R. Corsiglia, Vernon J. Rossow, and Donald L. Ciffone (JA) 968
Experimental study of the structure and acoustic field of a jet in a cross stream, An. Ivan Camelier and K. Karamcheti (PS, R. 43) 121
Experimental study of velocities in a free jet in a rarefied atmosphere. G. Dupeyrat and M. Giat (AIAA J) 1706
Finite-difference performance analysis of jet pumps. David R. Croft and David G. Lilley (AIAA J, SYN) 1347
Flare-induced interaction lengths in supersonic, turbulent boundary layers. A. Roshko and G.J. Thomke (AIAA J) 873
Flight-test base pressure measurements in turbulent flow. Bruce M. Bulmer (AIAA J, TN) 1783
Fluctuating pressures on aircraft wing and flap surfaces associated with powered-lift systems. John S. Mixson, James A. Schoenster, and Conrad M. Willis (PS, V.45) 59
Free-surface rotational flow around a ducted propeller. Roland Maria-Sube (JA) 506
Gas generators for base drag reduction (fumers). Theresa A. Elmendorf and Robert A. Trifiletti (PS, V. 40) 471
Heated round jet in a coflowing stream. The. R.A. Antonia and R.W. Bilger (AIAA J) 1541
Hemisphere-cylinder in transonic flow, $M_\infty = 0.7 = 1.0$. Tsuying Hsieh (AIAA J, ERR) 1343
High-altitude base pressure experiment, A. J.M. Cassanto and J.W. Lane (AIAA J) 1050
Hot-wire and vorticity meter wake vortex surveys. A.D. Zalay (AIAA J, TN) 694
Impingement of a two-dimensional supersonic jet upon a normal ground surface. D.J. Pollard and L.J. S. Bradbury (AIAA J) 1095
Importance of the near wake in drag prediction of bodies of revolution. V.C. Patel and O. Guven (AIAA J TN) 1132
Inverse analysis of turbulent weakly swirling jets. David G. Lilley (AIAA J, SYN) 547
Jet and suppressor correlation measurements. R.A. Kantola (PS, V.43) 399
Jet noise modeling: Theoretical predictions and comparisons with measured data. B.J. Tester and C.L. Morfey (PS, V.43) 159
Mach disk in truncated plug nozzle flows. Thomas V. Giel Jr. and Thomas J. Mueller (JSR) 203
Mean flow characteristics for the oblique impingement of an axisymmetric jet. J.F. Foss and S.J. Kleis (AIAA J, SYN) 705
Measured pressure distributions on an airfoil with oscillating jet flap. J.M. Simmons (AIAA J) 1297
Measurement of wake vortex strength by means of acoustic back scattering. David C. Burnham, Thomas E. Sullivan, and Leonard S. Wilk (JA) 889
Measurements and observations of turbulent recirculating jet flows. F.K. Owen (AIAA J) 1556
Method of integral relations and triple-point location in impinging jets. G.T. Kalghatgi and B.L. Hunt (JSR, EN) 763
Minimization of jet and core noise of a turbojet engine by swirling the exhaust flow. Ira R. Schwartz (PS, V. 43) 379
Monitoring wake vortex strength decay near the ground. James N. Hallock (JA, EN) 830
Near-field studies of a choked jet seeded with upstream sound. B.H.K. Lee (AIAA J, TN) 270
Noise shielding effects for engine-over-wing installations. V.M. Conticelli, A. Di Blasi, and J.V. O'Keefe (PS, V. 45) 103
Nonasymptotic triple deck model for supersonic boundary-layer interaction, A. King-Mon Tu and Sheldon Weinbaum (AIAA J) 767
Numerical boundary conditions for viscous flow problems. J.C. Wu (AIAA J) 1042
Numerical simulation of shock wave-turbulent boundary-layer interaction. J.S. Shang, W.L. Hankey, Jr., and C. Herbert Law (AIAA J) 1451
Numerical study of separated laminar boundary layers over multiple sine-wave protuberances. A. Polak, M. J. Werle, V.N. Vatsa, and S.D. Bertke (JSR) 168
On the structure of three-dimensional shock-induced separated flow regions. R.H. Korkegi (AIAA J) 597
Optical and physical requirements for fluid particles marking trailing vortices from aircraft. Lloyd H. Back (JA) 483
Outdoor jet noise facility: A unique approach. R.A. Kantola (PS, V. 46) 223
Periodic "Mach wave" radiations from a small supersonic helium jet. R. Westley and J.H. Woolley (PS, V.43) 237

Potential flow model for calculation of jet noise, A. P.O.A.L. Davies, J.C. Hardin, A.V.J. Edwards and J.P. Mason (PS, V. 43) 91
Pressure and velocity in a developing coaxial jet. L.F. Moon (AIAA J) 43
Primitive pressure-velocity code for the computation of strongly swirling flows. David G. Lilley (AIAA J) 749
Range increase of projectiles by heat and/or mass addition to base or external flow. Henry Eugene Hudgins, Jr. (PS, V.40) 495
Rear stagnation point location in a subsonic near-wake. R.A. Merz, R.H. Page, and C.E.G. Przirembel (JSR EN) 319
Relaxation solution for transonic flow over jet flapped airfoils, A. N.D. Malmuth and W.D. Murphy (AIAA J) 1250
Reynolds shear stress and heat flux balance in a turbulent round jet. R.A. Antonia and A. Prabhu (AIAA J) 221
Scanning laser Doppler velocimeter system simulation for sensing aircraft wake vortices. J.A.L. Thomson and J.C.S. Meng (JA) 605
Separation ahead of steps on swept wings. Louis G. Kaufman II and L. Michael Freeman (JA, EN) 1016
Shock interference peak heating measurements using phase change coatings. J. Wayne Keyes (JSR EN) 61
Simplified analysis of supersonic base flows including injection and combustion. J.A. Schetz, F.S. Billig, and S. Favin (AIAA J, SYN) 7
Simulation by vortex rings of the unsteady pressure field near a jet. C.H. Liu, L. Maestrello, and M.D. Gunzburger (PS, V. 43) 47
Slip model for hypersonic viscous flow. B.N. Srivastava, R.T. Davis, and M.J. Werle (AIAA J, TN) 257
Some measurements of spatial instability waves in a round jet. B.H.K. Lee (AIAA J) 348
Some recent developments in supersonic jet noise reduction. D.S. Dosanjh, K.K. Ahuja, M.R. Bassiouni, and P.K. Bhutiani (PS, V. 43) 353
Sound pressures of a choked jet oscillating in the spinning mode. R. Westley and J.H. Woolley (PS, V.43) 185
Stagnation region solutions of the full viscous shock-layer equations. B.N. Srivastava, M.J. Werle, and R.T. Davis (AIAA J, TN) 274
Structure of turbulent shear flows: A new look. Anatol Roshko (AIAA J, Dryden Lecture) 1349
Supersonic jet noise suppression with multitube nozzle/ejectors. J. Atvars, C.P. Wright, and C.D. Simcox (PS, V. 43) 329
Supersonic shock wave turbulent boundary-layer interactions. C. Herbert Law (AIAA J) 730
Supporting wire interference effects in supersonic near wakes of slender bodies. Dale M. Pitt and B.P. Selberg (JSR, EN) 123
Surface pressure measurements on a spinning wind tunnel model. Miles C. Miller (AIAA, SYN) 1669
Theoretical modeling of the base flow region of supersonic bodies: A steady-state method. J.T. Ohrenberger and E. Baum (PS, V. 40) 255
Three-dimensional solution of flows over wings with leading-edge vortex separation. James A. Weber, Guenter W. Brune, Forrester T. Johnson, Paul Lu, and Paul E. Rubbert (AIAA J) 519
Time development of the flow about an impulsively started cylinder. F.D, Deffenbaugh and F.J. Marshall (AIAA J) 908
Turbulence measurements in subsonic and supersonic axisymmetric jets in a parallel stream. Philip J. Morris (AIAA J) 1468
Turbulent mixing coefficients for compressible coaxial submerged and coflowing jets. L. Douglas Smoot (AIAA J) 1699
Use of a laser shadowgraph for jet noise diagnosis. Michael J. Rudd (PS, V. 46) 281
Variable density flows computed by a second-order closure description of turbulence. W.S. Lewellen, M.E. Teske, and Coleman duP. Donaldson (AIAA J) 382
Viscous effects on center-of-pressure location for sharp and blunted cones. Alton G. Keel Jr. (JSR, EN) 316
Vortex frequencies of bluff cylinders at low Reynolds numbers, The. Donald T. Knauss, James E.A. John, and Colin H. Marks (JH) 121
Wake cutting by a cascade of cambered blades. C.M. Ho and L.S.G. Kovasznay (PS, V. 44) 43
Wake-induced full-span instability of bundle conductor transmission lines. Victor J. Brzozowski and Roger J. Hawks (AIAA J) 179
Wind tunnel measurements of rolling moment in a swept-wing vortex wake. Z. El-Ramly, W.J. Rainbird, and D.G. Earl (JA) 962
Wind-tunnel tests and computer simulations of buoyant wing-tip vortices. R.C. Costen, R.E. Davidson, and G.T. Rogers (JA) 495

Multiphase Flows

Aerodynamic shattering of ice crystals in hypersonic flight. Girard A. Simons (AIAA J) 1563
Analytical model for a two-phase vacuum plume. Blaine E. Pearce (AIAA J, TN) 261
Condensation of water vapor in rarefaction waves: I. Homogeneous nucleation. J.P. Sislian and I.I. Glass (AIAA J) 1731
Confined jet mixing with nonparallel multiple-port injection. L. Douglas Smoot and Leslie A. Fort (AIAA J, SYN) 419
Debris shielding in regions of high edge velocity. David H. Smith (AIAA J, TN) 94
Drag coefficients of spheres in continuum and rarefied flows. Charles B. Henderson (AIAA J, SYN) 707
Drag reducing fumers. Austin W. Barrows (PS, V. 40) 1
Dust particle trajectories in aircraft radial turbines. W.B. Clevenger and W. Tabakoff (JA) 786
Flame-spreading and combustion in packed beds of propellant grains. Herman Krier, S. Rajan, and W.F. Van Tassell (AIAA J) 301
Free flight measurements of catastrophic water drop breakup. W.G. Reinecke and W.L. McKay (AIAA J, TN) 1635
Laminar boundary-layer analyses for parallel streams with interfacial mass transfer. C.K. Law (AIAA J, TN) 1497
Liquid drop acceleration and deformation. Girard A. Simons (AIAA J, TN) 278
Optical and physical requirements for fluid particles marking trailing vortices from aircraft. Lloyd H. Back (JA) 483
Production of diamonds from graphite using explosive-driven implosions. I.I. Glass and S.P. Sharma (AIAA J, TN) 402
Radiative transfer technique for studying natural convection in a porous medium, A. Lawrence A. Kennedy (PS, V. 49) 97
Turbulent mixing coefficients for compressible coaxial submerged and coflowing jets. L. Douglas Smoot (AIAA J) 1699

Nonsteady Aerodynamics

Acoustic motion induced by a diffusion flame. Maurice L. Rasmussen (PS, V. 43) 531
Aerodynamic characteristics of an axisymmetric body undergoing a uniform pitching motion. L.H. Smith and R.H. Nunn (JSR) 8
Aerodynamic characteristics of slender wings with sharp leading edges – A review. A.G. Parker (JA) 161
Aerodynamic measurements for an oscillating two-dimensional jet-flap airfoil. J.M. Simmons (AIAA J) 741
Aerodynamic sound generation due to the interaction of an unsteady wake with a rigid surface. C.A. Smith and K. Karamcheti (PS, V. 44) 233
Aerodynamic theory for a cascade of oscillating airfoils in subsonic flow. W.P. Jones and Jimmie A. Moore (AIAA J) 601
Airfoil response to an incompressible skewed gust of small spanwise wave-number. R.K. Amiet (AIAA J TN) 541
Analysis of unsteady transonic channel flow with shock waves. G.K. Richey and T.C. Adamson Jr. (AIAA J) 1054
Approximate unsteady thin-airfoil theory for subsonic flow. Nelson H. Kemp and Gregory Homitz (AIAA J) 1083
Artificial thickening of high subsonic Mach number boundary layers. L.J. Otten III and J.T. Van Kuren (AIAA J) 1528
Bernoulli enthalpy: A fundamental concept in the theory of sound. John E. Yeates and Guido Sandri (PS, V. 43) 65
Cascade with subsonic leading-edge locus. M.E. Goldstein (AIAA J, ERR) 704
Diagnostic calculations of airframe-radiated noise. R.E. Hayden, Y. Kadman, D.B. Bliss, and S.A. Africk (PS, V. 45) 179
Dynamic stall analysis in light of recent numerical and experimental results. Lars E. Ericsson and J. Peter Reding, (JA) 248
Dynamic stall experiments on oscillating airfoils. W.J. McCroskey, L.W. Carr, and K.W. McAlister (AIAA J) 57
Effect of geometry on open cavity flow-induced pressure oscillations. M.E. Frane and D.L. Carr (PS, V. 45) 297
Effect of sting oscillations on the measurement of dynamic stability derivatives. Glen E. Burt and James C. Uselton (JA) 210
Effects of friction and heat conduction on sound propagation in ducts. P. Huerre and K. Karamcheti (PS, V. 44) 507
Effects of transducer flushness on fluctuating surface pressure measurements. Richard D. Hanly (PS. V. 46) 291
Experiment on the lift of an accelerated airfoil, An. G.T. Minkkinen, T.A. Wilson, and G.S. Beavers (AIAA J TN) 687
Flow-induced pressure fluctuations in cavities and concepts for their suppression. Hanno H. Heller and Donald B. Bliss (PS, V. 45) 281
Fluid-mechanical model of the acoustic impedance of small orifices. A.S. Hersh and T. Rogers (PS, V. 44) 307
Force and pressure measurements on an airfoil oscillating through stall. A.G. Parker (JA) 823
High frequency thin-airfoil theory for subsonic flow. Roy K. Amiet (AIAA J) 1076
Induced side forces at high angles of attack. Andrew B. Wardlaw Jr. and Alfred M. Morrison (JSR) 589
Interaction of an oscillating control surface with an unsteady separated region. James D. Lang and M.S. Francis (JA) 687
Measured pressure distributions on an airfoil with oscillating jet flap. J.M. Simmons (AIAA J) 1297
Model and full-scale test results relating to fan noise in-flight effects. J.P. Roundhill and L.A. Schaut (PS, V. 44) 181
Modified thin shock layer method for supersonic flow past an oscillating cone. W.H. Hui and G.E. Mahood (JSR) 481
Noncompact source effect on the prediction of tone noise from a fan rotor. S. Kaji (PS, V. 44) 55
Numerical boundary conditions for viscous flow problems. J.C. Wu (AIAA J) 1042
Numerical calculations of unsteady transonic potential flow over helicopter rotor blades. Francis X. Caradonna and Morris P. Isom (AIAA J) 482
Passive flutter suppression. Charles W. Ingram and Walter J. Szwarc (JA, EN) 542

Perturbation method for transonic flows about oscillating airfoils. R.M. Traci, E.D. Albano, and J.L. Farr Jr. (AIAA J) 1258
Potential flow about impulsively started rotors. J. Michael Summa (JA, EN) 317
Propagation of weak disturbances in a vibrationally relaxing gas. Ryuji Ishii (AIAA J) 1578
Recent developments in predicting unsteady airloads caused by control surface motions. W.S. Rowe, J.D. Sebastian, and M.C. Redman (JA) 955
Reply by authors to P.R. Payne. K.R. Reddy and B.W. Roberts (JA, ERR) 64
Sound generated by a single cambered blade in wake cutting. Ho, Chih-Ming and Leslie S.G. Kovasznay (AIAA J) 763
"Spilled" leading-edge vortex effects on dynamic stall characteristics. Lars E. Ericsson and J. Peter Reding (JA, EN) 313
Stability derivatives for bodies of revolution at subsonic speeds. D.D. Liu, M.F. Platzer, and S.Y. Ruo (AIAA J TN) 247
Study of subsonic fan noise sources, A. Donald B. Hanson (PS, R. 44) 209
Supersonic interference flow effects on finned bodies. Lars E. Ericsson (AIAA J, TC) 1342
Theoretical and experimental studies of discrete-tone rotor-stator interaction noise. G.F. Homicz, G.R. Ludwig, and J.A. Lordi (PS, V. 44) 3
Time development of the flow about an impulsively started cylinder. F.D. Deffenbaugh and F.J. Marshall (AIAA J) 908
Transonic flow about a thick circular-arc airfoil. John B. McDevitt, Lionel L. Levy Jr., and George S. Deiwert (AIAA J) 606
Turbine noise generation, reduction, and prediction. S.B. Kazin and R.K. Matta (PS, V. 44) 109
Unsteady hypersonic flow over delta wings with detached shock waves. W.H. Hui and H.T. Hemdan (AIAA J) 505; (ERR) 1663
Unsteady local linearization solution for pulsating bodies at $M_\infty = 1$. Stephen S. Stahara and John R. Spreiter (AIAA J, TN) 990
Unsteady local linearization solution for pitching bodies of revolution at $M_\infty = 1$: Stability derivative analysis. Stephen S. Stahara and John R. Spreiter (AIAA J) 1402
Unsteady motion of airfoils with boundary-layer separation. W.R. Sears (AIAA J) 216
Unsteady turbulent boundary layers and separation. D.P. Telionis and D. Th. Tsahalis (AIAA J) 468
Unsteady two-dimensional flow using Dowell's method. Paul H. Park (AIAA J, SYN) 1345
Upwind second-order difference schemes and applications in aerodynamic flows. R.F. Warming and Richard M. Beam (AIAA J) 1241
Wake cutting by a cascade of cambered blades. C.M. Ho and L.S.G. Kovasznay (PS, V. 44) 43
Wake effects in finite amplitude nonsteady motion of slender profiles. M.G. Chopra (AIAA J, TN) 1145

Nozzle and Channel Flow

Analysis of unsteady transonic channel flow with shock waves. G.K. Richey and T.C. Adamson Jr. (AIAA J) 1054
Comparison of conventional and force-based distortion index measurements. M. Sajben, C.P. Chen, and J.C. Kroutil (AIAA J, TN) 1500
Compressible laminar boundary layers with large acceleration and cooling. Lloyd H. Back and Robert F. Cuffel (AIAA J, TN) 968
Computation of two-dimensional, viscous nozzle flow. Michael C. Cline (AIAA J, SYN) 295
Condensation of water vapor in rarefaction waves: I. homogeneous nucleation. J.P. Sislian and I.I. Glass (AIAA J) 1731
Conical diffuser flows with natural and screen-simulated inlet conditions. M. Sajben, J.C. Kroutil, and A.V. Sedrick (AIAA J) 1723
Correction factor for heat flux in an expansion nozzle. J. Reinkenhof and R. Schmucker (JSR, EN) 63
Correlation of freestream pressure disturbances in supersonic wind tunnels. P.C. Stainback and R.A. Rainey (AIAA J, TN) 286
Correlation of vibrational-nonequilibrium flow in expansion nozzles. Kenichi Nanbu (AIAA J, TN) 272
Cylindrical diffuser performance using a truncated plug nozzle. Fred L. Galanga and Thomas J. Mueller (JSR, EN) 254
Determination of stagnation chamber temperature in high-enthalpy nozzle flows. Nimai Kuma Mitra and Martin Fiebig (AIAA J, TN) 406
Drag coefficients of spheres in continuum and rarefied flows. Charles B. Henderson (AIAA J, SYN) 707
Effect of finite-size probe volume upon laser Doppler anemometer measurements. Michael E. Karpuk and William G. Tiederman Jr. (AIAA J) 1099
Effects of friction and heat conduction on sound propagation in ducts. P. Huerre and K. Karamcheti (PS, V. 44) 507
Ejector performance at high temperatures and pressures. Brian Quinn (JA) 948
Finite-difference performance analysis of jet pumps. David R. Croft and David G. Lilley (AIAA J, SYN) 1347
Flow and heat transfer measurements in a pseudo-shock region with surface cooling. Robert F. Cuffel and Lloyd H. Back (AIAA J) 1716
Generalized comparison between optimized and conventional diffusers. Shuang Huo (JA, EN) 541
High Mach number turbulent boundary-layer study, A.E. Backx and B.E. Richards (AIAA J, SYN) 1159
Incompressible unsteady flow through a tube of variable cross-section. D.P. Flemming (AIAA J, TN) 253
Measurement of detonation propulsion in helium and performance calculations. K. Kim, L.H. Back, and G. Varsi (AIAA J) 310
Numerical analysis of a combustion-driven gasdynamic laser. M. Brunne, J. Milewski, J. Stanco, and A. Zielinski (AIAA J) 352
Optimum performance for a single-stage gaseous ejector. George Emanuel (AIAA J) 1292
Pressure and velocity in a developing coaxial jet. L.F. Moon (AIAA J) 43
Pressure recovery in rectangular constant area supersonic diffusers. Peter E. Merkli (AIAA J) 168
Real gas effect in a laser heated thruster. Peter K. Wu (AIAA J, TN) 1766
Shock fitting method for complicated two-dimensional supersonic flows. Manuel D. Salas (AIAA J) 583
Shock wave/turbulent boundary-layer interactions with and without surface cooling. Lloyd H. Back and Robert F. Cuffel (AIAA J) 526
Shrouds for aerogenerators. O. Igra (AIAA J, TN) 1481
Stability of laser heated flows. P.K.S. Wu and A.N. Pirri (AIAA J, TN) 390
Study of the boundary layers in chemical laser nozzles. Richard J. Driscoll (AIAA J) 1571
Survey of methods for exhaust-nozzle flow analysis. E.F. Brown and G.L. Hamilton (JA, SA) 4

Plasma Dynamics and MHD

Analysis of nuclear induced plasmas. Jerry E. Deese and H.A. Hassan (AIAA J) 1589
Boundary-layer profile measurements in a combustion driven MHD generator. John W. Daily, C.H. Kruger, S.A. Selft, and R.H. Eustis (AIAA J) 997
Boundary-layer separation from the electrode wall of an MHD generator. C.C.P. Pian and W.F.H. Merck (AIAA J) 1585
Conical electrostatic probe response in a weakly ionized gas flow. C.F. Bruce and L. Talbot (AIAA J) 77
Dynamic characteristics of a 30-cm mercury ion thruster. J.S. Serafini, M.A. Mantenieks, and V.K. Rawlin (JSR) 579
Entrance flow in a MHD channel with Hall and ion slip currents. M.L. Mittal, G.H. Masapati, and B. Nageswara Rao (AIAA J, TN) 1768
Experiment on MHD generator with a large-scale superconducting magnet (ETL Mark V). S. Ikeda, T. Masuda, Y. Kusaka, T. Honda, and Y. Aiyama (AIAA J, TN) 1655
Flowfield characteristics and performance limitations of quasi-steady magnetoplasmadynamic accelerators. MJ. Boyle, K.E. Clark, and R.G. Jahn (AIAA J) 955
Force-free field analysis of Skylab/Apollo telescope mount S-056 experiment. R.X. Meyer, E.B. Mayfield, J.H. Underwood, D.L. McKenzie, J.E. Milligan, A.C. de Loach, and R.B. Hoover (PS, V. 48) 161
High-power density experiments in a shock-tunnel MHD generator. A. Veefkind, J.W.M.A. Houben, J.H. Blom, and L.H.T. Rietjens (AIAA J) 1118
Measurements of plasma fluctuations in an 8-cm mercury ion thruster. John S. Serafini and Shigeo Nakanishi (JSR) 692
MHD propulsion by absorption of laser radiation. L.N. Myrabo (JSR) 466
Nonequilibrium behavior of current carrying supersonic rare gas flow. H. Frey (AIAA J) 799
Nonlinear transient neutralization theory of ion beams with dissipation. H.E. Wilhelm (JSR) 362
Numerical approach to ionized nonequilibrium boundary layers, A. Hiroki Honma and Hiroaki Komuro (AIAA J, TN) 981
Performance theory of diagonal conducting wall MHD generators. Y.C.L. Wu (AIAA J) 1362
Power calculations for high-flow CO electric discharge laser systems. Neill S. Smith and H.A. Hassan (AIAA J) 374
Slow ions in plasma wind tunnels. W.A. Oran, U. Samir, and N.H. Stone (AIAA J, TN) 1141
Spacecraft potential control with electron emitters. R. Grard, A. Gonfalone, and A. Pedersen (PS, V. 47) 159
Study of traveling conduction wave accelerator. Bruce W. Boreham (AIAA J) 85
Temperature measurements in rail electrode cross-flow arcs. D.M. Benenson and J.J. Nowobilski (AIAA J, TN) 408
Theory and experiment of low transitions in CO discharge lasers. B. Sidney, Roy M. McInville, and H.A. Hassan (AIAA J) 923
Theory of the spherically symmetric photoelectron sheath and comparison with the ATS-6 observation of a potential barrier. E.C. Whipple, Jr. (PS, R. 47) 135
Turbulent boundary layers as affected by weak magneto-hydrodynamic forces. R.E. Sayles and R.C. Lessmann (AIAA J, TN) 1123

Radiatively Coupled Flows and Heat Transfer

Anisotropic radiatively coupled wedge flow. James B. Elgin and Judson R. Baron (AIAA J, TN) 1492
Arc heater performance on hydrogen, helium, or air. J.H. Painter and J.F. Shaeffer (AIAA J, SYN) 1161
Radiation measurements behind 8-12km/sec shock waves in air and a $CO_2 + N_2$ mixture. V.A. Volkov, V.V. Zhurin, A.B. Karasev, and B.K. Tkachenko (AIAA J) 371
Radiative cooling of a hydrogen plasma in a shock tube. George H. Stickford Jr. (AIAA J) 421
Radiative heating about outer planet entry probes. Kenneth Sutton (JSR) 294
Radiative heating environments for Jovian entry conditions. William E. Nicolet (PS, V. 49) 231
Radiative viscous-shock-layer solutions with coupled ablation injection. James N. Moss (AIAA J) 1311
Real gas effect in a laser heated thruster. Peter K. Wu (AIAA J, TN) 1766
Relaxation distance and equilibrium electron density measurements in hydrogen-helium plasmas. Floyd R. Livingston and P.T.Y. Poon (AIAA J, TN) 1335
Similarity solution of the boundary-layer equations for laser heated flows. Peter K. Wu (AIAA J, TN) 1659
Transonic thermal blooming due to an intense laser beam. E. Fenton Carey and Allen E. Fuhs (JA) 974
Viscous-shock-layer solutions with radiation and ablation injection for Jovian entry. James N. Moss, E. Clay Anderson, and Charles A. Bolz Jr. (PS, V. 49) 251

Rarefied Flows

Computational aspects on nonsimilar solutions of the rarefied leading edge on a cone. Wesley L. Harris and Santosh Kumar (AIAA J, SYN) 293
Effects of skimmer and endwall temperature of condensed molecular beams. A.B. Bailey, R. Dawbarn, and M.R. Busby (AIAA J, TN) 91
Experimental study of velocities in a free jet in a rarefied atmosphere. G. Dupeyrat and M. Giat (AIAA J) 1706
Mathematical description of gas-surface interactions based on reciprocity, A. Max Kinslow (AIAA J) 1358
Slow ions in plasma wind tunnels. W.A. Oran, U. Samir, and N.H. Stone (AIAA J, TN) 1141
Spacecraft neutral self-contamination by molecular outgassing. R.L. Harvey (JSR) 301
Supersonic gas sampling error in atmospheric ozone depletion studies. T.B. Guy (AIAA J) 1464

Reactive Flows

Absolute fluorine atom detection by gasification of boron nitride. David A. Winborne and Paul C. Nordine (AIAA J, TN) 1488
Acoustic motion induced by a diffusion flame. Maurice L. Rasmussen (PS, V. 43) 531
Afterburning predictions for metal-modified propellant motor exhausts. D.E. Jensen and B.C. Webb (AIAA J) 947
Correlation for gasdynamic laser gain. James I. McManus and John D. Anderson, Jr. (AIAA J, TN) 1770
Correlation of vibrational-nonequilibrium flow in expansion nozzles. Kenichi Nanbu (AIAA J, TN) 272
Diffusion-limited chemical reactions in a turbulent shear layer. Irwin E. Alber and Richard G. Batt (AIAA J) 70
Efficient computation of "stiff" chemically reacting flow in turbulent free jets. P.D. Thomas and K.H. Wilson (AIAA J) 629
Flame-spreading and combustion in packed beds of propellant grains. Herman Krier, S. Rajan, and W.F. Van Tassell (AIAA J) 301
Further experimental results on the structure and acoustics of turbulent jet flames. R.N. Kumar (PS, V. 43) 483
Gas turbine combustor stabilization by heat recirculation. A.J. Ganji, J. Short, M.C. Branch, and A.K. Oppenheim (AIAA J) 809
Heterogeneous fluorine atom recombination/reaction on several materials of construction. Paul C. Nordine and Jane D. LeGrange (AIAA J) 644
Medium diagnostics for a 10-kW cw HF chemical laser. Munson A. Kwok, Robert R. Giedt, and Robert L. Varwig (AIAA J) 1318
Modeling of three-dimensional mixing and reacting ducted flows. W.L. Rushmore and S.W. Zelazny (AIAA J, SYN) 1511
Plume separated region as a flameholder. James Stark Draper (AIAA J) 358
Primitive pressure-velocity code for the computation of strongly swirling flows. David G. Lilley (AIAA J) 749
Propagation of weak disturbances in a vibrationally relaxing gas. Ryuji Ishii (AIAA J) 1578
Simplified model of a continuous wave diffusion-type chemical laser-an extension. Harold Mirels (AIAA J) 930
Simplified modeling of multiquantum deactivation reactions. George Emanuel (AIAA J, TN) 1124
Solution technique for equilibrium chemistry of hydrogen-oxygen sytems. David F. Dyer and Glennon Maples (AIAA J, TN) 1652
Some comments on the Dirac-delta approximations for chemical reactions. K. Annamalai and P. Durbetaki (AIAA J, TN) 1774
Split space-marching finite-volume method for chemically reacting supersonic flow. Arthur W. Rizzi and Harry E. Bailey (AIAA J) 621
Viscous shock-layer flows for the space shuttle windward plane of symmetry. E. Wade Miner and Clark H. Lewis (AIAA J) 64

Shock Waves and Detonations

Asymmetric shock-wave oscillations on spiked bodies of revolution. A. Demetriades and A.T. Hopkins (JSR, EN) 703
Combined three-dimensional finite-difference and integral method. Alfred C. Buckingham and Naury K. Birnbaum (AIAA J, SYN) 291
Computer model of the lightning–thunder process, with audible demonstration. H.S. Ribner, F. Lam, K.A. Leung, D.Kurtz, and N.D. Ellis (PS, V. 46) 77
Condensation of water vapor in rarefaction waves: I. Homogeneous nucleation. J.P. Sislian and I.I. Glass (AIAA J) 1731
Details of a shock-separated turbulent boundary layer at a compression corner. Gary S. Settles, Irwin E. Vas, and Seymour M. Bogdonoff (AIAA J) 1709
Development of dynamic discharge arc driver with computer-aided circuit simulation. Robert E. Dannenberg and Petar I. Slapnicar (AIAA J) 1183
Flow and heat transfer measurements in a pseudo-shock region with surface cooling. Robert F. Cuffel and Lloyd H. Back (AIAA J) 1716
Impingement of a two-dimensional supersonic jet upon a normal ground surface. D.J. Pollard and L.J.S. Bradbury (AIAA J) 1095
Inelastic response of ring-stiffened cylindrical shells to external pressure shock waves. L.H.N. Lee and J.T. Horng (AIAA J) 327
Interior ballistics of a two-stage light gas gun using velocity interferometry. D.E. Munson and R.P. May (AIAA J) 235
Measured effects of turbulence on the rise time of a weak shock. P.E. Tubb (PS, V. 46) 17
Measurement of detonation propulsion in helium and performance calculations. K. Kim, L.H. Back, and G. Varsi (AIAA J) 310
Method of integral relations and triple-point location in impinging jets. G.T. Kalghatgi and B.L. Hunt (JSR, EN) 763
Numerical solutions of the upper critical depth problem. Robert M. Hall and M. Holt (AIAA J) 191
On the structure of three-dimensional shock-induced separated flow regions. R.H. Korkegi (AIAA J) 597
Production of diamonds from graphite using explosive-driven implosions. I.I. Glass and S.P. Sharma (AIAA J, TN) 402
Radiation measurements behind 8-12km/sec shock waves in air and a $CO_2 + N_2$ mixture. V.A. Volkov, V.V. Zhurin, A.B. Karasev, and B.K. Tkachenko (AIAA J) 371
Relaxation distance and equilibrium electron density measurements in hydrogen-helium plasmas. Floyd R. Livingston and P.T.Y. Poon (AIAA J, TN) 1335
Shock fitting method for complicated two-dimensional supersonic flows. Manuel D. Salas (AIAA J) 583
Shock wave/turbulent boundary-layer interactions with and without surface cooling. Lloyd H. Back and Robert F. Cuffel (AIAA J) 526

Subsonic and Transonic Flow

Analysis of leading-edge separation bubbles on airfoils. Peter Crimi and Barry L. Reeves (AIAA J) 1548
Analysis of unsteady transonic channel flow with shock waves. G.K. Richey and T.C. Adamson Jr. (AIAA J) 1054
Analytical theory of transonic normal shock-turbulent boundary-layer interaction. G.R. Inger and W.H. Mason (AIAA J) 1266
Application of the measurement of shock detachment distance at low supersonic speeds. R.F. Starr and M.O. Varner (AIAA J, TN) 535
Approximate unsteady thin-airfoil theory for subsonic flow. Nelson H. Kemp and Gregory Homicz (AIAA J) 1083
Artificial thickening of high subsonic Mach number boundary layers. L.J. Otten III and J.T. Van Kuren (AIAA J) 1528
Calculation of the turning angle of two-dimensional incompressible cascade flow. Wolfgang Geller (AIAA J, SYN) 297
Circumspect exploration of multidimensional imbedded shocks. Gino Moretti, (AIAA J) 894
Comment on "Extended integral equation method for transonic flows." Helge Norstrud (TC) 826
——Reply by author to H. Norstrud. D.Nixon (AIAA J, TC) 828
Comment on "Rapid finite-difference computation of subsonic and slightly supercritical aerodynamic flows." Robert P. Eddy (AIAA J, TC) 1149
——Reply by authors to R.P. Eddy. E.Dale Martin and Harvard Lomax (AIAA J, TC) 1152
Comparison of conventional and force-based distortion index measurements. M. Sajben, C.P. Chen, and J.C. Kroutil (AIAA J, TN) 1500
Comparison of Reynolds stress diagnostics by fixed and rotating probes. F.J. Pierce and C.I. Ezekwe (AIAA J, TN) 412

Computation of two-dimensional, viscous nozzle flow. Michael C. Cline (AIAA J, SYN) 295
Development of minimum-correction wind tunnels. Samuel Bernstein and Robert G. Joppa (JA) 243
Discretized simulation of vortex sheet evolution with buoyancy and surface tension effects. Robert G. Zalosh (AIAA J) 1517
Discussion of transonic base flows in the presence of a propulsive jet, A. T.H. Moulden, J. M. Wu, and D.J. Spring (PS, V. 40) 425
Effects of transducer flushness on fluctuating surface pressure measurements. Richard D. Hanly (PS, V. 46) 291
Experimental and analytical investigation of axisymmetric diffusers, An. L.A. Povinelli (AIAA J) 1280
Fast semidirect method for computing transonic aerodynamic flows, A. E. Dale Martin (AIAA J) 914 (ERR) 1664
Generalized comparison between optimized and conventional diffusers. Shuang Huo (JA, EN) 541
Hemisphere-cylinder in transonic flow, $M_\infty = 0.7 \simeq 1.0$. Tsuying Hsieh (AIAA J, ERR) 1343
Influence of nonconservative differencing on transonic streamline shapes. Perry A. Newman and Jerry C. South Jr. (AIAA J, TN) 1148
Inverse method for the design of multielement high-lift systems. T.D. Beatty and J.C. Narramore (JA) 393
Investigation of slot cooling at high subsonic speeds. A. Ferri, A. Mahrer, and J.N. Hefner (AIAA J) 880
Inviscid analysis of transonic, slatted airfoils. D.A. Caughey (JA) 29
Leading-edge-vortex augmentation in compressible flow. R.G. Bradley, P.D. Whitten, and W.O. Wray (JA) 238
Modern look at conformal mapping including multiply connected regions, A. David C. Ives (AIAA J) 1006
New smoke generator for flow visualization in low speed wind tunnels. A.G. Parker and J.C. Brusse (JA, EN) 57
Numerical calculation of unsteady transonic potential flow over helicopter rotor blades. Francis X. Caradonna and Morris P. Isom (AIAA J) 482
Numerical investigation of leading-edge vortex for low-aspect ratio thin wings. Colmar Rehbach (AIAA J, TN) 253
Observations on the drag of conical bodies at transonic speeds. R.F. Starr and M.O. Varner (JSR) 643
Perturbation method for transonic flows about oscillating airfoils. R.M. Traci, E.D. Albano, and J.L. Farr Jr. (AIAA J) 1258
Prediction of vortex flow characteristics of wings at subsonic and supersonic speeds. John E. Lamar (JA) 490
Rear stagnation point location in a subsonic near-wake. R.A. Merz, R.H. Page, and C.E.G. Przirembel (JSR, EN) 319
Re-examination of compliant wall experiments in air with water substrates. Jerry N. Hefner and Leonard M. Weinstein (JSR, EN) 502
Relaxation solution for transonic flow over jet flapped airfoils, A. N.D. Malmuth and W.D. Murphy (AIAA J) 1250
Shock detachment distance at near sonic speeds. R.F. Starr, A.B. Bailey, and M. O. Varner (AIAA J, TN) 537
Simple waves and the transonic similarity parameter. L. Sirovich and C. Huo (AIAA J. TN) 1125
Simulation by vortex rings of the unsteady pressure field near a jet. C.H. Liu, L. Maestrello, and M.D. Gunzburger (PS, V. 43) 47
Some aspects of fan noise suppression using high Mach number inlets. S.D. Savkar and S.B. Kazin (JA, ERR) 64
Sphere drag at transonic speeds and high Reynolds numbers. A.B. Bailey and R.F. Starr (AIAA J, TN) 1631
Surface pressure measurements on a spinning wind tunnel model. Miles C. Miller (AIAA, SYN) 1669
Survey of methods for exhaust-nozzle flow analysis, E.F. Brown and G.L. Hamilton (JA, SA) 4
Symmetrical singularity model for lifting potential flow analysis. Brian Maskew and Frank A. Woodward (JA, EN) 733
Three-dimensional solution of flows over wings with leading-edge vortex separation. James A. Weber, Guenter W. Brune, Forrester T. Johnson, Paul Lu, and Paul E. Rubbert (AIAA J) 519
Transonic airfoil analysis and design using Cartesian coordinates. Leland A. Carlson (JA) 349
Transonic flow about a thick circular-arc airfoil. John B. McDevitt, Lionel L. Levy Jr., and George S. Deiwert (AIAA J) 606
Transonic flowfield past two-dimensional airfoils between porous wind-tunnel walls. J.J. Kacprzynski (AIAA J, TN) 533
Transonic thermal blooming due to an intense laser beam. E. Fenton Carey and Allen E. Fuhs (JA) 974
Unsteady local linearization solution for pulsating bodies at $M_\infty = 1$. Stephen S. Stahara and John R. Spreiter (AIAA J, TN) 990
Unsteady local linearization solution for pitching bodies of revolution at $M_\infty = 1$: Stability derivative analysis. Stephen S. Stahara and John R. Spreiter (AIAA J) 1402
Unsteady two-dimensional flow using Dowell's method. Paul H. Park (AIAA J, SYN) 1345
Upwind second-order difference schemes and applications in aerodynamic flows. R.F. Warming and Richard M. Beam (AIAA J) 1241
Water fog generation system for subsonic flow visualization. R.L. Bisplinghoff, J.B. Coffin, and C.W. Haldeman (AIAA J, TN) 1133

Supersonic and Hypersonic Flow

Aft-body drag reduction by combined boat-tailing and base blowing at M = 3. Robert H. Korkegi and L. Michael Freeman (AIAA J, TN) 1143
Anisotropic radiatively coupled wedge flow. James B. Elgin and Judson R. Baron (AIAA J, TN) 1492
Application of the measurement of shock detachment distance at low supersonic speeds. R.F. Starr and M.O. Varner (AIAA J, TN) 535
Asymmetric shock-wave oscillations on spiked bodies of revolution. A. Demetriades and A.T. Hopkins (JSR, EN) 703
Base pressure calculations with external burning. William Smithey and Allen E. Fuhs (PS, V. 40) 407
Cascade with subsonic leading-edge locus. M.E. Goldstein (AIAA J, ERR) 704
Combined three-dimensional finite-difference and integral method. Alfred C. Buckingham and Naury K. Birnbaum (AIAA J, SYN) 291
Comparison of a two-dimensional shock impingement computation with experiment. J.C. Tannehill, T.L. Holst, J.V. Rakich, and J.W. Keyes (AIAA J, TN) 539
Component analysis and synthesis for fully separated flows with special consideration of base drag reduction by combustion. H.H. Korst (PS, V. 40) 211
Computation of two-dimensional, viscous nozzle flow. Michael C. Cline (AIAA J, SYN) 295
Computational aspects of nonsimilar solutions of the rarefied leading edge on a cone. Wesley L. Harris and Santosh Kumar (AIAA J, SYN) 293
Correlation of freestream pressure disturbances in supersonic wind tunnels. P.C. Stainback and R.A. Rainey (AIAA J, TN) 286
Correlation of vibrational-nonequilibrium flow in expansion nozzles. Kenichi Nanbu (AIAA J, TN) 272
Details of a shock-separated turbulent boundary layer at a compression corner. Gary S. Settles, Irwin E. Vas, and Seymour M. Bogdonoff (AIAA J) 1709
Detection of boundary-layer transition with a laser beam. A.J. Laderman and A. Demetriades (AIAA J, TN) 102
Drag-reducing fumer as a tool in ammunition design. Richard Kwatnoski (PS, V. 40) 487
Dynamic response of an acoustically coupled panel, The. D.H.Y. Yen, L. Maestrello, and S.L. Padula (PS, V. 45) 335
Effect of geometry modifications on effectiveness of slot injection in hypersonic flow. Jerry N. Hefner (AIAA J, TN) 817
Effects of skimmer and endwall temperature of condensed molecular beams. A.B. Bailey, R. Dawbarn, and M.R. Busby (AIAA J, TN) 91
Flare-induced interaction lengths in supersonic, turbulent boundary layers. A. Roshko and G.J. Thomke (AIAA J) 873
Flutter of thermally buckled finite element panels. T.Y. Yang and A.D. Han (AIAA J, TN) 975
Gas generators for base drag reduction (fumers). Theresa A. Elmendorf and Robert A. Trifiletti (PS, V. 40) 471
High Mach number turbulent boundary-layer study, A. E. Backx and B.E. Richards (AIAA J, SYN) 1159
Hypersonic viscous-inviscid interaction with vectored surface mass transfer. G.R. Inger and T.F. Swean (AIAA J) 589
Hypersonic viscous static stability of a sharp 5-deg cone at incidence. J.C. Adams Jr. and B.J. Griffith (AIAA J) 1062
Incipient separation of a supersonic turbulent boundary layer at high Reynolds numbers. Gary S. Settles, Seymour M. Bogdonoff, and Irwin E. Vas (AIAA J) 50
Integrated potential formulation of unsteady supersonic aerodynamics for interacting wings. Kari Appa and W.P. Jones (JA) 695
Inviscid supersonic/hypersonic body flowfield and aerodynamics from shock-capturing technique calculations. D.S. Chaussee, P. Kutler, and T. Holtz (JSR) 325
Ionization nonequilibrium heating during outer planetary entries. Lewis P. Leibowitz and Ta-Jin Kuo (AIAA J) 1324
Leeward heat transfer experiments on the Shuttle Orbiter fuselage. J.P. Lamb and G.K. Mruk (JSR, EN) 701
Magnus forces on spinning supersonic cones—Part I: the boundary layer. H.A. Dwyer and B.R. Sanders (AIAA J) 498
Magnus forces on spinning supersonic cones. Part II: Inviscid flow. B.R. Sanders and H.A. Dwyer (AIAA J) 576
Medium diagnostics for a 10-kW cw HF chemical laser. Munson A. Kwok, Robert R. Giedt, and Robert L. Varwig (AIAA J) 1318
Modified thin shock layer method for supersonic flow past an oscillating cone. W.H. Hui and G.E. Mahood (JSR) 481
New measurements of turbulent shear stresses in hypersonic boundary layers. A.J. Laderman (AIAA J) 1286
Numerical computation of two-dimensional viscous blunt body flows with an impinging shock. J.C. Tannehill, T.L. Holst, and J.V. Rakich (AIAA J) 204
Numerical simulation of shock wave—turbulent boundary-layer interaction. J.S. Shang, W.L. Hankey, Jr., and C. Herbert Law (AIAA J) 1451
Numerical solutions of supersonic and hypersonic laminar compression corner flows. C.M. Hung and R.W. MacCormack (AIAA J) 475

On the structure of three-dimensional shock-induced separated flow regions. R.H. Korkegi (AIAA J)597
Predicted radiation trails from small artificial meteors. T. Dwayne McCay and Kenneth E. Harwell (PS, V. 49) 213
Pressure recovery in rectangular constant area supersonic diffusers. Peter E. Merkli (AIAA J) 168
Relaxation distance and equilibrium electron density measurements in hydrogen-helium plasmas. Floyd R. Livingston and P.T.Y. Poon (AIAA J, TN) 1335
Roughness induced transition criteria for space shuttle-type vehicles. E. Leon Morrisette (JSR, EN) 118
Separation ahead of steps on swept wings. Louis G. Kaufman II and L. Michael Freeman (JA, EN) 1016
Shock detachment distance at near sonic speeds. R.F. Starr, A.B. Bailey, and M.O. Varner (AIAA J, TN) 537
Shock fitting method for complicated two-dimensional supersonic flows. Manuel D. Salas (AIAA J) 583
Shock interference peak heating measurements using phase change coatings. J. Wayne Keyes (JSR, EN) 61
Similar boundary-layer analysis for lee-surface heating on yawed blunted cone. Shigeaki Nomura (AIAA J, SYN) 1509
Slip model for hypersonic viscous flow. B.N. Srivastava, R.T. Davis, and M.J. Werle (AIAA J, TN) 257
Space-time correlation structure of hypersonic boundary layers. Anthony Demetriades and A.J. Laderman (AIAA J TN) 256
Sphere drag at transonic speeds and high Reynolds numbers. A.B. Bailey and R.F. Starr (AIAA J, TN) 1631
Split space-marching finite-volume method for chemically reacting supersonic flow. Arthur W. Rizzi and Harry E. Bailey (AIAA J) 621
Stagnation region heat transfer in hypersonic particle environments. Duane T. Hove and Edward Taylor (AIAA J, TN) 1486
Study of traveling conduction wave accelerator. Bruce W. Boreham (AIAA J) 85
Supersonic gas sampling error in atmospheric ozone depletion studies. T.B. Guy (AIAA J) 1464
Supersonic interference flow effects on finned bodies. Lars E. Ericsson (AIAA J, TC) 1342
Turbulence measurements in hypersonic shock-wave boundary-layer interaction flows. V. Mikulla and C.C. Horstman (AIAA J) 568
Unsteady hypersonic flow over delta wings with detached shock waves. W.H. Hui and H.T. Hemdan (AIAA J) 505; (ERR) 1663
Viscous effects on center-of-pressure location for sharp and blunted cones. Alton G. Keel Jr. (JSR, EN) 316
Viscous shock-layer flows for the space shuttle windward plane of symmetry. E. Wade Miner and Clark H. Lewis (AIAA J) 64
Wall-wake velocity profile for compressible nonadiabatic flows. Chen-Chih Sun and Morris E. Childs (AIAA J, TN) 820

Viscous Nonboundary-Layer Flows

Correlation of turbulent trailing vortex decay data. James D. Iversen (JA) 338
Effects of the initial boundary-layer state on turbulent jet mixing. William G. Hill Jr., Richard C. Jenkins, and Barry L. Gilbert (AIAA J, SYN) 1513
Finite-difference performance analysis of jet pumps. David R. Croft and David G. Lilley (AIAA J, SYN) 1347
Navier-Stokes solutions for chemical laser flows: cold flows. Ajay P. Kothari and John D. Anderson Jr. (AIAA J, TN) 702
Navier-Stokes solutions of the flowfield in an internal combustion engine. Michael D. Griffin, John D. Anderson, Jr., and R. Diwaker (AIAA J, SYN) 1665
Numerical boundary conditions for viscous flow problems. J.C. Wu (AIAA J) 1042
Numerical methods for separated flow solutions around a circular cylinder. C.L. Lin, D.W. Pepper and S.C. Lee (AIAA J) 900
Slip model for hypersonic viscous flow. B.N. Srivastava, R.T. Davis, and M.J. Werle (AIAA J, TN) 257
Stagnation region solutions of the full viscous shock-layer equations. B.N. Srivastava, M.J. Werle, and R.T. Davis (AIAA J, TN) 274
Viscous flow around close-fitting spherical pistons in right circular cylinders. G. David Huffman (AIAA J, TN) 96
Viscous shock-layer flows for the space shuttle windward plane of symmetry. E. Wade Miner and Clark H. Lewis (AIAA J) 64

Wave Motion and Sloshing

Consistent mass matrix in fluid sloshing problems. Grant P. Steven (AIAA J, TN) 245
Effects of friction and heat conduction on sound propagation inducts. P. Huerre and K. Karamcheti (PS, V. 44) 507
Electrohydrodynamically coupled minimum film boiling in dielectric liquids. T.B. Jones and R.C. Schaeffer (AIAA J) 1759
Fluid-structure finite element vibrational analysis. L. Kiefling and G.C. Feng (AIAA J) 199
Numerical solutions of the upper critical depth problem. Robert M. Hall and M. Holt (AIAA J) 191
Simplfied analysis of a plunger-type wavemaker performance. Jae Min Hyun (JH) 89
Theory for hinged wavemakers of finite draft in water of constant depth. Jae Min Hyun (JH) 2

INTERDISCIPLINARY TOPICS

Aerospace Management

Operational aspects of Skylab. Thomas E. Hanes (PS, V. 48) 3
Statistical evaluation of econometric air travel demand models. Nawal K. Taneja (JA) 662
U.S. Navy fleet satellite communications. N.L. Wardle (PS, V. 41) 323

Aerospace Technology Utilization

Algerian domestic system. Abdelkader Bairi (PS, V. 41) 273
Alternative futures for mankind and the role of communications satellites. Eric Burgess (PS, V. 41) 11
Approximate statistics of random vector magnitudes. Hamilton Hagar Jr. (AIAA J, TN) 700
Comparison of Skylab and ERTS data for agricultural crop and natural vegetation interpretation, A. R.I. Welch, L.R. Pettinger, and C.E. Poulton (PS, V. 48) 327
Economic considerations for low-capacity SHF satellite communications Earth terminals. G.P. Petrick and C.M. Abrahamson (PS, V. 42) 145
Experiment in domestic satellite utilization, an. R.J. Metz (PS, V. 41) 155
Evaporation, diffusion, and convection in containerless melts at low gravity. Alan. L. Dragoo and Robert C. Paule (AIAA J, SYN) 135
Glass solar heat collector development. R.B. Gillette, C. Deminet, and W.D. Beverly (PS, V. 49) 291
Lyman-Alpha imagery of Comet Kohoutek and far-UV magnitudes of stars. Thornton Page (PS, V. 48) 265
Operational experience with small unattended television receive Earth stations. A.D.D. Miller (PS, V. 42) 167
Power balancing in multibeam satellites, J.F. Meyerhoff (PS, V. 41) 55

Atmospheric, Space, and Oceanographic Sciences

Active control of spacecraft potentials at geosynchronous orbit. R. Goldstein and S.E. DeForest. (PS, V. 47) 169
Assessment of potential impact of stratospheric flight on Earth's ultraviolet irradiance. Henry Hidalgo (AIAA J, SA) 137; (ERR) 1344
Basic spectrophotometric measures of air quality over long paths. J.S. Hall and L.A. Riley (PS, V. 49) 205
Bidirectional reflectance and transmittance of a scattering-absorbing medium with a rough surface. J.E. Rogers and D.K. Edwards (PS, V. 49) 3
Computer model of the lightning'thunder process, with audible demonstration. H.S. Ribner, F. Lam, K.A. Leung, D. Kurtz, and N.D. Ellis (PS, V. 46) 77
Earth orbital neutron analysis: A Skylab student project. Terry Quist (PS, V. 48) 505
Effects of cruise-altitude pollution. Anthony J. Broderick (JA) 817
High-time resolution spectrometer for 0.05 to 500keV electrons and protons, A. B. Sellers, F.A. Hanser, P.R. Morel, J.L. Hunerwadel, AL. Pavel, L. Katz, and P.L. Rothwell (PS, V. 47) 31
Impact of scintillation on transionospheric communications. Howard A. Blank and Thomas S. Golden (PS, V. 42) 397
Initial results from the EUV spectroheliometer on ATM. E.M. Reeves, J.G. Timothy, P.V. Foukal, M.C.E. Huber, R.W. Noyes, E.J. Schmahl, J.E. Vernazza, and G.L. Withbroe (PS, V. 48) 73
Lyman-Alpha imagery of Comet Kohoutek and far-UV magnitudes of stars. Thornton Page (PS, V. 48) 265
Model predictions of latitude-dependent ozone depletion due to supersonic transport operations. W.J. Borucki, R.C. Whitten, V.R. Watson, H.T. Woodward, C.A. Riegel, L.A. Capone, and T. Becker (AIAA J) 1738
Modeling and prediction of ionospheric scintillation. Edward J. Fremouw (PS, V. 42) 367
Morphology of ionospheric scintillation. R.K. Crane (PS, V. 42) 311
Multicolor photometry of low-light level phenomena from Skylab. J.L. Weinberg and R.C. Hahn (PS, V. 48) 223
Near-Earth cosmic dust results from Skylab experiment S-149. C.L. Hemenway, D.S. Hallgren, and C.D. Tackett (PS, V. 48) 411
On modeling of atmospheric surface layers by the counter-jet technique. H.M. Nagib, M.V. Morkovin, J.T. Yung, and J. Tanatichat (AIAA J) 185
Preliminary analysis of extreme ultraviolet and x-ray observations (S-020) David L. Garett (PS, V. 48) 151
Preliminary results from the Harvard ATM calibration rocket program. J.G. Timothy and E.M. Reeves (PS, V. 48) 123
Preliminary results from the S-056 X-ray telescope experiment aboard the Skylab-Apollo telescope mount. J.H. Underwood, G.A. Chapman, T.J. Janssens, P.B. Landecker, E.B. Mayfield, D.L. McKenzie, J.A. Vorpahl, A.B.C. Walker, Jr., J.E. Milligan, A.C. deLoach, R.B. Hoover, J.G. McGuire, and R.M. Wilson (PS, V. 48) 179

Preliminary results of ultraviolet (2500 ½) stellar photography taken by Skylab experiment S-183. Georges Courtes, Michel Laget, Andre Vuillemin, and Harry L. Atkins (PS, V. 48) 285
Progeny of Skylab: The pioneering phase of our expansion into space. Harrison H. Schmitt (PS, V. 48) 11
Relativistic iron in space and its nuclear progeny. Maurice M. Shapiro (PS, V. 48) 251
Skylab observations of Comet Kohoutek. William C. Snoddy and G. Allen Gary (PS, V. 48) 237
Some results of Skylab experiment S063. Donald M. Packer and Irene G. Packer (PS, V. 48) 211
Spacecraft radio-occultation technique for the study of planetary atmospheres. Von R. Eshleman (JSR, TC) 768
Stability of the infrared Earth horizon at 15 μ. James William Hoffman (JSR, EN) 626
Students experiments on Skylab. Henry B. Floyd (PS, V. 48) 471
Substorm-induced spacecraft-charging currents from field-aligned and omnidirectional particles. J.L. Vogl, N.L. Sanders, and S.E. DeForest (PS, V. 47) 77
Supersonic gas sampling error in atmospheric ozone depletion studies. T.B. Guy (AIAA J) 1464
System for biological and soil chemical tests on a planetary lander. R.J. Radmer, B. Kok, and J.P. Martin (JSR) 719
Theory of the spherically symmetric photoelectron sheath and comparison with the ATS-6 observation of a potential barrier. E.C. Whipple, Jr. (PS, V. 47) 135
Thermodynamics of chemical systems in external fields. Prashant Rastogi (AIAA J, TN) 971
Ultraviolet stellar spectra obtained with Skylab experiment SO19. K.G. Henize, J.D. Wray, S.B. Parsons, G.F. Benedict, Y. Kondo, and F.G. O'Callaghan (PS, V. 48) 199
Variation of turbulence with altitude to 70,000 ft. David E. Waco (JA) 981
Zero-gravity demonstration of the collision and coalescence of water droplets, A. R.J. Hung, O.H. Vaughan, and R.E. Smith (PS, V. 48) 515

Computer Technology and Computer Simulation Techniques

Anticipated spin susceptibility characteristics of the A-10 aircraft. K.L. Johnson and T.B. Willen (JA) 406
Automatic land use classification using Skylab 192 multispectral data. L. Kirvida and M. Cheung (PS, V. 48) 373
Combined three-dimensional finite-difference and integral method. Alfred C. Buckingham and Naury K. Birnbaum (AIAA J, SYN) 291
Comment on "Explicit numerical method for solution of heat-transfer problems." John D. Randall (AIAA J, TC) 127
Development and air bearing test of a double-gimballed momentum wheel attitude-control system, J.J. Kalley, Jr. and H.L. Mork (PS, V. 42) 49
Development of dynamic discharge arc driver with computer-aided circuit simulation. Robert E. Dannenberg and Petar I. Slapnicar (AIAA J) 1183
Dynamics of a crash victim—A finite segment model. Ronald L. Huston, Richard E. Hessel, and James M. Winget (AIAA J) 173
Enhanced tracking capability using multiple stations and Doppler radar. Jerold M. Haber and R.T. Gabler (JSR, SYN) 449
Engine life cycle cost modeling in the conceptual phase. Carlton E. Curry (JA) 798
Finite-element solution for radiative-conductive analyses with mixed diffuse-specular surfaces. Hwa-Ping Lee and Clifton E. Jackson Jr. (PS, V. 49) 25
Flight test of a digital guidance and control system in a DC-10 aircraft. S.S. Osder, D.C. Mossman, and B.T. Devlin (JA) 676
Generalized design and optimization techniques for satellite communications networks. Alan D. Levit (PS, V. 41) 67
Generalized steady-state method for stiff equations. J.W. Hiestand and A.R. George (AIAA J, SYN) 1153
Numerical methods for separated flow solutions around a circular cylinder. C.L. Lin, D.W. Pepper and S.C. Lee (AIAA J) 900
Numerical modeling of flat-plate solar collectors. P.R. Smith and M.H. Cobble (PS, V. 49) 315
Numerical solutions of supersonic and hypersonic laminar compression corner flows. C.M. Hung and R.W. MacCormack (AIAA J) 475
Oil compressibility and polytropic air compression analysis for oleo-pneumatic shock struts. Mahinder K. Wahi (JA) 527
Oleopneumatic shock strut dynamic analysis and its real-time simulation. Mahinder K. Wahi (JA) 303
Optimal strategies in the neighborhood of a collision course. S. Gutman and G. Leitmann (AIAA J) 1210
Optimum data utilization for parameter identification with application to lifting rotors. D. Banerjee and K. Hohenemser (JA, EN) 1014
Predicted exhaust emission from a methanol and jet fueled gas turbine combustor. H.G. Adelman, L.H. Browning, and R.K. Pefley (AIAA J) 793
Real-time debris patterns for ballistic missile launches. Jon D. Collins, Moroni Jameson Jr., and J.L. Jantz (JSR) 310
Recent progress in numerical techniques for flow simulation. H. Lomax (AIAA J) 512
Resolution of Runge-Kutta-Nystrom condition equations through eighth order. Richard H. Battin (AIAA J) 1012
Second-order approximation for radiative heat transfer between simple two-dimensional surfaces. W.D. Turner and J. Camacho-Almonte (AIAA J, SYN) 5
Singularity-free extraction of a quaternion from a direction-cosine matrix. Allan R. Klumpp (JSR, EN) 754
Solid friction damping of mechanical vibrations. Philip R. Dahl (AIAA J) 1675
Touchdown performance with a computer graphics night visual attachment. E.A. Palmer and F.W. Cronn (JA) 89

Electric Power Generation Research

Airborne windmills and communication aerostats. M.S. Manalis (JA, EN) 543
Dual optimum aerodynamic design for a conventional windmill. H.J. Stewart (AIAA J) 1524
Evolution of the satellite solar power station (SSPS) concept. Peter E. Glaser (JSR, EN) 573
Experiment on MHD generator with a large-scale superconducting magnet (ETL Mark V). S. Ikeda, T. Masuda, Y. Kusaka, T. Honda, and Y. Aiyama (AIAA J, TN) 1655
High-power density experiments in a shock-tunnel MHD generator. A. Veefkind, J.W.M.A. Houben, J.H. Blom, and L.H.T. Rietjens (AIAA J) 1118
Performance theory of diagonal conducting wall MHD generators. Y.C.L. Wu (AIAA J.)1362
Temperature measurements in rail electrode cross-flow arcs. D.M. Benenson and J.J. Nowobilski (AIAA J, TN) 408

Lasers

Absolute fluorine atom detection by gasification of boron nitride. David A. Winborne and Paul C. Nordine (AIAA J, TN) 1488
Aero-engine applications of laser anemometry. A.E. Smart and C.J. Moore (AIAA J) 363
Analysis of nuclear induced plasmas. Jerry E. Deese and H.A. Hassan (AIAA J) 1589
CO electric discharge lasers. Michael M. Mann (AIAA J, SA) 549
Correlation for gasdynamic laser gain. James I. McManus and John D. Anderson, Jr. (AIAA J, TN) 1770
Effect of finite-size probe volume upon laser Doppler anemometer measurements. Michael E. Karpuk and William G. Tiederman Jr. (AIAA J) 1099
Heterogeneous fluorine atom recombination/reaction on several materials of construction. Paul C. Nordine and Jane D. LeGrange (AIAA J) 644
Interpreting laser and hot-film anemometer signals in a separating boundary layer. Roger L. Simpson (AIAA J, TN) 124
Laser melt through time reduction due to aerodynamic melt removal. J.D. O'Keefe and R.L. Johnson (AIAA J) 776
Medium diagnostics for a 10-kW cw HF chemical laser. Munson A. Kwok, Robert R. Giedt, and Robert L. Varwig (AIAA J) 1318
Navier-Stokes solutions for chemical laser flows: Cold flows. Ajay P. Kothari and John D. Anderson Jr. (AIAA J, TN) 702
Numerical analysis of a combustion-driven gasdynamic laser. M. Brunne, J. Milewski, J. Stanco, and A. Zielinski (AIAA J) 352
Optimum performance for a single-stage gaseous ejector. George Emanuel (AIAA J) 1292
Potential efficiencies of open- and closed-cycle CO, supersonic, eiectric-discharge lasers. Daryl J. Monson (AIAA J) 614
Power calculations for high-flow CO electric discharge laser systems. Neill S. Smith and H.A. Hassan (AIAA J) 374
Predicted exhaust emissions from a methanol and jet fueled gas turbine combustor. H.G. Adelman, L.H. Browning, and R.K. Pefley (AIAA J) 793
Predictions of melt-through times for laser heating. Peter J. Torvik (AIAA J, SYN) 417
Preheated, combustion-driven gasdynamic lasers. R.C. Saunders III and L.J. Otten III (AIAA J, TN) 1644
Real gas effect in a laser heated thruster. Peter K. WU (AIAA J, TN) 1766
Similarity solution of the boundary-layer equations for laser heated flows. Peter K. Wu (AIAA J, TN) 1659
Simplified model of a continuous wave diffusion-type chemical laser—an extension. Marold Mirels (AIAA J) 930
Simplified modeling of multiquantum deactivation reactions. George Emanuel (AIAA J, TN) 1124
Study of the boundary layers in chemical laser nozzles. Richard J. Driscoll (AIAA J) 1571
Theory and experiment of low transitions in CO discharge lasers. B. Sidney, Roy M. McInville, and H.A. Hassan (AIAA J) 923
Thermochemical generation of CS for CO chemical lasers. V.R. Buonadonna and R.J. Richardson (AIAA J) 1106
Transonic thermal blooming due to an intense laser beam. E. Fenton Carey and Allen E. Fuhs (JA) 974
Use of a laser shadowgraph for jet noise diagnosis. Michael J. Rudd (PS, V. 46) 281

Law, History, Policy, and Sociology

Alternative futures for mankind and the role of communications satellites. Eric Burgess (PS, V. 41) 11
Long-range planning for telecommunications in a multinational environment. W.G. Gosewinckel (PS, V. 41) 25
Political constraints influencing communication satellite systems. Gilbert E. LaVean (PS, V. 41) 3
Progeny of Skylab: The pioneering phase of our expansion into space. Harrison H. Schmitt (PS, V. 48) 11

Navigation, Control, and Guidance Theory

Approximate statistics of random vector magnitudes. Hamilton Hagar Jr. (AIAA J TN) 700
Barrier in pursuit-evasion problems between two low-thrust orbital spacecraft. G.M. Anderson and V.W. Grazier (AIAA J) 158
CONUS aeronautical radionavigation by satellite. Irvin G. Stiglitz (PS, V. 41) 81
Convergence control in differential dynamic programing applied to air-to-air combat. Bernt S.A. Jarmark (AIAA J TN) 118
Convergence of gradient-type methods for free final time problems. William F. Powers and Ching J. Shieh (AIAA J) 1598
Effect of attitude constraints on solar-electric geocentric transfers. Lester L. Sackett and Theodore N. Edelbaum (JSR) 174
Effect of periodic roll rate in missiles with proportional navigation. J. Shinar and S.J. Merhav (JSR) 547
Effects of vertical deflections on aircraft inertial navigation systems, The. Uri Bernstein and Richard I. Hess (AIAA J) 1377
Error analysis of two new gradiometer-aided inertial navigation systems. Warren G. Heller and Stanley K. Jordan (JSR) 340
Explicit equations for barometric altitude computations. G.R. Sarma (JA, EN) 1017
Failure accommodation in digital flight control systems by Bayesian decision theory. Raymond C. Montgomery and Alper K. Caglayan (JA) 69
Four-dimensional guidance problem with control delays. Natarajan Nagarajan (JA) 559
Generalized inverse of a matrix: The minimization approach. Eliezer Y. Shapiro and Hans E. Decarli (AIAA J, TN) 1483
Ground simulation of a satellite navigation system, A. John J. Courtney, Jr. and Ivan Kadar (PS, V. 41) 199
Inertial navigation system tests having improved observability of error sources. William S. Widnall, Peter A. Grundy, and Walter G. Murch (JA) 12
Integrated inertial reference—inertial navigation system. Bernard Lee (JA) 449
Iterative procedure for determining limit cycles using Lagrangian mechanics, An. John E. Prussing and Jack C. Wiley (AIAAJ) 320
Maximum likelihood failure detection techniques applied to the shuttle RCS jets. John J. Deyst and James C. Deckert (JSR) 65
Minimum-time rescue trajectories between spacecraft in circular orbits. Burton H. Holaday and Robert L. Swaim (JSR) 393
Mini-RPV lateral autopilot design. Itzhack Y. Bar-Itzhack and Eryk Ferdman (AIAA J) 1189
Model-following in linear-quadratic optimization. Eliezer Kreindler and David Rothschild (AIAA J) 835
New MIL-F-949OD requirements and implications on future flight control design. James L. Townsend and Paul E. Blatt (JA) 670
Nonlinear identification in the DISCOS position sensor. P.A. Yansouni and D.B. DeBra (JSR) 26
Nonsymmetric flight influence on high-angle-of-attack handling and departure. Donald E. Johnston and Jeffrey R. Hogge (JA) 112
Optimal trajectories of high-thrust aircraft. Gerald M. Anderson and William L. Othling Jr. (JA) 180
Periodic control and the optimality of aircraft cruise. Elmer G. Gilbert and Michael G. Parsons (JA, EN) 828
Phobos and Deimos encounter experiment during the Viking extended mission. Robert H. Tolson, Robert C. Blanchard, and Edward F. Daniels (JSR) 19
Quasilinearization and optimal control problems with control bounds. B.P. Yeo (AIAA J, TN) 963
Satcom system control concepts for increased link availability. A.N. Ince, D.W. Brown, and J.A. Midgley (PS, V. 42) 217
Shuttle ascent trajectory optimization with function space quasi-Newton techniques. Ernest R. Edge and William F. Powers (AIAA J) 1369
Singularity-free extraction of a quaternion from a direction-cosine matrix. Allan R. Klumpp (JSR, EN) 754
Solution of the minimum time-to-climb problem by matched asymptotic expansions. Mark D. Ardema (AIAA J) 843
Statistical analysis of trim maneuvers in low-thrust interplanetary navigation. George C. Rinker, Robert A. Jacobson, and Lincoln J. Wood (JSR, EN) 509
Stochastic properties of enroute air traffic—an empirical investigation. William J. Dunlay Jr. and Robert Horonjeff (JA) 376
Trajectory optimization using a second-order epsilon method. Marle D. Hewett and Donald E. Kirk (JA) 174
Transformation approach to the terminal control problem, A.G.L. Slater (AIAA J) 1206

Reliability, Quality Control, and Maintainability

Early detection of fatigue damage in composite materials. M.J. Salkind (JA) 764
Effects of nuclear radiation and elevated temperature storage on electroexplosive devices. Vincent J. Menichelli (JSR) 15
Estimation of satellite lifetime from orbital failure experience. D.A. Conrad (JSR) 75; (ERR) 768
Evidence for a new discharge mechanism for dielectrics in a plasma. A. Meulenberg Jr. (PS, V. 47) 237
Fracture considerations for surveillance programs. Eugene C. Francis and Harold R. Jacobs (JSR) 451
Malter discharges as a possible mechanism responsible for noise pulses observed on synchronous-orbit satellites. J.E. Nanevicz and R.C. Adamo (PS, V. 47) 247
New MIL-F-949OD requirements and implications on future flight control design. James L. Townsend and Paul E. Blatt (JA) 670
Reliability analysis of structures under periodic proof tests in service. J.-N. Yang (AIAA J) 1225
Spacecraft-charging studies of voltage breakdown processes on spacecraft thermal control mirrors. R.C. Adamo and J.E. Nanevicz (PS, V. 47) 225
Spacecraft potentials in a substorm environment. G.T. Inouye (PS, V. 47) 103
Statistical estimation of service cracks and maintenance cost for aircraft structures. J.-N. Yang (JA) 929

Research Facilities and Instrumentation

Aero-engine applications of laser anemometry. A.E. Smart and C.J. Moore (AIAA J) 363
Application of radial-splitters for improved wide-angle diffuser performance in a blowdown tunnel. Dhanvada M. Rao and S.N. Seshadri (JA) 538
Arc heater performance on hydrogen, helium, or air. J.H. Painter and J.F. Shaeffer (AIAA J, SYN) 1161
Classification of flares and flarelike events observed during the Skylab mission. V.E. Scherrer and R. Tousey (PS, V. 48) 105
Correction for finite quenching rates in shock-induced methane pyrolysis. Jerry Lee Hall and John Herrin (AIAA J, SYN) 1515
Correction of open-jet wind-tunnel measurements for shear layer refraction. Roy K. Amiet (PS, V. 46) 259
Development of dynamic discharge arc driver with computer-aided circuit simulation. Robert E. Dannenberg and Petar I. Slapnicar (AIAA J) 1183
Development of minimum-correction wind tunnels. Samuel Bernstein and Robert G. Joppa (JA) 243
Effects of transducer flushness on fluctuating surface pressure measurements. Richard D. Hanly (PS, V. 46) 291
Factors in the design and performance of free-jet acoustic wind tunnels. Y. Kadman and R.E. Hayden (PS, V. 46) 247
Influence of rainfall intensity of erosion of materials at supersonic velocities. George F. Schmitt Jr. (JA, ERR) 320
Initial results from the EUV spectroheliometer on ATM. E.M. Reeves, J.G. Timothy, P.V. Foukal, M.C.E. Huber, R.W. Noyes, E.J. Schmahl, J.E. Vernazza, and G.L. Withbroe (PS, V. 48) 73
Interior ballistics of a two-stage light gas gun using velocity interferometry. D.E. Munson and R.P. May (AIAA J) 235
Langley facility for tests at Mach 7 of subscale, hydrogen-burning, airframe-integratable, scramjet models. William B. Boatright, Alexander P. Sabol, Daniel I. Sebacher, Shimer Z. Pinckney, and Robert W. Guy (JA, SYN) 67
Lyman-Alpha imagery of Comet Kohoutek and far-UV magnitudes of stars. Thornton Page (PS, V. 48) 265
Metallurgical processing in space. Eugene C. McKannan (summary) (PS, V. 48) 459
On the application of tension to compliant membranes. James M. McMichael and Norman E. Mease (AIAA J, TN) 1490
Outdoor jet noise facility: A unique approach. R.A. Kantola (PS, V. 46) 223
Preliminary analysis of extreme ultraviolet and x-ray observations (S-020). David L. Garrett (PS, V. 48) 151
Preliminary results from the Harvard ATM calibration rocket program. J.G. Timothy and E.M. Reeves (PS, V. 48) 123
Preliminary results of ultraviolet (2500 Å) stellar photography taken by Skylab experiment S-183. Georges Courtes, Michel Laget, Andre Vuillemin, and Harry L. Atkins (PS, V. 48) 285
Skylab-induced environment. R.J. Naumann (PS, V. 48) 383
Slow ions in plasma wind tunnels. W.A. Oran, U. Samir, and N.H. Stone (AIAA J, TN) 1141
Spacecraft potential control with electron emitters. R. Grard, A. Gonfalone, and A. Pedersen (PS, V. 47) 159
Surface pressure measurements on a spinning wind tunnel model. Miles C. Miller (AIAA J, SYN) 1669
Theory for hinged wavemakers of finite draft in water of constant depth. Jae Min Hyun (JH) 2
Ultraviolet stellar spectra obtained with Skylab experiment SO19. K.G. Henize, J.D. Wray, S.B. Parsons, G.F. Benedict, Y. Kondo, and F.G. O'Callaghan (PS, V. 48) 199

Use of Hartmann generators as sources of high-intensity sound in a large absorption flow-duct facility, The. D.L. Martlew (PS, V. 46) 203
XUV sun observed by ATM SO82, The. Richard Tousey (PS, V. 48) 47

Safety

Earth orbital neutron analysis: A Skylab student project. Terry Quist (PS, V. 48) 505
Enhanced tracking capability using multiple stations and Doppler radar. Jerold M. Haber and R.T. Gabler (JSR, SYN) 449
Major changes in American Airlines flight crew training. T.M. Melden and R.C. Houston (JA) 901
Measurement of wake vortex strength by means of acoustic back scattering. David C. Burnham, Thomas E. Sullivan, and Leonard S. Wilk (JA) 889
Real-time debris patterns for ballistic missile launches. Jon D. Collins, Moroni Jameson, Jr., and J.L. Jantz (JSR) 310

Space Processing

Containerless processing of single crystals in low-gravity environment. H.U. Walter (summary) (PS, V. 43) 463
Postflight analysis of science demonstrations. Tommy C. Bannister (PS, V. 48) 531

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

LV/M Aerodynamic Heating

Comment on "Gardon heat gage temperature response." Alexander H. Flax (AIAA J, TC) 830
——Reply by authors to A.H. Flax. J.P. Kita and A.L. Laganelli (AIAA J, TC) 832
Comment on "On transient cylindrical surface heat flux predicted from interior temperature response." Murray Imber (AIAA J, TC) 542
——Reply by author to M. Imber. C.J. Chen (AIAA J, TC) 543
Stagnation region heat transfer in hypersonic particle environments. Duane T. Hove and Edward Taylor (AIAA J, TN) 1486

LV/M Aerodynamics

Aerodynamic symmetry of aircraft and guided missiles. Peter H. Zipfel (JA) 470
Analysis of base burning methods and applications. Homer H. Tang, Denny S. Chaussee, and Glen W. Zumwalt (PS, V. 40) 349
Angle-of-attack control of drag for slender re-entry vehicle recovery. D.H. Platus (JSR) 275
Induced side forces at high angles of attack. Andrew B. Wardlaw Jr. and Alfred M. Morrison (JSR) 589
Inviscid supersonic/hypersonic body flowfield and aerodynamics from shock-capturing technique calculations. D.S. Chaussee, P. Kutler, and T. Holtz (JSR) 325
Plume separated region as a flameholder. James Stark Draper (AIAA J) 358
Roll-rate stabilization of a missile configuration with wrap-around fins. Peter Daniels and Samuel R. Hardy (JSR, EN) 446
Stability derivatives for bodies of revolution at subsonic speeds. D.D. Liu, M.F. Platzer, and S.Y. Ruo (AIAA J, TN) 247
Subsonic stability and control characteristics of configurations incorporating wrap-around surfaces. E.F. Lucero (JSR) 740
Validity of small-amplitude oscillation dynamic-stability measurement technique. James C. Uselton and B.L. Uselton (JSR) 266
Viscous effects on center-of-pressure location for sharp and blunted cones. Alton G. Keel Jr. (JSR, EN) 316

LV/M Configurational Design

Comparison of cold-gas simulations and rocket-launch data for constrictive launchers. John J. Bertin and James L. Batson (JSR) 684
Exterior ballistics of free fall weapon design. Frank J. Regan, J.H.W. Shannon, and Frank J. Tanner (JA, EN) 926
Roll-rate stabilization of a missile configuration with wrap-around fins. Peter Daniels and Samuel R. Hardy (JSR, EN) 446
Shapes of blunt-nosed missiles of minimum ballistic factor. V.B. Tawakley and S.C. Jain (JSR, EN) 631
Subsonic stability and control characteristics of configurations incorporating wrap-around surfaces. E.F. Lucero (JSR) 740

LV/M Dynamics and Control

Angle-of-attack control of drag for slender re-entry vehicle recovery. D.H. Platus (JSR) 275
Control of vehicle dynamics considering guideway design criteria. Stephen L. Graham and David A. Hullender (AIAA J) 1022
Effect of periodic roll rate in missiles with proportional navigation. J. Shmar and S.J. Merhav (JSR) 547
Effects of unsymmetrical stability derivative characteristics on re-entry vehicle transient angular motion. Albert E. Hodapp Jr. (JSR) 82
Launch vehicle trajectory optimization including rotational dynamics. V. Adimurthy (JSR, EN) 59
On a linear time varying system and Liapunov criteria for stability. Ben Zion M. Naveh (AIAA J, TN) 106
Stability coefficients of a missile at angles of attack. Alfred M. Morrison and Charles W. Ingram (JSR, EN) 318
Stability conditions for spin-stabilized rockets. J.P. Sharma (JSR, EN) 122
Stochastic model of vertically nonhomogeneous gusts. George H. Fichtl and Morris Perlmutter (JSR, SYN) 577
Work/energy analysis of bending limit cycles in a deadband attitude control system. Franklin C. Loesch and Calvin Hecht (JSR) 406

LV/M Dynamics, Uncontrolled

Effect of mass asymmetry on ballistic match of projectiles. Albert E. Hodapp Jr. (JSR, EN) 757
Exterior ballistics of free fall weapon design. Frank J. Regan, J.H.W. Shannon, and Frank J. Tanner (JA, EN) 926
Free-interface methods of substructure coupling for dynamic analysis. Roy R. Craig, Jr. and Ching-Jone Chang (AIAA J, TN) 1633
Launcher length for sounding-rocket point-mass trajectory simulations. C.P. Hoult (JSR, EN) 760
Missile stability using finite elements—an unconstrained variational approach. Julian J. Wu (AIAA J) 313
On the dynamic response of missiles with varying roll rates. Ben Zion M. Naveh and Raymond M. Brach (AIAA J, SYN) 9
Response of a symmetric missile in a spin-varying environment. Ben Zion M. Naveh (AIAA J, TN) 689
Roll-rate stabilization of a missile configuration with wrap-around fins. Peter Daniels and Samuel R. Hardy (JSR, EN) 446

LV/M Flight Testing

High-altitude base pressure experiment, A. J.M. Cassanto and J.W. Lane (AIAA J) 1050
Real-time debris patterns for ballistic missile launches. Jon D. Collins, Moroni Jameson Jr., and J.L. Jantz (JSR) 310

LV/M Fuel and Propellant Systems (including Storage and Transfer)

Centaur propellant acquisition system. M.H. Blatt and J.C. Aydelott (JSR) 515
Thermal effects during pressurization of vehicle gas tanks from reservoir tanks. Lawrence D. Wing (JSR) 727

LV/M Guidance Systems (including Command and Information Systems)

Effect of periodic roll rate in missiles with proportional navigation. J. Shinar and S.J. Merhav (JSR) 547
Estimation of obstacle and terrain impact probabilities. Robert S. Swanson and Samuel A. Muse (JSR) 356
Investigation of finite-element representations of the geopotential. John L. Junkins (AIAA J) 803

LV/M Gust Loading and Wind Shear

Stochastic model of vertically nonhomogeneous gusts. George H. Fichtl and Morris Perlmutter (JSR, SYN) 577

LV/M Mission Studies and Economics

Estimation of obstacle and terrain impact probabilities. Robert S. Swanson and Samuel A. Musa (JSR) 356
Graphic representation of superorbital rocket performance. Robert Sandri (JSR, EN) 252

LV/M Propulsion System Integration

Component analysis and synthesis for fully separated flows with special consideration of base drag reduction by combustion. H.H. Korst (PS, V. 40) 211
Discussion of transonic base flows in the presence of a propulsive jet, A. T.H. Moulden, J.M. Wu, and D.J. Spring (PS, V. 40) 425
Level sensor shutdown for liquid rocket systems. D.W. Dowell, D.F. Giere, R.F. McConnell, and R.L. Donovan (JSR) 111
Monte Carlo investigation of thrust imbalance of solid rocket motor pairs. Richard H. Sforzini and Winfred A. Foster Jr. (JSR) 198

LV/M Simulation

Incompressible unsteady flow through a tube of variable cross-section. D.P. Flemming (AIAA J, TN)253

Stability coefficients of a missile at angles of attack. Alfred M. Morrison and Charles W. Ingram (JSR, EN) 318
Supporting wire interference effects in supersonic near wakes of slender bodies. Dale M. Pitt and B.P. Selberg (JSR, EN) 123

LV/M Structural Design (including Loads)

Evaluation of a cost-effective loads approach. J.A. Garba, B.K. Wada, R. Bamford, and M.R. Trubert (JSR) 675
Isogrid structural tests and stability analyses. P. Slysh, J.E. Dyer, J.H. Furman, and J.E. Key (JA) 778
Orthogonality check and correction of measured modes. W.P. Targoff (AIAA J) 164
Stochastic model of vertically nonhomogeneous gusts. George H. Fichtl and Morris Perlmutter (JSR, SYN) 577

LV/M Subsystem Design

Level sensor shutdown for liquid rocket systems. D.W. Dowell, D.F. Giere, R.F. McConnell, and R.L. Donovan (JSR) 111
Refractory metal air vane leading edge for ballistic missile defense interceptor. Archie Ossin and Lewis Aronin (AIAA J) 781

LV/M System and Component Ground Testing

Level sensor shutdown for liquid rocket systems. D.W. Dowell, D.F. Giere, R.F. McConnell, and R.L. Donovan (JSR) 111
Validity of small-amplitude oscillation dynamic-stability measurement technique. James C. Uselton and B.L. Uselton (JSR) 266

LV/M Trajectories

Convergence control in differential dynamic programing applied to air-to-air combat. Bernt S.A. Jarmark (AIAA J, TN) 118
Effect of mass asymmetry on ballistic match of projectiles. Albert E. Hodapp Jr. (JSR, EN) 757
Investigation of finite-element representation of the geopotential. John L. Junkins (AIAA J) 803
Launch vehicle trajectory optimization including rotational dynamics. V. Adimurthy (JSR, EN) 59
On a linear time varying system and Liapunov criteria for stability. Ben Zion M. Naveh (AIAA J, TN) 106
Range increase of projectiles by heat and/or mass addition to base or external flow. Henry Eugene Hudgins, Jr. (PS, V. 40) 495
Shuttle ascent trajectory optimization with function space quasi-Newton techniques. Ernest R. Edge and William F. Powers (AIAA J) 1369

Launch Vehicle Systems (including Ground Support)

Thermal effects during pressurization of vehicle gas tanks from reservoir tanks. Lawrence D. Wing (JSR) 727

Missile Systems

Velocity of bodies powered by diatomic cold-gas thrusters. M.D. Bennett (JSR, EN) 624

Tracking Systems

Enhanced tracking capability using multiple stations and Doppler radar. Jerold M. Haber and R.T. Gabler (JSR, SYN) 449

MARINE TECHNOLOGY

Marine Electric Power Systems

Gulf-stream-based, ocean-thermal power plants. J.G. McGowan and W.E. Heronemus (JH) 33

Marine Hydrodynamics, Vessel and Control Surface

Investigation of longitudinal control system for a small hydrofoil boat. William H. Phillips and John D. Shaughnessy (JH) 39
Motion of a floating structure in water of uniform depth. Jin S. Chung (JH) 65
Motions and loads of a catamaran ship of arbitrary shape in a seaway. C.H. Kim (JH) 8
Optimum windward performance of sailing craft. John S. Letcher, Jr. (JH) 140
Pressure distribution prediction for two-dimensional hydrofoils with massive turbulent separation. C.L.S. Farn, F.R. Goldschmied, and D.K. Whirlow (JH) 95

Marine Mooring Systems and Cable Mechanics

Influence of extensibility on tension in a towed cable. Alexander Simonenko (JH, EN) 26
Statics and dynamics of anchoring cables in waves. Theodore R. Goodman and John P. Breslin (JH) 113

Marine Propulsion System Integration

Base combustion effects on base pressure. S.N.B. Murthy and J.R. Osborn (PS, V. 40) 307
Base flow phenomena with and without injection: Experimental results, theories, and bibliography. S.N.B. Murthy and J.R. Osborn (PS, V. 40) 7
Frequencies of the alternating forces due to interactions of contrarotating propellers. M. Strasberg and J.P. Breslin (JH, EN) 62
Hydroelastic ichthyoid propulsion. Michael P. Paidoussis (JH, EN) 30
Optimum windward performance of sailing craft. John S. Letcher, Jr. (JH) 140

Marine Vessel Design (including Loads)

Inelastic response of ring-stiffened cylindrical shells to external pressure shock waves. L.H.N. Lee and J.T. Horng (AIAA J) 327
Motion of a floating structure in water of uniform depth. Jin S. Chung (JH) 65
Motions and loads of a catamaran ship of arbitrary shape in a seaway. C.H. Kim (JH) 8

Marine Vessel Systems, Submerged

Elastohydrodynamics of towed slender bodies: the effect of nose and tail shapes on stability. Michael P. Paidoussis and Byung-Kun Yu (JH) 127

Marine Vessel Trajectories, Stability, and Control

Investigation of longitudinal control system for a small hydrofiol boat. William H. Phillips and John D. Shaughnessy (JH) 39

Oceanography, Physical and Biological

Skylab altimeter applications and scientific results. J.T. McGoogan, C.D. Leitao, W.T. Wells, L.S. Miller, and G.S. Brown (PS, V. 48) 299
Skylab and ERTS-1 investigations of coastal land-use and water properties in Delaware Bay. V. Klemas, D. Bartlett, and R. Rogers (PS, V. 48) 351
Skylab Earth resources experiment package (EREP): Sea surface topography experiment. F.O. Vonbun, J.G. Marsh, J.T. McGoogan, C.D. Leitao, S. Vincent, and W.T. Wells (JSR) 248

Propulsion System Hydrodynamics

Optimum windward performance of sailing craft. John S. Letcher, Jr. (JH) 140

Sea Pollution Containment and Control

Skylab and ERTS-1 investigations of coastal land-use and water properties in Delaware Bay. V. Klemas, D. Bartlett, and R. Rogers (PS, V. 48) 351

Undersea Acoustics

Noise radiation from turbulent flows over compliant surfaces. Y.S. Pan (PS, V. 45) 315

PROPULSION

Airbreathing Engine Testing

Aero-engine applications of laser anemometry. A.E. Smart and C.J. Moore (AIAA J) 363
Cylindrical diffuser performance using a truncated plug nozzle. Fred L. Galanga and Thomas J. Mueller (JSR, EN) 254
F-15 flight test experience with the F100 engine. Donald B. Hamer and Gilbert B. Ballard (JA) 292
Langley facility for tests at Mach 7 of subscale, hydrogen-burning, airframe-integratable, scramjet models. William B. Boatright, Alexander P. Sabol, Daniel I. Sebacher, Shimer Z. Pinckney, and Robert W. Guy (JA, SYN) 67
Model and full-scale test results relating to fan noise in flight effects. J.P. Roundhill and L.A. Schaut (PS, V. 44) 181
Performance correction models for advanced turbofan engines. M.S. Coalson and F.L. Csavina (JA) 861
Review of theory and methods for the prediction of ground effects on aircraft noise propagation. Paul B. Oncley (PS, V. 46) 123
Thermocouple time constant measurement by cross power spectra. Warren C. Strahle and M. Muthukrishnan (AIAA J, TN) 1642

Airbreathing Propulsion, Hypersonic

Aided supersonic combustion of transversely injected fuels. R.A. Cookson and J.J. Isaac (AIAA J, SYN) 3
Approximate analysis of base burning in supersonic flow. J.A. Schetz and F.S. Billig (PS, V. 40) 385

Integrated scramjet nozzle/afterbody performance analysis. Jonas A. Sadunas (JA) 867
Langley facility for tests at Mach 7 of subscale, hydrogen-burning, airframe-integratable, scramjet models. William B. Boatright, Alexander P. Sabol, Daniel I. Sebacher, Shimer Z. Pinckney, and Robert W. Guy (JA, SYN) 67
Some effects of combustion on turbulent mixing. Louis H. Bangert and Daniel I. Sebacher (AIAA J) 394
Survey of methods for exhaust-nozzle flow analysis. E.F. Brown and G.L. Hamilton (JA, SA) 4
Thermal-structural design/analysis of an airframe-integrated hydrogen-cooled scramjet. Allan R. Wieting and Robert W. Guy (JA) 192

Airbreathing Propulsion, Subsonic and Supersonic

Aerodynamic theory for a cascade of oscillating airfoils in subsonic flow. W.P. Jones and Jimmie A. Moore (AIAA J) 601
Analytical comparison of the performance of different base-burning modes. J.A. Schetz, S. Favin, and F.S. Billig (AIAA J, TN) 1337
Analytical model of axisymmetric afterbody flow separation. Walter M. Presz Jr. and Edward T. Pitkin (JA) 500
Analytical procedure for calculation of attached and separated subsonic diffuser flows. William W. Bower (JA) 49
Approximate analysis of base burning in supersonic flow. J.A. Schetz and F.S. Billig (PS, V. 40) 385
Assessment of potential impact of stratospheric flight on Earth's ultraviolet irradiance. Henry Hidalgo (AIAA J, SA) 137; (ERR) 1344
Base combustion effects on base pressure. S.N.B. Murthy and J.R. Osborn (PS, V. 40) 307
Base flow phenomena with and without injection: Experimental results, theories, and bibliography. S.N.B. Murthy and J.R. Osborn (PS, V. 40) 7
Base pressure calculations with external burning. William Smithey and Allen E. Fuhs (PS, V. 40) 407
Cascade with subsonic leading-edge locus. M.E. Goldstein (AIAA J, ERR) 704
Comparison of conventional and force-based distortion index measurements. M. Sajben, C.P. Chen, and J.C. Kroutil (AIAA J, TN) 1500
Development of fumers for small caliber ammunition. J.Richard Ward and Frank P. Baltakis (PS, V. 40) 449
Development program for the F-15 inlet. William R. Imfeld (JA) 286
Digital electronic propulsion control system problems and payoffs. J.F. Kuhlberg and D.M. Newirth (JA) 279
Effects of cruise-altitude pollution. Anthony J. Broderick (JA) 817
Experimental and analytical investigation of axisymmetric diffusers, An. L.A. Povinelli (AIAA J) 1280
Experimental evaluation of an analytically derived bleed system for a supersonic inlet. Jan Syberg and Joseph L. Koncsek (JA) 792
F-15 flight test experience with the F100 engine. Donald B. Hamer and Gilbert B. Ballard (JA) 292
Fan aeroacoustics: The effect of stator blade number and spacing on in-duct noise signatures. G. Krishnappa (PS, V. 44) 23
Gas turbine combustor stabilization by heat recirculation. A.J. Ganji, J. Short, M.C. Branch, and A.K. Oppenheim (AIAA J) 809
Integrating ground support for propulsion systems on the 747. A.H. Sargent and W.P. Newell (JA) 850
Inviscid solutions of the flowfield in an internal combustion engine. R. Diwakar, John D. Anderson Jr., Michael D. Griffin, and Everett Jones (AIAA J, SYN) 1667
Mach disk in truncated plug nozzle flows. Thomas V. Giel Jr. and Thomas J. Mueller (JSR) 203
Measurement and prediction of jet noise in flight. K.W. Bushell (PS, V. 43) 137
Navier-Stokes solutions of the flowfield in an internal combustion engine. Michael D. Griffin, John D. Anderson Jr., and R. Diwakar (AIAA, SYN) 1665
Performance correction models for advanced turbofan engines. M.S. Coalson and F.L. Csavina (JA) 861
Performance of a cascade thrust reverser for short-haul applications. Donald A. Dietrich and Orlando A. Gutierrez (JA) 185
Predicting exit temperature profile from gas turbine combustors. George B. Cox Jr. (JA) 630
Prediction of ground effects for VTOL aircraft with twin lifting jets. Jan Louisse and Franklin L. Marshall (JA) 123
Progress on a base flow model for external burning propulsion. Warren C. Strahle, Gopal Mehta, and James E. Hubbartt (PS, V. 40) 339
Propulsive efficiency from an energy utilization standpoint. John Hiram Lewis III (JA) 229
Range increase of projectiles by heat and/or mass addition to base or external flow. Henry Eugene Hudgins, Jr. (PS, V. 40) 495
Rapid calculation of propulsion system installation corrections. William H. Ball (JA) 520
Some recent developments in supersonic jet noise reduction. D.S. Dosanjh, K.K. Ahuja, M.R. Bassiouni, and P.K. Bhutiani (PS, V. 43) 353
Study of two axisymmetric inlets designed for Mach 3.5. Norman E. Sorensen and Donald B. Smeltzer (JA) 845
Supersonic jet noise suppression with multitube nozzle/ejectors. J. Atvars, C.P. Wright, and C.D. Simcox (PS, V. 43) 329
Survey of methods for exhaust-nozzle flow analysis. E.F. Brown and G.L. Hamilton (JA, SA) 4
Technique for atmospheric rate chemistry calculations. Gregory L. Matloff (AIAA J, TN) 987
Variable geometry for supersonic mixed-compression inlets. Norman E. Sorensen, Eldon A. Latham, and Donald B. Smeltzer (JA) 309
YF-16 inlet design and performance. J.E. Hawkins (JA) 436

Combustion in Gases

Acoustic motion induced by a diffusion flame. Maurice L. Rasmussen (PS, V. 43) 531
Afterburning predictions for metal-modified propellant motor exhausts. D.E. Jensen and B.C. Webb (AIAA J) 947
Analysis of base burning methods and applications. Homer H. Tang, Denny S. Chaussee, and Glen W. Zumwalt (PS, V. 40) 349
Analytical comparison of the performance of different base-burning modes. J.A. Schetz, S. Favin, and F.S. Billig (AIAA J, TN) 1337
Combustion of phenol-formaldehyde composite propellants. H.L. Girdhar and A.J. Arora (JSR, EN) 443
Convergence of theory and experiment in direct combustion-generated noise. Warren C. Strahle (PS, V. 43) 467
Correction for finite quenching rates in shock-induced methane pyrolysis. Jerry Lee Hall and John Herrin (AIAA J, SYN) 1515
Diffusion-limited chemical reactions in a turbulent shear layer. Irwin E. Alber and Richard G. Batt (AIAA J) 70
Further experimental results on the structure and acoustics of turbulent jet flames. R.N. Kumar (PS, V. 43) 483
Generalized steady-state method for stiff equations. J.W.Hiestand and A.R. George (AIAA J, SYN) 1153
Laser schlieren for study of solid-propellant deflagration. James R. Andrews and David W. Netzer (AIAA J, TN) 410
Nitric oxide formation in combustion. H.F. Nelson (AIAA J) 1177
Noise generation and transmission in duct combustors. David W. Lindley and H.A. Hassan (PS, V. 43) 579
Noise produced by fluid inhomogeneities. Warren C. Strahle (AIAA J, TN) 985
Optical evaluation of combustion noise source terms. H.J. Shafer, E.G. Plett, and M. Summerfield (AIAA J, SYN) 1163
Optimal strategies in the neighborhood of a collision course. S. Gutman and G. Leitmann (AIAA J) 1210
Predicted exhaust emissions from a methanol and jet fueled gas turbine combustor. H.G. Adelman, L.H. Browning, and R.K. Pefley (AIAA J) 793
Primitive pressure-velocity code for the computation of strongly swirling flows. David G. Lilley (AIAA J) 749
Review of theory and methods for combustion noise prediction. R.E. Motsinger and J.J. Emmerling (PS, V. 46) 177
Solution technique for equilibrium chemistry of hydrogen-oxygen systems. David F. Dyer and Glennon Maples (AIAA J, TN) 1652
Some comments on the Dirac-delta approximations for chemical reactions. K. Annamalai and P. Durbetaki (AIAA J, TN) 1774
Some effects of combustion on turbulent mixing. Louis H. Bangert and Daniel I. Sebacher (AIAA J, TN) 394
Technique for atmospheric rate chemistry calculations. Gregory L. Matloff (AIAA J, TN) 987
Thermochemical generation of CS for CO chemical lasers. V.R. Buonadonna and R.J. Richardson (AIAA J) 1106
Thermocouple time constant measurement by cross power spectra. Warren C. Strahle and M. Muthukrishnan (AIAA J, TN) 1642

Combustion in Heterogeneous Media

Aided supersonic combustion of transversely injected fuels. R.A. Cookson and J.J. Isaac (AIAA J, SYN) 3
Catalytic activity of ignition catalysts in hybrid propellant combustion. N.L. Munjal and M.G. Parvatiyar (JSR, EN) 54
Combustion intensity and distribution relation to noise generation. E.G. Plett, M.D. Leshner, and M. Summerfield (PS, V. 43) 509
Convergence of theory and experiment in direct combustion-generated noise. Warren C. Strahle (PS, V. 43) 467
Critical review: Modeling of acceleration effects on solid propellant combustion. Merrill K. King (AIAA J) 18
Development of fumers for small caliber ammunition. J. Richard Ward and Frank P. Baltakis (PS, V. 40) 449
Distribution functions for statistical analysis of monodisperse composite solid propellant combustion. Robert L. Glick (AIAA J, TN) 1631
Experimental investigation of boron/lithium combustion. R. Mestwerdt and H. Selzer (AIAA J, TN) 100
Experimental study of pressure wave propagation in granular propellant bed. A.C. Alkidas, S.O. Morris, L.H. Caveny, and M. Summerfield (AIAA J) 789
Heterogeneous combustion of aluminized propellants. R.P. Rastogi, K. Koshore, and Desh Deepak (AIAA J) 229
Ignition of composite solid propellant analogs. T.J. Thomas and U. S. Nandi (AIAA J, TN) 1334
Laminar boundary-layer analyses for parallel streams with interfacial mass transfer. C.K. Law (AIAA J, TN) 1497

Laser schlieren for study for solid-propellant deflagration. James R. Andrews and David W. Netzer (AIAA J, TN) 410
Measurements of droplet size and gas temperature in spray combustion flames. Y. Onuma and M. Ogasawara (AIAA J, TN) 1637
Observations on burning and flame-spread of black powder. F.A. Williams (AIAA J) 637
Pit formation on the accelerated solid propellant combustion surface. Tohru Mitani (AIAA J, TN) 1338
Pressure dependence of hybrid fuel burning rate. R.P. Rastogi and Desh Deepak (AIAA J, TN) 988
Quasi-steady gas phase assumption for a burning droplet. Josette Bellan and Martin Summerfield (AIAA J, TN) 973
Regression rate studies of metalized aniline formaldehyde hybrid fuel. N.L. Munjal and M.G. Parvatiyar (JSR, EN) 572
Some comments on the Dirac-delta approximations for chemical reactions. K. Annamalai and P. Durbetaki (AIAA J, TN) 1774
Transient period of the acceleration-produced burning rate augmentation. Takashi Niioka, Tohru Mitani, and Shinichi Ishii (AIAA J) 1165

Combustion Stability, Ignition, and Detonation

Effect of nozzle submergence upon stability of solid rockets. B.A. Janardan and B.T. Zinn (AIAA J, TN) 109
Experimental study of pressure wave propagation in granular propellant bed. A.C. Alkidas, S.O. Morris, L.H. Caveny, and M. Summerfield (AIAA J) 789
Experimental study on oscillatory combustion in solid-propellant motors. T. Koreki, I. Aoki, K. Shirota, Y. Toda, and K. Kuratani (JSR) 534
Ignition of composite solid propellant analogs. T.J. Thomas and U.S. Nandi (AIAA J, TN) 1334
Plume separated region as a flameholder. James Stark Draper (AIAA J) 358
Radiative ignition of double-base propellants: I. Some formulation effects. L. DeLuca, L.H. Caveny, T.J. Ohlemiller, and M. Summerfield (AIAA J) 940
Radiative ignition of double base propellants: II. Pre-ignition events and source effects. L. DeLuca, T.J. Ohlemiller, L.H. Caveny, and M. Summerfield (AIAA J) 1111
Theoretical analysis for the burning of solid propellants. K.N. Shukla (AIAA J, TN) 1787
Three-dimensional finite-element acoustic analysis of solid rocket motor cavities. R.M. Hackett (JSR) 585

Electric and Advanced Space Propulsion

Active control of spacecraft potentials at geosynchronous orbit. R. Goldstein and S.E. DeForest. (PS, V. 47) 169
Design and performance evaluation of an ion thruster simulator. John W. Pye (JSR, SYN) 257
Dynamic characteristics of a 30-cm mercury ion thruster. J.S. Serafini, M.A. Mantenieks, and V.K. Rawlin (JSR) 579
Effect of attitude constraints on solar-electric geocentric transfers. Lester L. Sackett and Theodore N. Edelbaum (JSR) 174
Effects of propellant and electrode geometry on pulsed ablative plasma thruster performance. D.J. Palumbo and W. J. Guman (JSR) 163
Experimental studies of a linear strip cesium contact ion thruster. G. Eschard, A. Pelissier, J. Paulin, J.F. Bonnal (JSR) 193
Flowfield characteristics and performance limitations of quasi-steady magnetoplasmadynamic accelerators. M.J. Boyle, K.E. Clark, and R.G. Jahn (AIAA J) 955
Interplanetary spacecraft design using solar electric propulsion. John H. Duxbury and Gary M. Paul (JSR) 99
MHD propulsion by absorption of laser radiation. L.N. Myrabo (JSR) 466
Mach disk in truncated plug nozzle flows. Thomas V. Giel Jr. and Thomas J. Mueller (JSR) 203
Measurement of detonation propulsion in helium and performance calculations. K. Kim, L.H . Back, and G. Varsi (AIAA J) 310
Measurements of plasma fluctuations in an 8-cm mercury ion thruster. John S. Serafini and Shigeo Nakanishi (JSR) 692
Nonlinear transient neutralization theory of ion beams with dissipation. H.E. Wilhelm (JSR) 362
One-millipound mercury ion thruster. J. Hyman Jr., C.R. Dulgeroff, S. Kami, and W.S. Williamson (JSR) 366
Quantum statistical analysis of surface sputtering. H.E. Wilhelm (JSR, EN) 116
Solid propellant pulsed plasma propulsion system design. William J. Guman (JSR) 51
Stability of laser heated flows. P.K.S. Wu and A.N. Pirri (AIAA J, TN) 390
Structural/thermal packaging for 30-cm ion thruster power processing units. J.E. Maloy and G.R. Sharp (JSR) 156
Study of traveling conduction wave accelerator. Bruce W. Boreham (AIAA J) 85
Temperature effects and capillarity in an electrostatic liquid thruster. A.G. Bailey (JSR) 373
Temperature measurements in rail electrode cross-flow arcs. D.M. Benenson and J.J. Nowobilski (AIAA J, TN) 408
Thruster subsystem module for solar electric propulsion. G. Richard Sharp (JSR) 106

Fuels and Propellants, Properties of

Catalytic activity of ingition catalysts in hybrid propellant combustion. N.L. Munjal and M.G. Parvatiyar (JSR, EN) 54
Combustion of phenol-formaldehyde composite propellants. H.L. Girdhar and A.J. Arora (JSR, EN) 443
Condensed phase heat of reactions of phenol-formaldehyde composite propellants. H.L. Girdhar and A.J. Arora (AIAA J, TN) 1776
Drag-reducing fumer as a tool in ammunition design. Richard Kwatnoski (PS, V. 40) 487
Drag reducing fumers. Austin W. Barrows (PS, V. 40) 1
Effect of neutron radiation on the vaporization of ammonium perchlorate. J. Richard Ward and Joseph J. Rocchio (AIAA J, TN) 267
Effect of preheating on the burning rate of solid propellants. V.R. Pai Verneker, K. Kishore, and G. Prasad (AIAA J, TN) 1330
Effects of propellant and electrode geometry on pulsed ablative plasma thruster performance. D.J. Palumbo and W.J. Guman (JSR) 163
Experimental investigation of boron/lithium combustion. R. Mestwerdt and H. Selzer (AIAA J, TN) 100
Experimental study on oscillatory combustion in solid-propellant motors. T. Koreki, I. Aoki, K. Shirota, Y. Toda, and K. Kuratani (JSR) 534
Heterogeneous combustion of aluminized propellants. R.P. Rastogi, K. Kishore, and Desh Deepak (AIAA J) 229
Ignition of composite solid propellant analogs. T.J. Thomas and U.S. Nandi (AIAA J, TN) 1334
Laser schlieren for study of solid-propellant deflagration. James R. Andrews and David W. Netzer (AIAA J, TN) 410
Observations on burning and flame-spread of black powder. F.A. Williams (AIAA J) 637
Pit formation on the accelerated solid propellant combustion surface. Tohru Mitani (AIAA J, TN) 1338
Pressure dependence of hybrid fuel burning rate. R.P. Rastogi and Desh Deepak (AIAA J, TN) 988
Regression rate studies of metalized aniline formaldehyde hybrid fuel. N.L. Munjal and M.G. Parvatiyar (JSR, EN) 572
Thermal decomposition studies on ammonium perchlorate-based composite propellants. K. Kishore and V.R. Pai Verneker (AIAA J, TN) 966
Transient period of the acceleration-produced buring rate augmentation. Takashi Niioka, Tohru Mitani, and Shinichi Ishii (AIAA J) 1165
Velocity of bodies powered by diatomic cold-gas thrusters. M.D. Bennett (JSR, EN) 624

Liquid Rocket Engines

Catalyst particle wetting and breakup in hydrazine systems. P.J. Marteney and A.S. Kesten (JSR) 430
Catalytic activity of ignition catalysts in hybrid propellant combustion. N.L. Munjal and M.G. Parvatiyar (JSR, EN) 54
Correction factor for heat flux in an expansion nozzle. J. Reinkenhof and R. Schmucker (JSR EN) 63
Development of a five-pound thrust bipropellant engine. R.C. Schindler and L. Schoenman (JSR) 435
Flight performance of a high-impulse monopropellant thruster. H.C. Hearn (JSR) 261
Surface tension propellant acquisition system technology for space shuttle reacton control tanks. Dale A. Fester, Ashton J. Villars, and Preston E. Uney (JSR) 522

Marine Propulsion

Influence of extensibility on tension in a towed cable. Alexander Simonenko (EN) 26

Nuclear Propulsion

Graphic representation of superorbital rocket performance. Robert Sandri (JSR, EN) 252

Rocket Engine Testing

Comment on "On transient cylindrical surface heat flux predicted from interior temperature response." Murray Imber (AIAA J, TC) 542
——Reply by author to M. Imber. C.J. Chen (AIAA J, TC) 543
Cylindrical diffuser performance using a truncated plug nozzle. Fred L. Galanga and Thomas J. Mueller (JSR, EN) 254
Pressure and velocity in a developing coaxial jet. L.F. Moon (AIAA J) 43

Solid and Hybrid Rocket Engines

Afterburning predictions for metal-modified propellant motor exhausts. D.E. Jensen and B.C. Webb (AIAA J) 947
Application of Schapery's theory of viscoelastic fracture to solid propellant. S.R. Swanson (JSR) 528
Distribution functions for statistical analysis of monodisperse composite solid propellant combustion. Robert L. Glick (AIAA J, TN) 1631
Effect of nozzle submergence upon stability of solid rockets. B.A. Janardan and B.T. Zinn (AIAA J, TN) 109
Effect of preheating on the burning rate of solid propellants. V.R. Pai Verneker, K. Kishore, and G. Prasad (AIAA J, TN) 1330
Experimental study on oscillatory combustion in solid-propellant motors. T. Koreki, I. Aoki, K. Shirota, Y. Toda, and K. Kuratani (JSR) 534
Fracture considerations for surveillance programs. Eugene C. Francis and Harold R. Jacobs (JSR) 451
Heterogeneous combustion of aluminized propellants. R.P. Rastogi, K. Kishore, and Desh Deepak (AIAA J) 229
Monte Carlo investigation of thrust imbalance of solid rocket motor pairs. Richard H. Sforzini and Winfred A. Foster Jr. (JSR) 198
Pressure dependence of hybrid fuel burning rate. R.P. Rastogi and Desh Deepak (AIAA J, TN) 988
Regression rate studies of metalized aniline formaldehyde hybrid fuel. N.L. Munjal and M.G. Parvatiyar (JSR, EN) 572
Simulative study on the erosive burning of solid rocket motors. K. Yamada, M. Goto, and N. Ishikawa (AIAA J) 1170

SPACECRAFT TECHNOLOGY

Data Sensing and Presentation or Transmission Systems

Automatic land use classification using Skylab 192 multispectral data. L. Kirvida and M. Cheung (PS, V. 48) 373
Comparison of Skylab and ERTS data for agricultural crop and natural vegetation interpretation, A. R.I. Welch, L.R. Pettinger, and C.E. Poulton (PS, V. 48) 327
Earth station for the U.S.-USSR direct communications link. W.P. Hooper, W.M. Rogers, and J.G. Whitman, Jr. (PS, V. 42) 115
General geometric theory of attitude determination from directional sensing. Bertrand T. Fang (JSR, SYN) 321
High-time resolution spectrometer for 0.05 to 500 keV electrons and protons, A. B. Sellers, F.A. Hanser, P.R. Morel, J.L. Hunerwadel, A.L. Pavel, L. Katz, and P.L. Rothwell (PS, V. 47) 31
Lightweight, low-cost EVA range estimation aid. Wallace T. Fowler and David B. Higgins (JSR, EN) 630
Methods of alleviation of ionospheric scintillation effects on digital communications. James L. Massey (PS, V. 42) 279
Operational experience with small unattended television receive Earth stations. A.D.D. Miller (PS. V. 42) 167
Power balancing in multibeam satellites. H.J. Meyerhoff (PS, V. 41) 55
Viking orbiter visual imaging subsystem, The. John B. Wellman, Frederick P. Landauer, David D. Norris, and Thomas E. Thorpe (JSR) 660

Earth Satellite Systems, Unmanned

Active control of spacecraft potentials at geosynchronous orbit. R. Goldstein and S.E. DeForest (PS, V. 47) 169
Alternative futures for mankind and the role of communications satellites. Eric Burgess (PS, V. 41) 11
ATS-6 experimental communications satellite—report on early orbital results. William A. Johnston Jr. (JSR) 91
ATS-6 interferometer: A precision, wide-field-of-view attitude sensor. M.A. Teichman, F.L. Marek, J.J. Browning, and A.K. Parr (PS, V. 42) 35
CONUS aeronautical radionavigation by satellite. Irvin G. Stiglitz (PS, V. 41) 81
Correlation study relating spacecraft anomalies to environmental data, A. C.P. Pike and M.H. Bunn (PS, V. 47) 45
Defense satellite communications system. Gilbert E. LaVean (PS, V. 41) 309
Design and analysis of a space sextant for high altitude navigation. Howard A. Garcia and William J. Owen (JSR) 705
Design of a ground control system to operate domestic and maritime satellites. A.J.E. van Hover and W.J. Gribbin (PS, V. 42) 201
Earth station for the U.S.-USSR direct communications link. W.P. Hooper, W.M. Rogers, and J.G. Whitman, Jr. (PS, V. 42) 115
Effect of multiple-band/service satellites on orbit and spectrum utilization. W.G. Long, Jr. (PS, V. 41) 121
Efficient high-capacity communications satellites. J.H. Hockenberry, D.W. Krejci, W.A. Koenig and J.P. Klockseim (PS, V. 42) 3
Evidence for a new discharge mechanism for dielectrics in a plasma. A. Muelenberg Jr. (PS, V. 47) 237
Generalized design and optimization techniques for satellite communications networks. Alan D. Levit (PS, V. 41) 67
High-time resolution spectrometer for 0.05 to 500 keV electrons and protons, A. B. Sellers, F.A. Hanser, P.R. Morel, J.L. Hunerwadel, A.L. Pavel, L. Katz, and P.L. Rothwell (PS, V. 47) 31
Impact of rain attenuation on 18/30-GHz satellite systems. D. Jarett and L.D. Spilman (PS, V. 42) 291
Impact of scintillation on transionospheric communications. Howard A. Blank and Thomas S. Golden (PS, V. 42) 397
Low-cost space telescope pointing control system. J.R. Glaese, H.F. Kennel, G.S. Nurre, S.M. Seltzer, and H. L. Shelton (JSR) 400
Malter discharges as a possible mechanism responsible for noise pulses observed on synchronous-orbit satellites. J.E. Nanevicz and R.C. Adamo (PS, V. 47) 247
New satellite constellations for CONUS ATC coverage. H.B. Lee and A.E. Wade (PS, V. 41) 93
Observations of electrical discharges caused by differential satellite-charging. R.R. Shaw, J.E. Nanevicz, and R.C. Adamo (PS, V. 47) 61
Philippine domestic satellite system. Geoffrey Cheadle (PS, V. 41) 37
Relationship between ATS-6 spacecraft-charging occurrences and warm plasma encounters. D.L. Reasoner, Walter Lennartsson, and C.R. Chappell (PS, V. 47) 89
Satellite-switched TDMA: Transponder-switched or beam-switched? William G. Schmidt (PS, V. 41) 139
Simulation of the plasma sheath surrounding a charged spacecraft. P.L. Rothwell, A.G. Rubin, A.L. Pavel, and L. Katz (PS, V. 47) 121
Single channel per carrier voice transmission via communications satellite. Charles C. Sanderson and Lloyd G. Ludwig (PS, V. 42) 243
Skylab altimeter applications and scientific results. J.T. McGoogan, C.D. Leitao, W.T. Wells, L.S. Miller, and G.S. Brown (PS, V. 48) 299
Spacecraft charging at high altitudes: The Scatha satellite program. D.A. McPherson and W.R. Schober (PS, V. 47) 15
Spacecraft charging: Environment-induced anomalies. Alan Rosen (JSR) 129
Spacecraft-charging studies of voltage breakdown processes on spacecraft thermal control mirrors. R.C. Adamo and J.E. Nanevicz (PS, V. 47) 225
Stability of the infrared Earth horizon at 15μ. James William Hoffman (JSR, EN) 626
Synchronous satellite at less than synchronous altitude. V.A. Chobotov (JSR, EN) 126
Telesat satellite control system. H. Kowalik (PS, V. 42) 183
U.S. Navy fleet satellite communications. N.L. Wardle (PS, V. 41) 323

Earth-Orbital Trajectories

Drag perturbations of near-circular orbits in an oblate diurnal atmosphere. F.A. Santora (AIAA J) 1196
Economical scheme for estimating orbital lifetimes. Luigi L. Perini (JSR, ERR) 64
Effect of attitude constraints on solar-electric geocentric transfers. Lester L. Sackett and Theodore N. Edelbaum (JSR) 174
Ground control of drag satellites utilizing onboard accelerometer data. A.J. Fuchs and C.E. Velez (JSR) 188
Investigation of finite-element representations of the geopotential. John L. Junkins (AIAA J) 803
Minimum-time rescue trajectories between spacecraft in circular orbits. Burton H. Holaday and Robert L. Swaim (JSR) 393
Noninteger transfer orbits for circular orbit phasing maneuvers. Gordon L. Collyer (JSR, EN) 628
Optimal low-thrust orbital rendezvous. Al. Marinescu (JSR) 385
Telesat satellite control system. H. Kowalik (PS, V. 42) 183

Entry Deceleration Systems and Flight Mechanics (e.g., Parachutes)

Parametric study of parachute pressure distribution by wind tunnel testing. W.B. Pepper and J.F. Reed (JA) 895

Entry Vehicle Dynamics and Control

Atmospheric entry into Jupiter's atmosphere in view of recent flyby results. Philip R. Nachtsheim, Edward Tindle, and John T. Howe (JSR, EN) 120
Effects of unsymmetrical stability derivative characteristics on re-entry vehicle transient angular motion. Albert E. Hodapp Jr. (JSR) 82
Hypersonic viscous static stability of a sharp 5-deg cone at incidence. J.C. Adams Jr. and B.J. Griffith (AIAA J) 1062

Entry Vehicles and Landers

Outer planets atmospheric entry probes: Science objectives and payloads. Howard Myers (JSR) 712
Radiative heating about outer planet entry probes. Kenneth Sutton (JSR) 294

Entry Vehicle Mission Studies and Flight Mechanics

Spin variations in slender entry vehicles during rolling trim. William J. Bootle (AIAA J, ERR) 1664

Entry Vehicle Testing

Flight-test base pressure measurements in turbulent flow. Bruce M. Bulmer (AIAA J, TN) 1783
Rear stagnation point location in a subsonic near-wake. R.A. Merz, R.H. Page, and C.E.G. Przirembel (JSR, EN) 319

Extra-Vehicular Activity

Lightweight, low-cost EVA range estimation aid. Wallace T. Fowler and David B. Higgins (JSR, EN) 630

Lunar and Interplanetary Spacecraft Systems, Unmanned

Interplanetary spacecraft design using solar electric propulsion. John H. Duxbury and Gary M. Paul (JSR) 99
Jupiter orbiter mother/daughter spacecraft concept. John H. Duxbury (JSR, SYN) 259
Spacecraft potential control with electron emitters. R. Grard, A. Gonfalone, and A. Pedersen (PS, V. 47) 159
Spacecraft radio-occultation technique for the study of planetary atmospheres. Von R. Eshleman (JSR, TC) 768
Viking orbiter visual imaging subsystem, The. John B. Wellman, Frederick P. Landauer, David D. Norris, and Thomas E. Thorpe (JSR) 660

Lunar and Interplanetary Trajectories

Analytic solution for low thrust out of ecliptic mission design. G.A. Flandro (AIAA J) 33
Orbit design concepts for Jupiter orbiter missions. C. Uphoff, P.H. Roberts, and L.D. Friedman (JSR) 348
Relationship between coast arc length and switching function value during optimization. W.T. Fowler and P.M. O'Neill (JSR, EN) 445

Meteoroid Protection Systems

Near-Earth cosmic dust results from Skylab experiment S-149. C.L. Hemenway, D.S. Hallgren, and C.D. Tackett (PS, V. 48) 411
Neutron and proton activation measurements from Skylab. G.J. Fishman (PS, V. 48) 397
Spacing statistics for particle impacts. Hartley H. King (AIAA J, TN) 1782

Radiation Protection Systems

Degradation of low-scatter mirrors by particle contamination. R.P. Young (PS, V. 49) 85
Earth orbital neutron analysis: A Skylab student project. Terry Quist (PS, V. 48) 505
Effect of neutron radiation on the vaporization of ammonium perchlorate. J. Richard Ward and Joseph J. Rocchio (AIAA J,TN) 267
Relativistic iron in space and its nuclear progeny. Maurice M. Shapiro (PS, V. 48) 251
Spacecraft-charging analysis and test for environmentally induced EMI. A. Krausz (PS, V. 47) 277
Substorm-induced spacecraft-charging currents from field-aligned and omnidirectional particles. J.L. Vogl, N.L. Sanders, and S.E. DeForest (PS, V. 47) 77
Surface discharges on spacecraft dielectrics in a scanning electron microscope. K.G. Balmain, M. Orszag, and P. Kremer (PS, V. 47) 213

Satellite Communication Systems (including Ground Stations)

Overview: Military satellite communication systems. Frederick E. Bond(PS, V. 41) 43

Spacecraft Attitude Dynamics and Control

Appendage modal coordinate truncation criteria in hybrid coordinate dynamic analysis, Peter Likins, Yoshiaki Ohkami, and Chung Wong (JSR) 611
Attitude control of spinning spacecraft by radiation pressure. K.C. Pande (JSR, EN) 765
ATS-6 interferometer: A precision, wide-field-of-view attitude sensor. M.A. Teichman, F.L. Marek, J.J. Browning, and A.K. Parr (PS, V. 42) 35
Computer algorithms for computation of kinematical relations for three attitude angle systems. Yoshiaki Ohkami (AIAA J, TN) 1135
Design analogy between optimal time-fuel and rate-ledge relay controllers. Larry R. White, Bruce K. Colburn, and Joseph S. Boland III (JSR) 214
Development and air bearing test of a double-gimballed momentum wheel attitude-control system. J.J. Kalley, Jr. and H.L. Mork (PS, V. 42) 49
Development of a five-pound thrust bipropellant engine. R.C. Schindler and L. Schoenman (JSR) 435
Dual-spin spacecraft stabilization using nutation feedback and inertia coupling. John W. Smay and Loren I. Slafer (JSR) 650
Dynamics of spin-stabilized spacecraft during deployment of telescoping appendages. R. Sellappan and P.M. Bainum (JSR) 605
Elementary magnetic attitude control system. A. Craig Stickler and K.T. Alfriend (JSR) 282
Experimental studies of a linear strip cesium contact ion thruster. G. Eschard, A. Pelissier, J. Paulin, and J.F. Bonnal (JSR) 193
Explicit attitude stability criteria for passive, Earth-pointing satellites. John R. Murphy and Thomas R. Kane (JSR) 180
Formulation of the global equations of motion of a deformable body. Thomas B. McDonough (AIAA J); (ERR) 1663
Gasdynamics of the cryogenic cooler of the Nimbus F spacecraft. William J. Rae and Michael G. Dunn (JSR) 732
Geometrical limitations on attitude determination for spinning spacecraft. James R. Wertz and Lily C. Chen (JSR) 564
Gravity-gradient effects on the motion of two rotating cable-connected bodies. P.M. Bainum and K.S. Evans (AIAA J) 26
Improved determination of apogee motor pointing. R.G. Lagowski and R.J. Ferguson (JSR, EN) 55
Influence of nonlinear rotor-platform interface on dual-spin attitude dynamics. Donald L. Cronin (AIAA J) 1395
Librations of a parametrically resonant dual-spin satellite with an energy damper. Hironori Fujii (JSR) 416
Low-cost space telescope pointing control system. J.R. Glaese, H.F. Kennel, G.S. Nurre, S.M. Seltzer, and H. L. Shelton (JSR) 400
Maximum likelihood failure detection techniques applied to the shuttle RCS jets. John J. Deyst and James C. Deckert (JSR) 65
Modal analysis of rotating flexible structures. Robert M. Laurenson (AIAA J) 1444
Moment characteristics of liquid injection thrust vector control. Goro Masuya, Nobuo Chinzei, and Shinichi Ishii (JSR, EN) 699
Natural modes of oscillation of rotating flexible structures about nontrivial equilibrium. Leonard Meirovitch and Jer-Nan Juang (JSR) 37
Nutational stability of an asymmetric dual-spin spacecraft. G.T. Tseng (JSR) 488
On the reduction of the eigenvalue problem for spinning axisymmetric structures. Leonard Meirovitch (AIAA J) 150
Passive damper analysis for reducing attitude controller/flexibility interaction. P.C. Hughes (JSR) 271
Perturbation solution of the flat spin recovery of a dual-spin spacecraft. Jean R. Gebman and D. Lewis Mingori (AIAA J) 859
Precession maneuver performed by applying a uniform train of thrust pulses. Masao Furukawa (JSR) 600
Precision star tracker utilizing advanced techniques and materials. R. F. Gates and K.J. McAloon (JSR) 594
Resonances of a two-DOF system on a spin-stabilized spacecraft. Gerald J. Cloutier (AIAA J, TN) 107
Satellite attitude acquisition by momentum transfer. Peter M. Barba and Jean N. Aubrun (AIAA J) 1382
Solid friction damping of mechanical vibrations. Philip R. Dahl (AIAA J) 1675
Spin stability of a satellite equipped with four booms. David A. Levinson and Thomas R. Kane (JSR) 208
Stability analysis of the discrete-data large-space-telescope system. B.C. Kuo, G. Singh, and S.M. Seltzer (JSR) 332
Stability, instability, and terminal attitude motion of a spinning, dissipative spacecraft. Thomas R. Kane and David A. Levinson (AIAA J) 39
Stability of a gyrostat satellite with flexible appendages. Robert A. Calico (JSR, EN) 505
Stability of the infrared Earth horizon at 15μ. James William Hoffman (JSR, EN) 626
Stability of ultimate motion in an attitude control system with unbalanced thrusters. H.A. Kolve and R.N. Clark (JSR, SYN) 513
Stationarity principle for the eigenvalue problem for rotating structures, A. Leonard Meirovitch (AIAA J) 1387
Surface tension propellant acquisition system technology for space shuttle reaction control tanks. Dale A. Fester, Ashton J. Villars, and Preston E. Uney (JSR) 522
Synchronous satellite at less than synchronous altitude. V.A. Chobotov (JSR, EN) 126
Ultrahigh-accuracy body-pointing system for the large space telescope. S. Calvin Rybak, Ronald A. Mayo, Stanley I. Lieberman, and Larry L. Hartter (JSR) 220
Use of calibration maneuvers for improved performance of strap-down attitude reference systems. Kenneth R. Lorell (JSR) 31
Work/energy analysis of bending limit cycles in a deadband attitude control system. Franklin C. Loesch and Calvin Hecht (JSR) 406

Spacecraft Communication Systems

Algerian domestic system. Abdelkader Bairi (PS, V. 41) 273
ATS-6 experimental communications satellite—report on early orbital results. William A. Johnston Jr. (JSR) 91

Comparison of two basic Doppler compensation methods. P.A. Kullstam (PS, V. 42) 263
Constrained lens antenna for multiple-beam satellites, A. H.S. Lu, W.G. Scott, T. Smith, and A. Smoll (PS, V. 42) 25
Correlation study relating spacecraft anomalies to environmental data. A. C. Pike, and M.H. Bunn (PS, V.47) 45
Defense satellite communications system. Gibert E. LaVean (PS, V. 41) 309
Earth station for the U.S.-USSR direct communications link. W.P. Hooper, W.M. Rogers, and J.G. Whitman, Jr. (PS, V. 42) 115
Efficient high-capacity communications satellites. J.H. Hockenberry, D.W. Krejci, W.A. Koenig and J.P. Klocksiem (PS, V. 42) 3
Impact of rain attenuation on 18/30-GHz satellite systems. D. Jarett and L.D. Spilman (PS, V. 42) 291
Intelsat IV-A satellite transmission design. Jack L. Dicks and Martin P. Brown, Jr. (PS, V. 41) 247
Ground simulation of a satellite navigation system, A. John J. Courtney, Jr. and Ivan Kadar (PS, V. 41) 199
Lubricant reservoir systems: Thermal considerations. L.M. Dormant and S. Feuerstein (JSR, EN) 755
Methods of alleviation of ionospheric scintillation effects on digital communications. James L. Massey (PS, V. 42) 279
Modeling and prediction of ionosopheric scintillation. Edward J. Fremouw (PS, V. 42) 367
Nylon pore system. Leon M. Dormant and Seymour Feuerstein (JSR) 306
OTS project: Basis of future European space communication systems. R.C. Collette and B. Stockwell (PS, V. 41) 285
Political constraints influencing communication satellite systems. Gilbert E. LaVean (PS, V. 41) 3
Power balancing in multibeam satellites, H.J. Meyerhoff (PS, V. 41) 55
Satcom system control concepts for increased link availability. A.N. Ince, D.W. Brown, and J.A. Midgley (PS, V. 42) 217
Satellite-switched TDMA: Transponder-switched or beam-switched? William G. Schmidt (PS, V. 41) 139
Single channel per carrier voice transmission via communications satellite. Charles C. Sanderson and Lloyd G. Ludwig (PS, V. 42) 243
Spacecraft-charging investigation for the CTS project. N. John Stevens, Robert R. Lovell, and Victor Gore (PS, V. 47) 263

Spacecraft Configurational and Structural Design (including Loads)

Correlation study relating spacecraft anomalies to environmental data, A. C.P. Pike and M.H. Bunn (PS, V. 47) 45
Evaluation of a cost-effect loads approach. J.A. Garba, B.K. Wada, R. Bamford, and M.R. Trubert (JSR) 675
Evaluation of bead-stiffened metal panels. John L. Shideler, Herman L. Bohon, and Bruce E. Breene (JSR) 144
Evaluation of linearly thickness-tapered booms for some space applications. Rajnish Kumar (JSR, EN) 251
Perturbation solution for the flat spin recovery of a dual-spin spacecraft. Jean R. Gebman and D. Lewis Mingori (AIAA J) 859
Simulation of the plasma sheath surrounding a charged spacecraft. P.L. Rothwell, A.G. Rubin, A.L. Pavel, and L. Katz (PS, V. 47) 121
Skylab workshop experience in experiment accommodation. W.H. Hanlon and R.R. Hassel (PS, V. 48) 29
Solar vs nuclear power: Is there a choice? Bernard Raab and Jay J. Karlin (PS, V. 42) 83
Spacecraft potentials in a substorm environment. G.T. Inouye (PS, V. 47) 103
Spacelab infrared telescope facility (SIRTF). F.C. Witteborn and L.S. Young (JSR) 667

Spacecraft Electric Power Systems

Solar vs nuclear power: Is there a choice? Bernard Raab and Jay J. Karlin (PS, V. 42) 83

Spacecraft Flight Testing

Observations of electrical discharges caused by differential satellite-charging. R.R. Shaw, J.E. Nanevicz, and R.C. Adamo (PS, V. 47) 61
Skylab DO24 thermal control coatings and polymeric films experiment. W.L. Lehn and C.J. Hurley (PS, V. 48) 427
Skylab-induced environment. R.J. Naumann (PS, V. 48) 383
Spacecraft charging at high altitudes: The Scatha satellite program. D.A. McPherson and W.R. Schober (PS, V. 47) 15
Spacecraft charging investigation: A joint research and technology program. Robert Lovell, N. John Stevens, Wayne Schober, C.P. Pike, and William Lehn (PS, V. 47) 3

Spacecraft Ground Testing and Simulation (including Components)

ATS-6 interferometer: A precision, wide-field-of-view attitude sensor. M.A. Teichman, F.L. Marek, J.J. Browning, and A.K. Parr (PS, V. 42) 35
Damping synthesis from substructure tests. T.K. Hasselman (AIAA J) 1409
Development and air bearing test of a double-gimballed momentum wheel attitude-control system. J.J. Kalley, Jr. and H.L. Mork (PS, V. 42) 49
Development of the Viking Mars lander thermal control subsystem design. Theodore F. Morey and David N. Gorman (JSR) 229
Experimental dynamic stability characteristics of a shuttle orbiter at $M_\infty = 8$. Bob L. Uselton, Delma C. Freeman Jr. and Richmond P. Boyden (JSR) 424; (ERR) 635
In-space propellant acquisition with pleated screen tubes. S. Boraas and A.J. LaBruna (JSR) 377
Satcom system control concepts for increased link availability. A.N. Ince, D.W. Brown, and J.A. Midgley (PS, V. 42) 217
Spacecraft charging at high altitudes: The Scatha satellite program. D.A. McPherson and W.R. Schober (PS, V. 47) 15
Spacecraft charging investigation: A joint research and technology program. Robert Lovell, N. John Stevens, Wayne Schober, C.P. Pike, and William Lehn (PS, V. 47) 3
Spacecraft-charging investigation for the CTS project. N. John Stevens, Robert R. Lovell, and Victor Gore (PS, V. 47) 263
Spacecraft material response to geosynchronous substorm conditions. D.K. Hoffmaster and J.M. Sellen, Jr. (PS, V. 47) 185
Spacecraft potentials in a substorm environment. G.T. Inouye (PS, V. 47) 103

Spacecraft Habitability, Crew Training, and Life Support Systems

Skylab workshop experience in experiment accommodation. W.H. Hanlon and R. R. Hassel (PS, V. 48) 29
Students experiments on Skylab. Henry B. Floyd (PS, V. 48) 471

Spacecraft Missions and Economics

Approximate statistics of random vector magnitudes. Hamilton Hagar Jr. (AIAA J, TN) 700
Efficient high-capacity communications satellites. J.H. Hockenberry, D.W. Krejci, W.A. Koenig, and J.P. Klocksiem (PS, V. 42) 3
Evolution of the satellite solar power station (SSPS) concept. Peter E. Glaser (JSR, EN) 573
Generalized design and optimization techniques for satellite communications networks. Alan D. Levit (PS, V. 41) 67
Jupiter orbiter mother/daughter spacecraft concept. John H. Duxbury (JSR, SYN) 259
Noninteger transfer orbits for circular orbit phasing maneuvers. Gordon L. Collyer (JSR, EN) 628
Operational aspects of Skylab. Thomas E. Hanes (PS, V. 48) 3
Phobos and Deimos encounter experiment during the Viking extended mission. Robert H. Tolson, Robert C. Blanchard, and Edward F. Daniels (JSR) 19
Planning and management of science programs on Skylab. Robert A.R. Parker and John R. Sevier (PS, V. 48) 19
Spacecraft radio-occultation techniques for the study of planetary atmospheres. Von R. Eshleman (JSR, TC) 768
Synchronous satellite at less than synchronous altitude. V.A. Chobotov (JSR, EN) 126

Spacecraft Navigation, Guidance, and Flight-Path Control Systems

Barrier in pursuit-evasion problems between two low-thrust orbital spacecraft. G.M. Anderson and V.W. Grazier (AIAA J) 158
Design and analysis of a space sextant for high altitude navigation. Howard A. Garcia and William J. Owen (JSR) 705
Elliptic integral solutions to a class of space flight optimization problems. Jan F. Andrus (AIAA J) 1026
Experimental and simulation study results of an adaptive video guidance system. R.T. Schappell and R.L. Knickerbocker (JSR) 557
Extended Lyapunov stability criterion using a nonlinear algebraic relation with application to adaptive control. Bruce K. Colburn and Joseph S. Boland III (AIAA J) 648
Ground control of drag satellites utilizing onboard accelerometer data. A.J. Fuchs and C.E. Velez (JSR) 188
Improved determination of apogee motor pointing. R.G. Lagowski and R.J. Ferguson (JSR, EN) 55
Inertial navigation performance improvement using gravity gradient matching techniques. Ernest H. Metzger and Albert Jircitano (JSR, SYN) 323
Mariner Jupiter/Saturn 1977 navigation strategy. E.L. McKinley and R.E. Van Allen (JSR) 494
Moment characteristics of liquid injection thrust vector control. Goro Masuya, Nobuo Chinzei, and Shinichi Ishii (JSR, EN) 699
Nonlinear identification in the DISCOS position sensor. P.A. Yansouni and D.B. DeBra (JSR) 26
Statistical analysis of trim maneuvers in low-thrust interplanetary navigation. George C. Rinker, Robert A. Jacobson, and Lincoln J. Wood (JSR, EN) 509

Spacecraft Propulsion Systems Integration

Dynamic characteristics of a 30-cm mercury ion thruster. J.S. Serafini, M.A. Mantenieks, and V.K. Rawlin (JSR) 579
Interplanetary spacecraft design using solar electric propulsion. John H. Duxbury and Gary M. Paul (JSR) 99
Measurements of plasma fluctuations in a 8-cm mercury ion thruster. John S. Serafini and Shigeo Nakanishi (JSR) 692
Solid propellant pulsed plasma propulsion system design. William J. Gunam (JSR) 51
Surface tension propellant acquisition system technology for space shuttle reaction control tanks. Dale A. Fester, Ashton J. Villars, and Preston E. Uney (JSR) 522

Spacecraft Sterilization

Spacecraft neutral self-contamination by molecular outgassing. R.L. Harvey (JSR) 301

Spacecraft Temperature Control Systems

Bubble formation in arteries of gas-controlled heat pipes. A. Abhat, M. Grossl, and M. Hage (PS, V. 49) 461
Calculation of shape factors between parallel ring sectors sharing a common centerline. Charles P. Minning (AIAA J, TN) 813
Capillary flow through heat-pipe wicks. James E. Eninger (PS, V. 49) 435
Compatibility and reliability of heat-pipe materials. A. Basiulis and R.C. Prager (PS, V. 49) 515
Cryogenic and low-temperature heat pipe/cooler studies for spacecraft application. A. Sherman and P. Brennan (JSR) 288
Design parameter for assessing wicking capabilities of heat pipes F.C. Yip (JSR) 237
Development of the Viking Mars lander thermal control subsystem design. Theodore F. Morey and David N. Gorman (JSR) 229
Earth albedo as determined from Skylab data. F. Coyne Prenger Jr. and William C. Patterson (JSR) 244
Evidence for a new discharge mechanism for dielectrics in a plasma. A. Meulenberg, Jr. (PS, V. 47) 237
Fabric coatings: A new technique for spacecraft passive temperature control. A.E. Eagles, S.J. Babjak, and J.H. Weaver (PS, V. 49) 113
General expressions for circular constriction resistances for arbitrary flux distribution. M. Michael Yovanovich (PS, V. 49) 381
General thermal constriction parameter for annular contacts on circular flux tubes. M. Michael Yovanovich (AIAA J, TN) 822
Observations of electrical discharges caused by differential satellite-charging. R.R. Shaw, J.E. Nanevicz, and R.C. Adamo (PS, V. 47) 61
Performance analysis of the advanced thermal control flight experiment. J.P. Kirkpatrick and P.J. Brennan (PS, V. 49) 531
Skylab DO24 thermal control coatings and polymeric films experiment. W.L. Lehn and C.J. Hurley (PS, V. 48) 427
Spacecraft-charging investigation for the CTS project. N. John Stevens, Robert R. Lovell, and Victor Gore (PS, V. 47) 263
Spacecraft-charging studies of voltage breakdown processes on spacecraft thermal control mirrors. R.C. Adamo and J.E. Nanevicz (PS, V. 47) 225
Thermal constriction resistance of contacts on a half-space: Integral formulation. M. Michael Yovanovich (PS, V. 49) 397
Transient heat flow from a thin circular disk. G.E. Schneider, A.B. Strong, and M.M. Yovanovich. (PS, V. 49) 419
Transverse header heat pipe. F. Edelstein (PS, V. 49) 485

Spacecraft Tracking

Design of a ground control system to operate domestic and maritime satellites. A.J.E. van Hover and W.J. Gribbin (PS, V. 42) 201
General geometric theory of attitude determination from directional sensing. Bertrand T. Fang (JSR, SYN) 321
Telesat satellite control system. H. Kowalik (PS, V. 42) 183

Space Medicine (including Weightlessness, Radiation Effects, Psychology, etc.)

In vitro immunology. Todd Alan Meister (PS, V. 48) 495
Relativistic iron in space and its nuclear progeny. Maurice M. Shapiro (PS, V. 48) 251
Students experiments on Skylab. Henry B. Floyd (PS, V. 48) 471

Space Station Systems, Manned

Classification of flares and flarelike events observed during the Skylab mission. V.E. Scherrer and R. Tousey (PS, V. 48) 105
Evolution of the satellite solar power station (SSPS) concept. Peter E. Glaser (JSR, EN) 573
Force-free field analysis of Skylab/Apollo telescope mount S-056 experiment. R.X. Meyer, E.B. Mayfield, J.H. Underwood, D.L. McKenzie, J.E. Milligan, A.C. de Loach, and R.B. Hoover (PS, V. 48) 161
Gravity-gradient effects on the motion of two rotating cable-connected bodies. P.M. Bainum and K.S. Evans (AIAA J) 26
In vitro Immunology. Todd Alan Meister (PS, V. 48) 495
Operational aspects of Skylab. Thomas E. Hanes (PS, V. 48) 3
Preliminary results from the S-056 X-ray telescope experiment aboard the Skylab-Apollo telescope mount. J.H. Underwood, G.A. Chapman, T.J. Janssens, P.B. Landecker, E.B. Mayfield, D.L. McKenzie, J.A. Vorpahl, A.B.C. Walker, Jr., J.E. Milligan, A.C. deLoach, R.B. Hoover, J.G. McGuire, and R.M. Wilson (PS, V. 48) 179
Progeny of Skylab: The pioneering phase of our expansion into space. Harrison H. Schmitt (PS, V. 48) 11
Skylab workshop experience in experiment accommodation. W.H. Hanlon and R.R. Hassel (PS, V. 48) 29
Spacelab infrared telescope facility (SIRTF). F.C. Witteborn and L.S. Young (JSR) 667
XUV sun as observed by ATM SO82, The. Richard Tousey (PS, V. 48) 47

STRUCTURAL MECHANICS AND MATERIALS

Aeroelasticity and Hydroelasticity

Active flutter suppression using trailing-edge and tab control surfaces. E. Nissim (AIAA J) 757
Aeroelasticity—Frontiers and beyond. I.E. Garrick (JA, von Karman Lecture) 641
Application of elasto-plastic finite element analysis to the contact problems of solids. T.R. Hsu and A.W.M. Bertels (AIAA J, TN) 121
Application of holography to panel flutter. David A. Evensen (AIAA J) 1671
Comment on "Practical aspect of the generalized inverse of a matrix." Bertrand T. Fang (AIAA J, TC) 1341
——Reply by author to B.T. Fang. Hermann J. Hassig (AIAA J, TC) 1342
Comment on "Practical aspect of the generalized inverse of a matrix." B.E. Gatewood (AIAA J, TC) 1661
——Reply by author to B.E. Gatewood. Hermann J. Hassig (AIAA J, TC) 1662
Drag effects on wing flutter. Augustin Petre and Holt Ashley (JA) 755
Eigenvalue properties of structural mean-axis systems. R.K. Cavin III, J.W. Howze, and C. Thisayakorn (JA, EN) 382
Elastohydrodynamics of towed slender bodies: The effect of nose and tail shapes on stability. Michael P. Paidoussis and Byung-Kun Yu (JH) 127
Flutter of asymmetrically swept wings. Terrence A. Weisshaar and J.B. Crittenden (AIAA J, SYN) 993
Flutter of thermally buckled finite element panels. T.Y. Yang and A.D. Han (AIAA J, TN) 975
Hydroelastic ichthyoid propulsion. Michael P. Paidoussis (JH, EN) 30
Integrated potential formulation of unsteady supersonic aerodynamics for interacting wings. Kari Appa and W.P. Jones (JA) 695
Optimal aeroelastic design of an oblique wind structure. L.B. Gwin (JA) 364
Passive flutter suppression. Charles W. Ingram and Walter J. Szwarc (JA, EN) 542
Practical design of minimum-weight aircraft structures for strength and flutter requirements. Keith Wilkinson, Edwin Lerner, and Ronald F. Taylor (JA) 614
Repetitive flutter calculations in structural design. Raphael T. Haftka and E. Carson Yates Jr. (JA) 454
Stability analysis of nonlinear differential autonomous systems with applications to flutter. Linda L. Smith and Luigi Morino (AIAA J) 333
Theoretical hydrodynamic coefficients of laterally oscillating profiles at high Froude number. G. Charles C. Smith and Richard P. Shaw (JH) 82
Wake-induced full-span instability of bundle conductor transmission lines. Victor J. Brzozowski and Roger J. Hawks (AIAA J) 179

Hypervelocity Impact

Aerodynamic shattering of ice crystals in hypersonic flight. Girard A. Simons (AIAA J) 1563
Debris shielding in regions of high edge velocity. David H. Smith (AIAA J, TN) 94
Free flight measurements of catastrophic water drop breakup. W.G. Reinecke and W.L. McKay (AIAA J, TN) 1635
Influence of rainfall intensity of erosion of materials at supersonic velocities. George F. Schmitt Jr. (JA, ERR) 320
Interior ballistics of a two-stage light gas gun using velocity interferometry. D.E. Munson and R.P. May (AIAA J) 235
Production of diamonds from graphite using explosive-driven implosions. I.I. Glass and S.P. Sharma (AIAA J, TN) 402
Spacing statistics for particle impacts. Hartley H. King (AIAA J, TN) 1782

Materials, Properties of

Applicability of linear elastic fracture mechanics to 5.6-mil boron/6061 aluminum. J.P. Waszczak (JA) 770
Containerless processing of single crystals in low-gravity environment. H.U. Walter (summary) (PS, V. 48) 463
Corrosion fatigue crack growth in 7050 aluminum alloy extrusions. J.M. Van Orden and D.E. Pettit (JA) 873
Environmental effects on graphite-epoxy fatigue properties. H.T. Sumsion (JSR) 150
Fabric coatings: A new technique for spacecraft passive temperature control. A.E. Eagles, S.J. Babjak, and J.H. Weaver (PS, V. 49) 113
High-purity silica reflective heat-shield development. J.C. Blome, D.N. Drennan, and R.J. Schmitt (PS, V. 49) 131
Influence of rainfall intensity on erosion of materials at supersonic velocities. George F. Schmitt, Jr. (JA, ERR) 320
Inverse design criteria for supersonic internally pressurized polymer domes. Anthony San Miguel (JA) 432
Material and process effects on carbon/carbon composite shear strength. H.O. Davis (JSR) 456
Material models for nonlinear deformation of graphite. Robert M. Jones and Dudley A.R. Nelson Jr. (AIAA J) 709
Metallurgical processing in space. Eugene C. McKannan (summary) (PS, V. 48) 459
Metal melting, joining, and alloying under weightlessness. Robert S. Snyder (summary) (PS, V. 48) 465
On strength functions for orthotropic brittle materials. C.L. Huang (AIAA J, TN) 397
Refractory metal air vane leading edge for ballistic missile defense interceptor. Archie Ossin and Lewis Aronin (AIAA J) 781
Review of subcritical crack growth under sustained load. D.N. Williams (AIAA J) 342
Skylab DO24 thermal control coatings and polymeric films experiment. W.L. Lehn and C.J. Hurley (PS, V. 48) 427
Spacecraft material response to geosynchronous substorm conditions. D.K. Hoffmaster and J.M. Sellen, Jr. (PS, V. 47) 185
Spectrum crack growth analysis using the Willenborg model. Robert M. Engle and James L. Rudd (JA) 462
Stability of liquid dispersions in low gravity. Lewis L. Lacy and Guenther H. Otto (summary) (PS, V. 48) 451
Surface discharges on spacecraft dielectrics in a scanning electron microscope. K.G. Balmain, M. Orszag, and P. Kremer (PS, V. 47) 213
Theoretical-experiment correlation of material models for nonlinear deformation of graphite. Robert M. Jones and Dudley A.R. Nelson, Jr. (AIAA J) 1427

Structural Composite Materials (including Coatings)

Anisotropy and shear deformation in laminated composite plates. Ahmed K. Noor and Michael D. Mathers (AIAA J, TN) 282
Applicability of linear elastic fracture mechanics to 5.6-mil boron/6061 aluminum. J.P. Wasczak (JA) 770
Buckling and postbuckling of orthotropic plates. G.Z. Harris (AIAA J, SYN) 1505
Buckling behavior and structural efficiency of open-section stiffened composite compression panels. Jerry G. Williams and Manuel Stein (AIAA J) 1618
Cantilevered unsymmetric fiber composite laminated plates. Marlin D. Minich and Christos C. Chamis (AIAA J, SYN) 299
Costs and benefits of composite material applications to a civil STOL aircraft. T.R. Logan (JA) 369
Dynamic response of laminated composite plates under initial stress. C.T. Sun and J.M. Whitney (AIAA J, TN) 268
Dynamically induced thermal stresses in composite material, structural panels. A.R. Zak and W.H. Drysdale (JA) 205
Early detection of fatigue damage in composite materials. M.J. Salkind (JA) 764
Environmental effects on graphite-epoxy fatigue properties. H.T. Sumsion (JSR) 150
Fatigue damage analysis and life prediction of laminated metal plates. R.A. Heller, C.T. Liu, and G.W. Swift (AIAA J) 1031
Fatigue failure of angle ply laminates. Assa Rotem and Zvi Hashin (AIAA J) 868
Interlaminar stresses in laminated cylindrical shells of composite materials. T.L. Waltz and J.R. Vinson (AIAA J) 1213
Material models for nonlinear deformation of graphite. Robert M. Jones and Dudley A.R. Nelson Jr. (AIAA J) 709
Metal melting, joining, and alloying under weightlessness. Robert S. Snyder (summary) (PS, V. 48) 465
Nonlinear behavior of unidirectional and angle ply laminates. R.S. Sandhu (JA) 104
On twisting of orthotropic plates in a large deflection regime. Ramesh Chandra (AIAA J, TN) 1130
Optimum design of composite structures with stress and displacement constraints. N.S. Khot, V.B. Venkayya, and L. Berke (AIAA J, SYN) 131
Skylab-induced environment. R.J. Naumann (PS, V. 48) 383
Stochastic properties of enroute air traffic-an empirical investigation. William J. Dunlay Jr. and Robert Horonjeff (JA) 376
Stresses and displacements in rotating anisotropic disks with variable densities. C.I. Chang (AIAA J, TN) 116
Theoretical-experiment correlation of material models for nonlinear deformation of graphite. Robert M. Jones and Dudley A.R. Nelson, Jr. (AIAA J) 1427

Structural Design, Optimal

Application of optimality criteria to automated structural design. M.W. Dobbs and R.B. Nelson (AIAA J) 1436
Applications of a quadratic extended interior penalty function for structural optimization. Raphael T. Haftka and James H. Starnes Jr. (AIAA J) 718
Buckling and failure of flat stiffened panels. S. Yusuff (JA) 198
Buckling behavior and structural efficiency of open-section stiffened composite compression panels. Jerry G. Williams and Manuel Stein (AIAA J) 1618
Comment on "Optimization of ring stiffened cylindrical shells." M. Pappas (AIAA J, TC) 1790
——Reply by authors to M. Pappas. A.J. Bronowicki, R.B. Nelson, L.P. Felton, L.A. Schmit, Jr. (AIAA J, TC) 1791
Comment on "Perturbation method of structural design relevant to holographic vibration analysis." Alexander H. Flax (AIAA J, TC) 416
——Reply by author to A.H. Flax. Karl A. Stetson (AIAA J, TC) 416
Derivatives of a statically reduced stiffness matrix with respect to sizing variables. R.F. O'Connell, H.J. Hassig, and N.A. Radovcich (JA, EN) 59
Disjoint design spaces in the optimization of harmonically excited structures. Erwin H. Johnson (AIAA J, TN) 259
Dynamic beam model with internal damping rotatory inertia and shear deformation. Clarence Wilfred de Silva (AIAA J) 676
Evaluation of bead-stiffened metal panels. John L. Shideler, Herman L. Bohon, and Bruce E. Greene (JSR) 144
Method for the optimum design of truss-type structures. Ghiath Taleb-Agha and Richard B. Nelson (AIAA J) 436
Minimum weight design of an orthogonally stiffened waffle cylindrical shell with buckling constraint. Kazuo Kunöo and T.Y. Yang (JSR) 137
Minimum weight design of axisymmetric sandwich plates. Dale W. Alspaugh and S.N. Huang (AIAA J) 1683
New structural analysis/synthesis capability—ACCESS 1, A. L.A. Schmit and H. Miura (AIAA J) 661
On optimum design of prestressed beam structures. Lewis P. Felton (AIAA J, TN) 392
Optimal aeroelastic design of an oblique wing structure. L.B. Gwin (JA) 364
Optimum design of composite structures with stress and displacement constraints. N.S. Khot, V.B. Venkayya, and L. Berke (AIAA J, SYN) 131
Optimization of continuous one-dimensional structures under steady harmonic excitation. Erwin H. Johnson, Paulo Rizzi, Holt Ashley and Solly A. Segenreich (AIAA J) 1690
Practical design of minimum-weight aircraft structures for strength and flutter requirements. Keith Wilkinson, Edwin Lerner, and Rondla dF. Taylor (JA) 614
Repetitive flutter calculations in structural design. Raphael T. Haftka and E. Carson Yates Jr. (JA) 454
Resizing procedure for structures under combined mechanical and thermal loading. Howard M. Adelman and R. Narayanaswami (AIAA J, TN) 1484
Simplified calculation of eigenvector derivatives. Richard B. Nelson (AIAA J) 1201
Structural optimization under combined blast and acoustic loading. S.S. Rao (AIAA J, TN) 276
Theory of adjoint structures. H. Van Belle (AIAA J, TN) 977
Three-dimensional optimization of a gas turbine disk and blade attachment. R.G. Alderson, M.A. Tani, D.J. Tree, and R.J. Hill (JA) 994

Structural Dynamic Analysis

Aerodynamic shattering of ice crystals in hypersonic flight. Girard A. Simons (AIAA J) 1563
Aeroelasticity—Frontiers and beyond. I.E. Garrick (JA, von Karman Lecture) 641
Alternative formulations for discrete gyroscopic eigenvalue problems. Raymond H. Plaut (AIAA J) 431
Appendage modal coordinate truncation criteria in hybrid coordinate dynamic analysis. Peter Likins, Yoshiaki Ohkami, and Chung Wong (JSR) 611
Application of holography to panel flutter. David A. Evensen (AIAA J) 1671
Axisymmetric vibrations of polar orthotropic circular plates. Gangan Prathap and T.K. Varadan (AIAA J, TN) 1639
Bounds for the critical load of certain elastic systems under follower forces. C. Sundararajan (AIAA J, TN) 690
Cantilevered unsymmetric fiber composite laminated plates. Marlin D. Minich and Christos C. Chamis (AIAA J, SYN) 299

Comment on "Application of Hamilton's law of varying action." Arthur E. Bryson Jr. (AIAA J, TC) 1340
——Reply by author to A.E. Bryson Jr. Cecil D. Bailey (AIAA J, TC) 1341
Comment on "Optimization of ring stiffened cylindrical shells." M. Pappas (AIAA J, TC) 1790
——Reply by authors to M. Pappas. A.J. Bronowicki, R.B. Nelson, L.P. Felton, L.A. Schmit, Jr. (AIAA J, TC) 1791
Comment on "Perturbation method of structural design relevant to holographic vibration analysis." Alexander H. Flax (AIAA J, TC) 416
——Reply by author to A.H. Flax. Karl A. Stetson (AIAA J, TC) 416
Damping synthesis from substructure tests. T.K. Hasselman (AIAA J) 1409
Digital generation of random forces for large-scale experiments. M. Shinozuka, R. Vaicaitis, and H. Asada (JA) 425
Disjoint design spaces in the optimization of harmonically excited structures. Erwin H. Johnson (AIAA J, TN) 259
Dynamic beam model with internal damping rotatory inertia and shear deformation. Clarence Wilfred de Silva (AIAA J) 676
Dynamic response of laminated composite plates under initial stress. C.T. Sun and J.M. Whitney (AIAA J, TN) 268
Dynamically induced thermal stresses in composite material, structural panels. A.R. Zak and W.H. Drysdale (JA) 205
Dynamics of a crash victim—A finite segment model. Ronald L. Huston, Richard E. Hessel, and James M. Winget (AIAA J) 173
Efficiency of human power production by vertical pumping. William J. Anderson and Earl F. Weener (JA) 413
Eigenvalue properties of structural mean-axis systems. R.K. Cavin III, J.W. Howze, and C. Thisayakorn (JA, EN) 382
Estimation of the fundamental frequency of beams and plates with varying thickness. Franklin E. Eastep (AIAA J, TN) 1647
Evaluation of a cost-effective loads approach. J.A. Garba, B.K. Wada, R. Bamford, and M.R. Trubert (JSR) 675
Flexural study of a neutrally buoyant inflated viscoelastic-structural member. A.K. Misra and V.J. Modi (JH) 18
Fluid-structure finite element vibrational analysis. L. Kiefling and G.C. Fent (AIAA J) 199
Formulation of the global equations of motion of a deformable body. Thomas B. McDonough (AIAA J) 656; (ERR) 1663
Free-interface methods of substructure coupling for dynamic analysis. Roy R. Craig, Jr. and Ching-Jone Chang (AIAA J, TN) 1633
Free vibration of curved skew panels. R.S. Srinivasan and K. Munaswamy (AIAA J TN) 243
Inelastic response of ring-stiffened cylindrical shells to external pressure shock waves. L.H.N. Lee and J.T. Horng (AIAA J) 327
Iterative analysis method for structural components with diverse stiffnesses. I.U. Ojalvo, F. Austin, and A. Levy (AIAA J) 1219
Iterative procedure for determining limit cycles using Lagrangian mechanics, An. John E. Prussing and Jack C. Wiley (AIAA J) 320
Inversion of first-order perturbation theory and its application to structural design. Karl A. Stetson and Gary E. Palma (AIAA J) 454
Large amplitude free vibrations of tapered beams. L.S. Raju, G. Venkateswara Rao, and K. Kanaka Raju (AIAA J, TN) 280
Modal analysis of rotating flexible structures. Robert M. Laurenson (AIAA J) 1444
Modal coupling in lightly damped structures. T.K.Hasselman (AIAA J, TN) 1627
Natural frequencies of a cantilever with slender tip mass. Rama Bhat and M. Avinash Kulkarni (AIAA J, TN) 536
Natural modes of oscillation of rotating flexible structures about nontrivial equilibrium. Leonard Meirovitch and Jer-Nan Juang (JSR) 37
Nonlinear vibrations of beams considering shear deformation and rotary inertia. G. Venkateswara Rao, I.S. Raju, and K. Kanaka Raju (AIAA J, TN) 685
On the reduction of the eigenvalue problem for spinning axisymmetric structures. Leonard Meirovitch (AIAA J) 150
Optimization of continuous one-dimensional structures under steady harmonic excitation. Erwin H. Johnson, Paulo Rizzi, Holt Ashley and Solly A. Segenreich (AIAA J) 1690
Orthogonality check and correction of measured modes. W.P. Targoff (AIAA J) 164
Practical design of minimum-weight aircraft structures for strength and flutter requirements. Keith Wilkinson, Edwin Lerner, and Ronald F. Taylor (JA) 614
Prediction of payload vibration environments by mechanical admittance test techniques. Daniel D. Kana and Luis M. Vargas (JSR) 45
Response of infinite thin shells to initial stress, The. I.G. Cameron (AIAA J, TN) 1478
Simplified calculation of eigenvector derivatives. Richard B. Nelson (AIAA J) 1201
Solid friction damping of mechanical vibrations. Philip R. Dahl (AIAA J) 1675
Stability of gyrostat satellite with flexible appendages. Robert A. Calico (JSR, EN) 505
Stationarity principle for the eigenvalue problem for rotating structures, A. Leonard Meirovitch (AIAA J) 1387
Symmetric stiffness matrix for incompressible hyperelastic materials. Takao Takamatsu, James A. Stricklin, and John E, Key (AIAA J, TN) 414
Vertical motion of a buoy-cable-array system used in submarine detection. V.J. Modi and A.K. Misra (JH) 74
Vibration analysis of multi-symmetric structures. David A. Evensen (AIAA J) 446
Vibration of orthogonally stiffened waffle cylinders subjected to initial forces. Mirza I. Baig and T.Y. Yang (JSR) 618
Vibrations of a stiffened capped cylinder. J.M. Klosner, M.L. Pollack, and Y.N. Chen (AIAA J, SYN) 833

Structural Stability Analysis

Accurate prediction of critical conditions for shear-loaded panels. George J. Simitses and Izhak Sheinman (AIAA J, TN) 683
Bounds for the critical load of certain elastic systems under follower forces. C. Sundararajan (AIAA J, TN) 690
Buckling and failure of flat stiffened panels. S. Yusuff (JA) 198
Buckling and postbuckling of orthotropic plates. G.Z. Harris (AIAA J, SYN) 1505
Buckling of cylinders of variable thickness under lateral pressure. S.K. Radhamohan and A.V. Setlur (AIAA J, TN) 92
Buckling of oval cylindrical shells under compression and asymmetric bending. Y.N. Chen and Joseph Kempner (AIAA J) 1235
Displacement field in the nonlinear theory of shells. M.S. El Naschie (AIAA J, TN) 1785
Evaluation of bead-stiffened metal panels. John L. Shideler, Herman L. Bohon, and Bruce E. Greene (JSR) 144
Flutter of thermally buckled finite element panels. T.Y. Yang and A.D. Han (AIAA J, TN) 975
Force/stiffness technique for nondestructive buckling testing. Robert E. Jones and Bruce E. Greene (JA) 262
Imperfection sensitivity and isoperimetric variational problems in stability theory. M.S. El Naschie and T.M.M. Jamjoom (JSR, EN) 761
Influence of loading behavior on the post buckling of circular rings. M.S. El Naschie and Amr El Nashai (AIAA J, TN) 266
Initial and post buckling of axially compressed orthotropic cylindrical shells. M.S. El Naschie (AIAA J, TN) 1502
Isogrid structural tests and stability analyses. P. Slysh, J.E. Dyer, J.H. Furman, and J.E. Key (JA) 778
Minimum weight design of an orthogonally stiffened waffle cylindrical shell with buckling constraint. Kazuo Kunoo and T.Y. Yang (JSR) 137
Missile stability using finite elements—an unconstrained variational approach. Julian J. Wu (AIAA J) 313
On the buckling of shallow spherical caps subjected to uniform external pressure. G.D. Galletly (AIAA J, TN) 1331
On the buckling of stiffened imperfect cylindrical shells. J. Arbocz and E.E. Sechler (AIAA J) 1611
Rapid analysis of damaged structure. Harold Switzky (AIAA J, TN) 1139
Review of some tilt-rotor aeroelastic research at NASA-Langley, A. Raymond G. Kvaternik (JA) 357
Review of subscritical crack growth under sustained load. D. N. Williams (AIAA J) 342
Solution bounds to structural systems. V.R. Murthy and T.J. McDaniel (AIAA J, TN) 111
Stability analysis of nonlinear differential autonomous systems with applications to flutter. Linda L. Smith and Luigi Morino (AIAA J) 333
Timoshenko's conjecture on buckling of annular plates under uniform external pressure. G.K. Ramaiah and K. Vijayakumar (AIAA J, TN) 1480
Vibration of orthogonally stiffened waffle cylinders subjected to initial forces. Mirza I. Baig and T.Y. Yang (JSR) 618

Structural Static Analysis

Anisotropy and shear deformation in laminated composite plates. Ahmed K. Noor and Michael D. Mathers (AIAA J, TN) 282
Applicability of linear elastic fracture mechanics to 5.6-mil boron/6061 aluminum. J.P. Waszczak (JA) 770
Application of elasto-plastic finite element analysis to the contact problems of solids. T.R. Hsu and A.W.M. Bertels (AIAA J, TN) 121
Asymmetric stress analysis of axisymmetric solids with rectangularly orthotropic properties. Gerard C. Pardoen, Anthony D. Falco, and James G. Crose (AIAA J) 1419
Buckling and postbuckling behavior of shallow shells. R.S. Srinivasan and W. Bobby (AIAA J, SYN) 289
Buckling of oval cylindrical shells under compression and asymmetric bending. Y.N. Chen and Joseph Kempner (AIAA J) 1235
Cantilevered unsymmetric fiber composite laminated plates. Marlin D. Minich and Christos C. Chamis (AIAA J, SYN) 299
Comment on "Buckling of open cylindrical shells with torsionally stiff rectangular edge stiffeners." A. V. Viswanathan and M. Tamekuni (AIAA J, TC) 126
——Reply by author to A.V. Viswanathan and M. Tamekuni. G. Krishnamoorthy (AIAA J, TC) 126

Convergence of an iterative procedure for large-scale static analysis of structural components. F. Austin and I.U. Ojalvo (AIAA J, TN) 104
Derivatives of a statically reduced stiffness matrix with respect to sizing variables. R.F. O'Connell, H.J. Hassig, and N.A. Radovcich (JA, EN) 59
Fatigue damage analysis and life prediction of laminated metal plates. R.A. Heller, C.T. Liu, and G.W. Swift (AIAA J) 1031
Finite contact of an inflated ring. D.W. Nicholson (AIAA J, TN) 815
Fracture considerations for surveillance programs. Eugene C. Francis and Harold R. Jacobs (JSR) 451
Governing equations for large deflections of sandwich plates. N. Kamiya (AIAA J, TN) 250
Inflation of a viscoelastic ellipsoidal neo-Hookean membrane. William W. Feng (AIAA J) 672
In-plane stresses in edge stiffened swept panels. B. Dattaguru and A.K. Rao (AIAA J) 1038
Interlaminar stresses in laminated cylindrical shells of composite materials. T.L. Waltz and J.R. Vinson (AIAA J) 1213
Iterative analysis method for structural components with diverse stiffnesses. I.U. Ojalvo, F. Austin, and A. Levy (AIAA J) 1219
Material models for nonlinear deformation of graphite. Robert M. Jones and Dudley A.R. Nelson Jr. (AIAA J) 709
New structural analysis/synthesis capability—ACCESS 1, A. L.A. Schmit and H. Miura (AIAA J) 661
Notes on finite elements for nearly incompressible materials. T.H.H. Pian and S.W. Lee (AIAA J, TN) 824
On optimum finite element grid configurations. David Turcke (AIAA J, TN) 264
Rapid analysis of damaged structure. Harold Switzky (AIAA J, TN) 1139
Response of infinite thin shells to initial stress, The. I.G. Cameron (AIAA J, TN) 1478
Static deflection of beams subjected to elastic rotational restraints. Esam M. Nassar and Wilfred H. Horton (AIAA J, TN) 122
Stress concentration in the plastic range. A.N. Sherbourne and H.M. Haydl (AIAA J, TN) 1628
Stresses and displacements in rotating anisotropic disks with variable densities. C.I. Chang (AIAA J, TN) 116
Symmetric stiffness matrix for incompressible hyperelastic materials. Takao Takamatsu, James A. Stricklin, and John E. Key (AIAA J, TN) 414
Theoretical-experimental correlation of material models for nonlinear deformation of graphite. Robert M. Jones and Dudley A.R. Nelson, Jr. (AIAA J) 1427
Thermoviscoelastic analysis of axisymmetric solid propellant grains. G.V. Sankaran and M.K. Jana (JSR, SYN) 641

Thermal Stresses

Convergence of an iterative procedure for large-scale static analysis of structural components. F. Austin and I. U. Ojalvo (AIAA J, TN) 104
Dynamically induced thermal stresses in composite material, structural panels. A.R. Zak and W.H. Drysdale (JA) 205
Iterative analysis method for structural components with diverse stiffnesses. I.U. Ojalvo, F. Austin, and A. Levy (AIAA J) 1219
On thermally induced non-fourier stress waves in a semi-infinite medium. Tsai-Tse Kao (AIAA J, TN) 818
Resizing procedure for structures under combined mechanical and thermal loading. Howard M. Adelman and R. Narayanaswami (AIAA J, TN) 1484

THERMOPHYSICS AND THERMOCHEMISTRY

Atomic, Molecular, and Plasma Properties

Classification of flares and flarelike events observed during the Skylab mission. V.E. Scherrer and R. Tousey (PS, V. 48) 105
Conical electrostatic probe response in a weakly ionized gas flow. C.F. Bruce and L. Talbot (AIAA J) 77
Influence of fluctuations on electron beam diagnostics. S.S. Lazdinis (AIAA J, SYN) 133
Mathematical description of gas-surface interactions based on reciprocity, A. Max Kinslow (AIAA J) 1358
Radiation measurements behind 8-12 km/sec shock waves in air and a $CO_2 + N_2$ mixture. V.A. Volkov, V.V. Zhurin, A.B. Karasev, and B.K. Tkachenko (AIAA J) 371
Substorm-induced spacecraft-charging currents from field-aligned and omnidirectional particles. J.L. Vogl, N.L. Sanders, and S.E. DeForest (PS, V. 47) 77
Theory of the spherically symmetric photoelectron sheath and comparison with the ATS-6 observation of a potential barrier. E.C. Whipple, Jr. (PS, V. 47) 135
XUV sun as observed by ATM SO82, The. Richard Tousey (PS, V. 48) 47

Heat Conduction

Analytical models for lunar soil thermal conductivity. C.L. Tien and A.L. Nayak (PS, V. 49) 351
Approximate calculation of transient heat conduction. Tse-Fou Zien (AIAA J, TN) 404
Bubble formation in arteries of gas-controlled heat pipes. A. Abhat, M. Groll, and M. Hage /PS, V. 49) 461
Comment on "Explicit numerical method for solution of heat-transfer problems." John D. Randall (AIAA J, TC) 127
Comment on "On transient cylindrical surface heat flux predicted from interior temperature response." Murray Imber (AIAA J, TC) 542
——Reply by author to M. Imber. C.J. Chen (AIAA J, TC) 543
Compatibility and reliability of heat-pipe materials. A. Basiulis and R.C. Prager (PS, V. 49) 515
Correction factor for heat flux in an expansion nozzle. J. Reinkenhof and R. Schmucker (JSR, EN) 63
Finite-element solution for radiative-conductive analyses with mixed diffuse-specular surfaces. Hwa-Ping Lee and Clifton E. Jackson Jr. (PS, V. 49) 25
Freezing and melting of materials with variable properties and arbitrary heat fluxes. B.T.F. Chung and L.T. Yeh (AIAA J, TN) 388
General expressions for circular constriction resistances for arbitrary flux distribution. M. Michael Yovanovich (PS, V. 49) 381
General thermal constriction parameter for annular contacts on circular flux tubes. M. Michael Yovanovich (AIAA J, TN) 822
Glass solar heat collector development. R.B. Gillette, C. Deminet, and W.D. Beverly (PS, V. 49) 291
Laser melt through time reduction due to aerodynamic melt removal. J.D. O'Keefe and R.L. Johnson (AIAA J 776
Observations of the liquid/solid interface in low-gravity melting. Guenther H. Otto and Lewis L. Lacy (summary) (PS, V. 48) 455
On thermally induced non-fourier stress waves in a semi-infinite medium. Tsai-Tse Kao (AIAA J, TN) 818
Predictions of melt-through times for laser heating. Peter J. Torvik (AIAA J, SYN) 417
Radiative ablation of melting solids. Anant Prasad and S.N. Sinha (AIAA J, TN) 1494
Thermal conductance and thermal conductivity of selected polyethylene materials. L.S. Fletcher, M.R. Cerza, and R.L. Boysen (PS, V. 49) 371
Thermal constriction resistance of contacts on a half-space: Integral formulation. M. Michael Yovanovich (PS, V. 49) 397
Transient heat flow from a thin circular disk. G.E. Schneider, A.B. Strong, and M.M. Yovanovich. (PS, V. 49) 419
Transient temperature distortion in a slab due to thermocouple cavity. Ching Jen Chen and Truong Minh Danh (AIAA J, TN) 979

Heat Pipes

Measurements of the performance of an electrohydrodynamic heat pipe. R.I. Loehrke and R.J. Debs (PS, V. 49) 503

Liquid and Solid Thermophysical Properties

Analytical models for lunar soil thermal conductivity. C.L. Tien and A.L. Nayak (PS, V. 49) 351
Evaportation, diffusion and convection in containerless melts at low gravity. Alan L. Dragoo and Robert C. Paule (AIAA J, SYN) 135
Focusing properties and operation of a hemiellipsoidal mirror infrared reflectometer. B.E. Wood, J.G. Pipes, A.M. Smith, and J.A. Roux (PS, V. 49) 47
Freezing and melting of materials with variable properties and arbitrary heat fluxes. B.T.F. Chung and L.T. Yeh (AIAA J, TN) 388
Investigation of bidirectional reflection from infrared diffuser surfaces, An. B.E. Wood and A.M. Smith (PS, V. 49) 67
Lubricant reservoir systems: Thermal considerations. L.M. Dormant and S. Feuerstein (JSR, EN) 755
Nylon pore system. Leon M. Dormant and Seymour Feuerstein (JSR) 306
Observations of the liquid/solid interface in low-gravity melting. Guenther H. Otto and Lewis L. Lacy (summary) (PS, V. 48) 455
Stability of liquid dispersions in low gravity. Lewis L. Lacy and Guenther H. Otto (summary) (PS, V. 48) 451
System for the measurement of spectral emittance at high temperature. James O. Hylton and Robert L. Reid (AIAA J) 1303
Thermal conductance and thermal conductivity of selected polyethylene materials. L.S. Fletcher, M.R. Cerza, and R.L. Boysen (PS, V. 49) 371

Material Ablation

Effects of atomic oxygen on graphite ablation. Chul Park (AIAA J, TN) 1640
Effects of propellant and electrode geometry on pulsed ablative plasma thruster performance. D.J. Palumbo and W.J. Guman (JSR) 163
Erosive effects of high-pressure combustion gases on steel alloys. A.C. Alkidas, S.O. Morris, and M. Summerfield (JSR) 461
Laser melt through time reduction due to aerodynamic melt removal. J.D. O'Keefe and R.L. Johnson (AIAA J) 776
Quantum statistical analysis of surface sputtering. H.E. Wilhelm (JSR, EN) 116

Radiative ablation of melting solids. Anant Prasad and S.N. Sinha (AIAA J, TN) 1494
Radiative heating environments for Jovian entry conditions. William E. Nicolet (PS, V. 49) 231
Refractory metal air vane leading edge for ballistic missile defense interceptor. Archie Ossin and Lewis Aronin (AIAA J) 781
Spacing statistics for particle impacts. Hartley H. King (AIAA J, TN) 1782
Tungsten and molybdenum ablation modeling for re-entry applications. H.L. Moody, D.H. Smith, R.L. Haddock, and S.S. Dunn (JSR) 746

Radiation and Radiative Heat Transfer

Analytical models for lunar soil thermal conductivity. C.L. Tien and A.L. Nayak (PS, V. 49) 351
Angular distribution of radiation reflected from roughened spheres. D.C. Look and B.W. Rau (AIAA J, TN) 1772
Anisotropic radiatively coupled wedge flow. James B. Elgin and Judson R. Baron (AIAA J, TN) 1492
Arc heater performance on hydrogen, helium, or air. J.H. Painter and J.F. Schaeffer (AIAA J, SYN) 1161
Atmospheric entry into Jupiter's atmosphere in view of recent flyby results. Philip R. Nachtsheim, Edward Tindle, and John T. Howe (JSR, EN) 120
Band models and correlations for infrared radiation S.N. Tiwari (PS, V. 49) 155
Basic spectrophotometric measures of air quality over long paths. J.S. Hall and L.A. Riley (PS, V. 49) 205
Bidirectional reflectance and transmittance of a scattering-absorbing medium with a rough surface. J.E. Rogers and D.K. Edwards (PS, V. 49) 3
Calculation of shape factors between parallel ring sectors sharing a common centerline. Charles P. Minning (AIAA J, TN) 813
Comment on "Gardon heat gage temperature response." Alexander H. Flax (AIAA J, TC) 830
——Reply by authors to A.H. Flax, J.P. Kita, and A.L. Laganelli (AIAA J, TC) 832
Degradation of low-scatter mirrors by particle contamination. R.P. Young (PS, V. 49) 85
Finite difference method for solving anisotropic scattering problems. A. Bruce R. Barkstrom (PS, V. 49) 183
Finite-element solution for radiative-conductive analyses with mixed diffuse-specular surfaces. Hwa-Ping Lee and Clifton E. Jackson Jr. (PS, V. 49) 25
Focusing properties and operation of a hemiellipsoidal mirror infrared reflectometer. B.E. Wood, J.G. Pipes, A.M. Smith, and J.A. Roux (PS, V. 49) 47
High-purity silica reflective heat-shield development. J.C. Blome, D.N. Drennan, and R.J. Schmitt (PS, V. 49) 131
Investigation of bidirectional reflection from infrared diffuser surfaces, An. B.E. Wood and A.M. Smith (PS, V. 49) 67
Ionizational nonequilibrium heating during outer planetary entries. Lewis P. Leibowitz and Ta-Jin Kuo (AIAA J) 1234
Observations of the liquid/solid interface in low-gravity melting. Guenther H. Otto and Lewis L. Lacy (summary) (PS, V. 48) 455
Predicted radiation trails from small artificial meteors. T. Dwayne McCay and Kenneth E. Harwell (PS, V. 49) 213
Radiation from an array of longitudinal fins of triangular profiles. N.M. Schnurr (AIAA J, ERR) 1343
Radiative cooling of a hydrogen plasma in a shock tube. George H. Stickford Jr. (AIAA J) 421
Radiative heating environments for Jovian entry conditions. William E. Nicolet (PS, V. 49) 231
Radiative transfer technique for studying natural convection in a porous medium, A. Lawrence A. Kennedy (PS, V. 49) 97
Second-order approximation for radiative heat transfer between simple two-dimensional surfaces. W.D. Turner and J. Camacho-Almonte (AIAA J, SYN) 5
Solar collector performance prediction from solar simulator tests. Frederick F. Simon and Edgar H. Buyco (PS, V. 49) 325
System for the measurement of spectral emittance at high temperature. James O. Hylton and Robert L. Reid (AIAA J) 1303
Transient temperature distortion in a slab due to thermocouple cavity. Ching Jen Chen and Truong Minh Danh (AIAA J, TN) 979
Trapezoidal grooves as moderately concentrating solar energy collectors. John R. Howell and Richard B. Bannerot (PS, V. 49) 277
Two-dimensional radiative equilibrium: A simple nongray problem. A.L. Crosbie (AIAA J, TN) 1649
Viscous-shock-layer solutions with radiation and ablation injection for Jovian entry. James N. Moss, E. Clay Anderson, and Charles A. Bolz Jr. (PS, V. 49) 251

Thermal Modeling and Experimental Thermal Simulation

Bubble formation in arteries of gas-controlled heat pipes. A. Abhat, M. Groll, and M. Hage (PS, V. 49) 461
Earth albedo as determined from Skylab data. F. Coyne Prenger Jr. and William C. Patterson (JSR) 244
General expressions for circular constriction resistances for arbitrary flux distribution. M. Michael Yovanovich (PS, V. 49) 381
General thermal constriction parameter for annular contacts on circular flux tubes. M. Michael Yovanovich (AIAA J, TN) 822
Glass solar heat collector development. R.B. Gillette, C. Deminet, and W.D. Beverly (PS, V. 49) 291
Numerical modeling of flat-plate solar collectors. P.R. Smith and M.H. Cobble (PS, V. 49) 315
Performance analysis of the advanced thermal control flight experiment. J.P. Kirkpatrick and P.J. Brennan (PS, V. 49) 531
Performance study of a ballistic compressor. A.C. Alkidas, E.G. Plett, and M. Summerfield (AIAA J) 1752
Radiative transfer technique for studying natural convection in a porous medium, A. Lawrence A. Kennedy (PS, V. 49) 97
Solar collector performance prediction from solar simulator tests. Frederick F. Simon and Edgar H. Buyco (PS, V. 49) 325
Thermal constriction resistance of contacts on a half-space: Integral formulation. M. Michael Yovanovich (PS, V. 49) 397
Transient heat flow from a thin circular disk. G.E. Schneider, A.B. Strong, and M.M. Yovanovich. (PS, V. 49) 419
Transient temperature distortion in a slab due to thermocouple cavity. Ching Jen Chen and Truong Minh Danh (AIAA J, TN) 979
Trapezoidal grooves as moderately concentrating solar energy collectors. John R. Howell and Richard B. Bannerot (PS, V. 49) 277

Thermal Surface Properties

Bidirectional reflectance and transmittance of a scattering-absorbing medium with a rough surface. J.E. Rogers and D.K. Edwards (PS, V. 49) 3
Degradation of low-scatter mirrors by particle contamination. R.P. Young (PS, V. 49) 85
Determination of stagnation chamber temperature in high-enthalpy nozzle flows. Nimai Kuma Mitra and Martin Fiebig (AIAA J, TN) 406
Effective thermal property improves phase change paint data. John Philip Drummond, Robert A. Jones, and Robert L. Ash (AIAA J, TN) 1476
Focusing properties and operation of a hemiellipsoidal mirror infrared reflectometer. B.E. Wood, J.G. Pipes, A.M. Smith, and J.A. Roux (PS, V. 49) 47
Fabric coatings: A new technique for spacecraft passive temperature control. A.E. Eagles, S.J. Babjak, and J.H. Weaver (PS, V. 49) 113
High-purity silica reflective heat-shield development. J.C. Blome, D.N. Drennan, and R.J. Schmitt (PS, V. 49) 131
Investigation of bidirectional reflection from infrared diffuser surfaces, An. B.E. Wood and A.M. Smith (PS, V. 49) 67
Solar absorptance of second surface mirrors for high angles of incidence. James W. Stultz (JSR, EN) 57
Spacecraft material response to geosynchronous substorm conditions. D.K. Hoffmaster and J.M. Sellen, Jr. (PS, V. 47) 185
System for the measurement of spectral emittance at high temperature. James O. Hylton and Robert L. Reid (AIAA J) 1303

Thermochemistry and Chemical Kinetics

Absolute fluorine atom detection by gasification of boron nitride. David A. Winborne and Paul C. Nordine (AIAA J, TN) 1488
Assessment of potential impact of stratospheric flight on earth's ultraviolet irradiance. Henry Hidalgo (AIAA J, SA) 137; (ERR) 1344
Condensed phase heat of reactions of phenol-formaldehyde composite propellants. H.L. Girdhar and A.J. Arora (AIAA J, TN) 1776
Correction for finite quenching rates in shock-induced methane pyrolysis. Jerry Lee Hall and John Herrin (AIAA J, SYN) 1515
Effect of neutron radiation on the vaporization of ammonium perchlorate. J. Richard Ward and Joseph J. Rocchio (AIAA J, TN) 267
Effects of atomic oxygen on graphite ablation. Chul Park (AIAA J, TN) 1640
Evaporation, diffusion and convection in containerless melts at low gravity. Alan L. Dragoo and Robert C. Paule (AIAA J, SYN) 135
Generalized steady-state method for stiff equations. J.W. Hiestand and A.R. George (AIAA J, SYN) 1153
Heterogeneous fluorine atom recombination/reaction on several materials of construction. Paul C. Nordine and Jane D. LeGrange (AIAA J) 644
Ionizational nonequilibrium heating during outer planetary entries. Lewis P. Leibowitz and Ta-Jin Kuo (AIAA J) 1324
Nitric oxide formation in combustion. H.F. Nelson (AIAA J) 1177
Nylon pore system. Leon M. Dormant and Seymour Feuerstein (JSR) 306
Optimal strategies in the neighborhood of a collision course. S. Gutman and G. Leitmann (AIAA J) 1210
Power calculations for high-flow CO electric discharge laser systems. Neill S. Smith and H.A. Hassan (AIAA J) 374

Predicted exhaust emissions from a methanol and jet fueled gas turbine combustor. H.G. Adelman, L.H. Browning, and R.K. Pefley (AIAA J) 793
Simplified modeling of multiquantum deactivation reactions. George Emanual (AIAA J, TN) 1124
Solution technique for equilibrium chemistry of hydrogen-oxygen systems. David F. Dyer and Glennon Maples (AIAA J, TN) 1652
Stability of liquid dispersions in low gravity. Lewis L. Lacy and Guenther H. Otto (summary) (PS, V. 48) 451
Technique for atmospheric rate chemistry calculations. Gregory L. Matloff (AIAA J, TN) 987

Information for Contributors to Journals of the AIAA

General Requirements: Send all manuscripts, with covering letter, to the Assistant Director, Scientific Publications, AIAA, 1290 Avenue of the Americas, New York, N.Y. 10019. Each manuscript must be accompanied by written assurance as to security clearance in the event the subject matter lies in a classified area or if the paper originates under government sponsorship. Full responsibility rests with the author. Signed assurance must be given that the manuscript or its equivalent *has not been submitted for publication elsewhere.* The AIAA has prior publication rights to any paper presented at its meetings, but preprints will be considered for publication only if the author requests it. All manuscripts must be as *brief and concise* as proper presentation of the ideas will allow.

Send 4 complete copies of each manuscript and 4 sets of figures. The manuscript must be in English, typed *double spaced* on one side of the page only, with wide margins to allow for editorial instructions. Footnotes, references, and figure captions also should be typed double spaced. Use standard-size (8½- × 11-in.) good-quality bond paper.

Synoptics: Alternatively, and at his option, an author may submit a Synoptic. Many subjects can be covered in a more useful and economical form for the majority of readers as a Synoptic, not exceeding 8 double-spaced typed pages (2 journal pages), with two major headings: *Theme,* which describes the purpose of the papers; and *Contents,* which is a concise but self-sufficient presentation of the key results in a form that readers can use without having to consult the full paper. Prior work and details of methodology generally may be omitted, but a few key references may be cited for important related work. Make a serious effort to write the Synoptic so that it is understandable to the general engineering community by replacing specialist jargon terms and acronyms with terms that the nonspecialist can understand. Where a device is the subject of the paper, a simple line diagram showing those elements being discussed in the Synoptic should be given. Coordinates should be shown on the diagram when pertinent, and symbols appearing in the tables and graphs of the Synoptic should be defined. Information should be given in tabular form rather than in prose when this simplifies the presentation and expedites comprehension. The relation of the author's contribution to the state-of-the-art should be indicated briefly.

If you have submitted a full paper, the Editors may request you to prepare a Synoptic for review instead. A Synoptic must still be accompanied by a full paper, preprint, or company report for verification. If the Synoptic is published, the back-up paper or preprint will be available from the National Technical Information Service or the AIAA Library (to be cited in a footnote on first page of Synoptic), where it will be available to readers who wish to purchase copies.

Full-Length Papers: In terms of standard-size *double-spaced* typed pages, the maximum length for full-length papers is 36 pages (including equations), where each normal-sized figure counts as one page. If a figure has several parts, each part counts as one page. Greater length usually will be unacceptable and may be the basis for return of the paper to the author for reduction prior to review.

Abstract: Each full-length paper must be accompanied by a 100- to 200-word abstract, written as a single paragraph. It should be a summary (not an introduction!) and complete in itself (no numerical references). The abstract should indicate the subjects dealt with in the paper and should state the objectives of the investigation. Newly observed facts and conclusions of the experiment or argument discussed in the paper must be stated in summary form. Readers should not have to read the paper to understand the abstract.

Introduction: The paper also must include an Introduction—a brief assessment of prior work by others and an explanation of how the paper contributes to the field.

Technical (or Engineering) Notes and Technical Comments: Short manuscripts, not exceeding one quarter the length stated for a full paper, may qualify for publication in one of these categories. *Notes* are intended for prompt disclosures of new, significant data or developments of limited scope. *Comments* should relate to papers previously published by AIAA. These categories are reviewed only by an editor and usually are published several months sooner than a full paper or Synoptic.

Titles and Authors' Names: The title should be brief and concise. The author's name should be typed on the line below the title, and it is preferable to use the full name. The company affiliation should follow on the next line, with the author's official title given in a footnote. This applies to all categories of papers.

Mathematics: Equations and symbols may be handwritten or typewritten; clarity is essential. If handwritten, be sure that a reader can distinguish between capital and lower case letters; the letter o and zero; ell, the number one, and prime; k and kappa; u and mu, v and nu, n and eta. Always use the *solidus* for fractions in the text and for simple fractions in displayed equations.

References: References are to be grouped at the end of the manuscript and are to be given as follows:

1) Journals: Walker, R.E., Stone, A.R., and Shandor, M., "Secondary Gas Injection in a Conical Rocket Nozzle," *AIAA Journal,* Vol. 1, Feb. 1963, pp. 334-338.

2) Books: Turner, M.J., Martin, H.C., and Leible, R.C., "Further Development and Applications of Stiffness Method," *Matrix Methods of Structural Analysis,* 1st ed., Vol. 1, Macmillan, New York, 1964, pp. 203-206.

Segre, E., ed., *Experimental Nuclear Physics,* 1st ed., Vol. 1, Wiley, New York, 1953, pp. 6-10.

3) Reports: Book, E. and Bratman, H., "Using Compilers to Build Compilers," Systems Development Corp., Santa Monica, Calif., SP-176, Aug. 1960.

4) Transactions/Proceedings: Soo, S.L., "Boundary-Layer Motion of a Gas-Solid Suspension," *Proceedings of the Symposium on Interaction between Fluids and Particles,* Institute of Chemical Engineers, Vol. 1, 1962, pp. 50-63.

Always give inclusive page numbers for references to journal articles and a page or chapter number for books. Each reference must be cited in the text.

Illustrations: Line drawings must be clear and sharp. Use black ink on white paper or tracing cloth. Lettering should be large enough to be legible (at least 1/16 in. high) after reduction. Plan figures for reduction to column width (3¼ in.). Photographs should be glossy prints, not matte or semimatte. Each figure must have a caption; captions should be listed on a separate sheet. Write your name and the figure number in the margin of each figure. Cite each figure in numerical order in the text.

Tables: Type a double rule at the top and bottom of each table and a single rule under the column headings. Table footnotes should be placed under the final double rule and should be indicated by letters, a, b, c, etc. Do not number table footnotes consecutively with text references. Each table must have a number and a caption. Cite each table in numerical order in the text.

Symbols and Units: Use standard symbols whenever possible, preferably those recommended by the American Standards Association. The metric or dual systems of units (metric and English) should be used, wherever possible, in accordance with an endorsement by the AIAA Board of Directors. Although such use is not mandatory, authors are urged to comply.

Keep up to date with new technology...

With more immediacy than a textbook, but more perspective than the latest proceedings, each AIAA Selected Reprint Series volume serves not only as an introduction to a particular field, but brings the professional up to date with the latest technology of a particular subject.

Professionals draw invaluable information from the Reprint Series, such as the most significant advances in the field, bibliographies, and an overview of the subject.

Learning is a life-long process.

VOLUMES AND EDITORS

XVIII SATELLITE COMMUNICATIONS SYSTEMS
I. Kadar

XVII FINITE ELEMENT METHODS IN STRUCTURAL DYNAMICS
T.H.H. Pian

XVI HEAT PIPES
C-L. Tien

XV COMPUTER FLUID DYNAMICS—RECENT ADVANCES
F.H. Harlow

XIV TURBULENCE TRANSPORT MODELING
F.H. Harlow

XIII THE EARTH'S ATMOSPHERE
W.W. Vaughan and L.L. DeVries

Volumes I-IV from this Series are $2.50. Volume V is $3.50. Volumes VI-XIII are $2.50 per copy. Volumes XIV-XVI are $3.00 per copy. Volume XVII is $7.00 per copy for members, $9.00 per copy for nonmembers. Volume XVIII is $9.50 members, $12.50 nonmembers. All sales are final. Orders must be accompanied by remittance and should be addressed to the American Institute of Aeronautics and Astronautics, Special Publications Department, 1290 Avenue of the Americas, New York, NY 10019.
